

CONTROLS, HVAC & REFRIGERATION PRODUCTS

The European Products Catalogue 2016

A more comfortable,
safe and sustainable world

Company profile

Johnson Controls has expanded remarkably since Professor Warren Johnson founded the company to manufacture his invention, the electric room thermostat. Since its start in 1885, Johnson Controls has grown into a global leader in automotive experience, building efficiency and power solutions.

The company provides innovative automotive interiors that help make driving more comfortable, safe and enjoyable. For buildings, it offers products and services that optimize energy use and improve comfort and security. Johnson Controls also provides batteries for automobiles and hybrid electric vehicles, along with systems engineering and service expertise.

Our vision

A more comfortable,
safe and sustainable world.

Our values

Integrity

Honesty, fairness, respect, and safety are of the utmost importance.

Customer Satisfaction

Our future depends on us helping to make our customers successful. We are proactive and easy to do business with. We offer expert knowledge and practical solutions, and we deliver on our promises.

Employee Engagement

We foster a culture that promotes excellent performance, teamwork, inclusion, leadership and growth.

Innovation

We believe there is always a better way. We encourage change and seek the opportunity it brings.

Sustainability

Through our products, services, operations and community involvement, we promote the efficient use of resources to benefit all people and the world.

HVAC CONTROL PRODUCTS
Valves

Terminal Unit Valves

V5000

DN10...20, PN16

These valves are primarily designed to regulate the flow of water and steam in response to the demand of a controller in zone and terminal unit applications.

Following actuators are available:

VA-707x ON/OFF thermal;

VA-709x thermal 0...10 VDC;

VA-748x floating and proportional electric.

Features

- Forged brass body, stainless steel stem and spring
- K_{VS} 0.16...5
- 2-way PDTC (normally open),
3-way mixing and 3-way diverting
and 3-way mixing and 3-way diverting
with built-in bypass configurations
- Fluid temperature 2...120 °C
- BSP and compression fitting body connections
- Inherent flow characteristic: equal percentage
- Rangeability 50:1

HVAC CONTROL PRODUCTS

Valves

Plant Valves

VGS800

DN15...50, PN16

These valves are primarily designed to regulate the flow of water in response to the demand of a controller in zone and terminal unit applications.

Following electric actuators are available:

VA-77xx and VA78xx electric valve actuators.

Features

- Cast bronze body
- K_{VS} 0.63...40
- 2-way PDT0 (normally closed) using 3-way mixing valve with modkit, 3-way mixing configuration
- Fluid temperature 2...130 °C
- BSPP male threaded body connections

3-way mixing configuration

121 4930 501	DN50 / Rp 2

Note

2 pipe muffles and 1 modkit are required to alter a 3-way valve into a 2-way valve

HVAC CONTROL PRODUCTS Valves

Plant Valves

VG7000

DN15...50, PN16

VG7000 Series Bronze Control Valves are designed primarily to regulate the flow of water and steam in response to the demand of a controller in Heating, Ventilating and Air Conditioning (HVAC) systems.

These valves are available in Push-Down-To-Close (PDTC), Push-Down-To-Open (PDTO), and three-way mixing configurations. Both electric and pneumatic actuators are available for factory or field mounting.

Features

- DN15 through DN50 bronze valves, in two-way PDTC, PDTO and three-way mixing configurations
- Wide range of electric actuators available for all valves
- Every valve tested for tight shutoff
- Uses Standard Johnson Controls U-cup Packing
- Flexible features-and-options ordering template
- Standard Bonnet and stem design
- Leakage
 - Brass Trim: 0.01% of Maximum Flow per EN60534-4, Class IV
 - Stainless Steel Trim: 0.05% of Maximum Flow
- Inherent Flow Characteristics
 - Equal Percentage: 2-way Valves
 - Linear: 3-way Valves in compliance with EN 600534
- Rangeability
 - 25:1 at 0.25...1 kvs and 100:1 at 1.6...40 kvs
 - In accordance with EN 60534-2-4
- Maximum Recommended Operating Pressure Drop
 - 240 kPa for DN15 and DN32 - 200 kPa for DN40 to DN50
- Fluid Temperature Operating Limits
 - Valves with Brass Trim:
 - With V-3801 and VA-731x Actuators: 2 °C to 120 °C water / 100 kPa Saturated Steam
 - With all other Actuators: 2 °C to 140 °C water / 260 kPa Saturated Steam
 - Valves with Stainless Steel Trim: 2 to 170 °C / 690 kPa Saturated Steam

HVAC CONTROL PRODUCTS Valves

Plant Valves

VG9000

DN15...100, PN6 and PN10

These flanged valves are primarily designed to regulate the flow of water and low pressure steam in response to the demand of a controller, in heating, ventilating and air conditioning systems.

Following electric actuators are available:

VA-7700 for DN15...50 valves

VA7810 for DN15...65 valves

VA1000 for DN65...100 valves.

Features

- Nodular cast iron body
- K_{VS} 0.63...160
- 2-way PDT0 (normally closed) and 3-way mixing configurations
- Fluid temperature 2...140 °C
- DIN flanged

Notes

- * For factory mounted valve actuators just add "+M" to the type model number
 For ordering a valve with Cooling fin, add suffix "10" to the ordering code: i.e. VG8xxxS1H10
 For ordering a valve with Glycerine cup packing, add suffix "20" to the ordering code: i.e. VG8xxxS1H20.
 Reduced kvs coefficients are available on request.

- ** For fluid temperature >140 °C the extension kit VA1000-EP must be mounted. Max-Fluid temperature must not exceed 200 °C.

HVAC CONTROL PRODUCTS

Valves

Plant Valves

VG8300N

DN40...150, PN16 Pressure Balanced

These pressure balanced flanged valves are primarily designed to regulate the flow of water and steam in response to the demand of a controller, in heating, ventilating and air conditioning systems.

These valves have a specially designed plug, which through specific balancing of pressures allows higher close-off pressures with standard actuator combinations.

A variety of electric and pneumatic actuators are available.

Features

- Nodular cast iron bodies
- K_{VS} 25...350
- 2-way PDTC (normally open) configuration
- PN16
Fluid temperature 2...180 °C
with Glycerin cup -10...180 °C
- Pressure balanced valve plug
- DIN flanged

HVAC CONTROL PRODUCTS Valves

Plant Valves

VG1000 Flanged

DN65...100, PN16

The VG1000 series control ball valves are used for the water control of air treatment systems in ventilation and air conditioning units as well as heating system.

They are operated by remote mounted Spring Return and Non Spring Return actuators.

Features

- 2-way & 3-way mixing
- Body Rating PN 16
- Hot water, chilled water, 50/50 glycol solutions and 172 kPa Saturated Steam for HVAC Systems
- Valve Fluid Temperature Limits -18 to 140 °C
- Maximum Closeoff Pressure
2-way: 689 kPa / 3-way: 345 kPa
- Maximum Recommended Operating Pressure Drop
207 kPa for quiet service
- Flow Characteristics
2-way: Equal Percentage (according EN60534-2-4)
3-way: Equal Percentage (according EN60534-2-4) Flow Characteristics of Inline Port (Coil) and Linear Percentage Flow Characteristics of Angle Port (Bypass)
- Rangeability Greater than 500:1
- Leakage
2 and 3-way: 0.01% of Maximum Flow, Control port, ANSI/FCI 70-2, Class 4
3-way: 1% of Maximum Flow, Bypass Port

Plant Valves

VG1000 Threaded

DN15...50, PN40

The VG1000 series ball valves are used for the water control of air treatment systems in ventilation and air conditioning units as well as heating system.

They are operated by direct or remote mounted Spring Return and Non Spring Return actuators.

Features

- Forged brass body
- K_{VS} 1...63
- 2-way, 3-way mixing and diverting configurations
- Inherent Equal Percentage Flow Characteristic in the in-line port of all valves
- BSPP female threaded body connections
- **Service**
Hot and cold water:
-30...140°C with 8 Nm Non Spring Return
-30...95°C with 4 Nm Non Spring Return (140°C with M9000-561 Thermal Barrier)
-30...100°C with 3 Nm and 8 Nm Spring Return (140°C with M9000-561 Thermal Barrier)
Water with glycol to max 50% volume
Steam to max 103 kPa at 121°C with 8 Nm Non Spring Return
Steam to max 103 kPa at 121°C with 4 Nm Non Spring Return, 3 Nm and 8 Nm Spring Return with Thermal Barrier
- M9000-525-5 linkage kit available for field mounting to M9108 series electric actuators

Plant Valves

VFB Butterfly Valves

DN25...500, PN16

VFB Butterfly Valves Series are specifically designed for a wide range of Heating, Ventilating, and Air Conditioning (HVAC) applications, including two-position and modulating control of hot, chilled, or condenser water, and 50/50 glycol solutions.

All valves are factory tested for bubble-tight shutoff at 100% of the fully-rated pressure.

These valves are also bidirectional, allowing positive shutoff with the flow in either direction.

Features

- Low Seating/Unseating Torques
Reduce actuator torque and size requirements, particularly with lower-pressure rated valves
- Bubble-Tight Shutoff
Ensures positive closure when needed
- Broad Range of Pre-Assembled Actuators
Offers a wide selection for new and replacement electric and pneumatic actuators
- High-Integrity Components
Provide quality valve assemblies, combining long cycle life with optimal engineered functional designs
- Fluid Temperature Limits
-29 °C to 121 °C
- Flow Characteristics
Modified Equal Percentage

HVAC CONTROL PRODUCTS Valves

Pressure Independent Valves

VP1000

DN15...32, PN25
DN40...50, PN16

VP1000 Pressure Independent Control Valve is a combination of a differential pressure regulator and a regulating valve for flow adjustment.

VP1000 Valve allows to adjust the flow rate also in case of partial load of the system and it always ensures a stable adjustment of the supply connected to it. The differential pressure regulator corrects any differential pressure variation. This leads to a considerable reduction in temperature variations and adjustment movements and to the extension of the life of the moving devices connected to it.

VP1000 Valves offer a remarkable adjustment flexibility. In combination with Johnson controls actuators they can be set to a specific flow rate value and they allow precise modulating control. The valves always guarantee a suitable flow rate, therefore avoiding too high energy consumption.

Since VP1000 Valve performs the functions of two valves (balancing and adjustment), the installation costs are considerably reduced. The automatic flow rate limitation eliminates system adjustment costs. Since adjustment is very easy to perform, design flow rates can be modified at any time and at low costs.

Since it is not necessary to adjust the valve after its installation, the valve can work immediately after it has been assembled, for example, on the floors where works are already finished.

In order to adjust the flow rate, just set the selected value using the adjustment knob.

Since flow rate is the only parameter to be considered, choosing the suitable valve is easy and fast. VP1000 Valve maximum adjustment matches the maximum flow rate allowed by the pipe size, on the basis of the values established by international standards.

Features

- K_{VS} calculation is not necessary
- Valve authority calculation is not required
- Specific devices or knowledge are not necessary
- Compact design that allows installing the valve also in small spaces such as fan-coils or narrow supply spaces
- Flow rate adjustment without disassembling the actuators

Pressure Independent Valves

VPA

DN50...150, PN16

VPA Pressure Independent Control Valve is a combination of a differential pressure regulator and a regulating valve for flow adjustment.

VPA Valves offer a remarkable adjustment flexibility. In combination with VAP actuators they can be set to a specific flow rate value and they allow precise modulating control. The valves always guarantee a suitable flow rate, therefore avoiding too high energy consumption.

Since VPA Valve performs the functions of two valves (balancing and adjustment), the installation costs are considerably reduced. The automatic flow rate limitation eliminates system adjustment costs. Since adjustment is very easy to perform, design flow rates can be modified at any time and at low costs.

Features

- The max. flow of VPA valve could be set according to the requirement. The flow can be set easily by the actuator potentiometer.
- The built-in balancing tube has more compact structure and can avoid damages during shipping and installation compared to the external tube.
- Valve body is made of ductile iron material, with anticorrosion treatment on the surface
- High close-off pressure with very low leakage rate
- Linear actuator with high control accuracy provides the equal percentage flow curve

Terminal Unit Valve Actuators

VA-7070

Thermal ON/OFF Control

The VA-707x series terminal unit valve actuators provide ON/OFF and DAT control in HVAC application.

The compact design of these actuators make them suitable for installations in confined spaces, such as fan-coil applications.

The VA-707x actuators are designed for field mounting onto all Johnson Controls terminal unit valves: VG6000, V5000, VP1000 (see pertinent bulletins).

Features

- 24 VAC/DC and 230 VAC power supply
- ON/OFF or DAT Controls
- NC version (stem retracts when energized)
- NO version (stem extends when energized)
- Easy mounting solution
- Factory mounted cable 2 m

Terminal Unit Valve Actuators

VA-7090

Thermal 0...10 V Control

The VA-709x series terminal unit valve actuators provides proportional control in HVAC application.

The compact design of these actuators make them suitable for installations in confined spaces, such as fan-coil applications.

The VA-709x actuators are designed for field mounting onto all Johnson Controls terminal unit valves: VG6000, V5000, VP1000 (see pertinent bulletins).

Moreover, thanks to an innovative fixing system, the VA-709x is suitable for almost all the terminal unit valves in the market.

Features

- 24 VAC power supply
- 0...10 V control signal
- NC version (stem retracts when energised)
- NO version (stem extends when energized)
- Easy mounting solution
- Factory mounted cable 2 m

HVAC CONTROL PRODUCTS Actuators

Terminal Unit Valves Actuators

VA-7480

Motorized Floating and Proportional Control

The VA-748x series provides floating or proportional control in HVAC applications. The compact design of this actuator makes it suitable for installation in confined spaces, such as fan coil, chilled ceiling, manifolds, etc.

The VA-748x series actuator is designed for field mounting onto VG6000, V5000 and VP1000 terminal unit valves (*see pertinent bulletin*).

Due to the innovative concept of different strokes setting the VA-748x can be installed over most of the terminal unit valve in the market.

Features

- 24 VAC/VDC and 230 VAC power supply
- Floating and proportional control
- Threaded nut M28x1.5 and M30x1.5
- Auto stroke detection
- Configurable stroke
- Configurable to direct and reverse action
- Configurable analog inputs
- Max mechanical stroke 6.3 mm

Non Spring Return Plant Valve Actuators

VA-7150

Floating and Proportional Control

The VA-7150 series synchronous motor driven actuator provides floating or proportional control of valves with up to 19 mm stroke in heating, ventilation and air conditioning applications.

This compact, non-spring return actuator has 500 N nominal thrust and responds to a variety of input signals. The VA-7150 series can be easily installed on site or ordered pre-fitted to VG7000, VGS800 and VG9000 flanged valve series in accordance with the specified maximum close-off pressure ratings.

Features

- 500 N force output in a compact unit
- Magnetic clutch
- Unique Yoke Design
- Coupler for simple actuator attachment to flanged valves
- Positioner with adjustable starting point and span, reverse and direct action modes
- "Signal fail" safe position

Non Spring Return Plant Valve Actuators

VA-7200

Floating and Proportional Control

The VA-720x Series synchronous motor driven actuator provides floating or proportional control of valves, with up to 19 mm stroke in heating, ventilation and air conditioning applications.

This compact, non-spring return actuator has a 1000N nominal force and responds to a variety of input signals.

The VA-7200 Series can be easily field mounted or ordered factory coupled to VG7000, VG8000, VG9000 and VGS800 Series valves in accordance with the specified maximum close-off pressure ratings.

Features

- 1000N Force Output compact unit
- Magnetic clutch
- Signal fail "safe position"

HVAC CONTROL PRODUCTS Actuators

Non Spring Return Plant Valve Actuators

VA7810

Floating and Proportional Control

The VA7810 Non Spring Return actuator with 1000 N thrust for valves in heating, ventilation and air conditioning applications is available for floating (3-point) control or proportional control. All models have manual override as standard and provide stroke capabilities of 7 mm to 25 mm. Proportional models are self-calibrating.

The actuator is intended for use with Johnson Controls VG7000 and VGS800 threaded valves as well as VG9000, VG8000 and VG8300 flanged valves. All valves should be fitted in accordance with the maximum close-off pressure ratings specified. Valve-actuators can be ordered as separate units or as a factory fitted valve / actuator combinations.

Features

- Proportional actuators are self calibrating
- All models can also be used as floating and ON/OFF actuators
- Force controlled motor shut-off
- Manual override as standard
- IP54 enclosure protection
- Delivered with fitted 1.5 m cable and wire terminals
- Status LED
- Models with optional aux. switches or 2 kΩ feedback potentiometer
- Control-Signal failure - stem to pre-determined position
- Stroke position indicator

HVAC CONTROL PRODUCTS Actuators

Non Spring Return Plant Valve Actuators

VA1000

Floating and Proportional Control

The VA1000 valve actuators are used to control valves in HVAC systems. They are of modular construction so that the required type of control signal is achieved simply by fitting a module with the required function in-situ. It can be mounted onto VG8000, VG8300 and VG9000 series valves.

Features

- 24 VAC and 230 VAC power supply
- Floating and Proportional control
- Manual override
- Automatic stem coupling
- Actuator fixed to valve with one ring nut
- Self adjusting, automatic stroke adjustment, calibrated pressure control at the end positions
- 2 aux. switches, feedback potentiometer and split range unit available
- IP66
- Selectable characteristic curve
- Selectable running time

Non Spring Return Plant Valve Actuators

RA-3000

Floating and Proportional Control

The RA-3000 series synchronous motor-driven reversible actuators are available for 3-point (floating) or with electric positioner for 0...10 V control.

They feature factory calibrated pressure switches to provide specified close-off ratings. These actuators are available in three sizes with 1600 N, 1800 N and with 3000 N nominal force and can be used with JC flanged valves according to maximum close-off pressure ratings specified. Factory fitted options, such as 2kOhm feedback potentiometer, auxiliary switches and hand crank are available.

Features

- Uses synchronous motor with pressure switches
- Special clamp coupler quick-fit systems
- Models for 3-point and proportional 0...10 VDC control
- Positioner with adjustable starting point, span, and direct/reverse action
- Active 0...10 VDC position feedback on proportional models
- Optional auxiliary switches and feedback potentiometer available
- Optional hand crank

Non Spring Return Plant Valve Actuators

VA9104-xGA-1S

(*Joventa BAD1.4 / BAD1 / BMD1.2*)

4 Nm, ON/OFF, Floating and Proportional Control
Rotary Actuators for Ball Valves

The electric Actuator series have been developed for operation of ball valves.

These synchronous, motor driven actuators are used to provide accurate positioning on VG1000 series DN15, DN20 and DN25 ball valves.

Features

- ON/OFF, Floating with Timeout and Proportional Control
- Load-independent runnin time
- Up to 5 actuators in parallel operation possible
- Manual release button
- 1.2 m PVC cable
- Selectable direction of rotation
- Automathic shut-off at end position

(Joventa BAS1 / BAS2 / BMS1.1)

8 Nm, ON/OFF, Floating and Proportional Control
Rotary Actuators for Ball Valves

The M9108-xxx-5 electric actuator series have been developed for operating VG1000 series ball valves.

The actuators can be mounted onto the valves by the means of the M9000-525-5 linkage kit.

Features

- ON/OFF, Floating and Proportional Control
- Halogen-free connecting wire
- Load-independent running time
- Easy assembly on the console
- Selectable direction of rotation
- Manual adjustment by pushing the release button and turning the handle with position indicator (the release button does not automatically spring back into position)
- Automatic switching off in the limit positions

(*Joventa BMS1.10*)

10 Nm, ON/OFF, Floating and Proportional Control
Rotary Actuators for Ball Valves

The VA9310 Electric Actuator series have been developed for operation of ball valves. It's used to provide accurate positioning on VG1000 series DN32, DN40 and DN50 ball valves.

The model includes an all-in-one On/Off, Floating Point and Proportional control with 24 V power.

An optional line voltage auxiliary switch kit can be field installed to indicate an end-stop position to perform switching functions within the selected rotation range. Optional potentiometric feedback kits are available as well to be mount on field.

Features

- Universal model: On/Off, floating and proportional
- Optional Kits with One and Two auxiliary switches and different potentiometer feedback.
- Electronic Stall Detection
- CLASS III insulation rating
- Microprocessor-controlled Brushless DC Motor
- Mode Selection Switch to select reversal logic, calibration and span/offset signal adjustment
- Integral Cables with Colored and Numbered
- Underwriters Laboratories Inc.® (UL), CE Mark, and C-Tick Compliance
- Manufactured under International Standards Organization (ISO) 9001 Quality Control Standards
- 5-Year Warranty

Rotary Actuators for Butterfly Valves

VA-9070

68 - 2430 Nm, ON/OFF, Floating and Proportional Control
Rotary Actuators for Butterfly Valves

The actuator is specially developed for use with VFB butterfly valves in the HVAC industry.

These bidirectional actuators are direct mounted on VFB valves without any linkage. A single VA-9070 provides 68, 226, 565, 735, 1470 and 2034 Nm torque depending on the model.

With a power supply of 24 Vac or 230 Vac the actuators can be controlled in 2-point, 3-point (floating) or proportional configuration.

Two isolated auxiliary switches and an electrical heater are standard in these series.

The protection class is IP65 to ensure a dust-proof and shower-proof from all angles.

An Hand operation is standard. When hand operation is active, a yellow ring is displayed and the actuator motor is not operative. the position indicator is clearly recognizable all around.

The opening and closing speed is independently adjustable in the proportional application.

Features

- Exact positioning ensures precise flow control
- Complete opening and closing from 100% to 0
- Range from 68 Nm to 2034 Nm
- Self-regulating heater as standard
- Construction optimized for operation with butterfly valves.
- Two isolated auxiliary switches as standard

Non Spring Return Plant Valve Actuators

VAP1000 - VAP3000

VAP Linear Actuators for VPA Pressure Independent Flanged Valves

The VAP Actuators have been specifically designed to drive the VPA Pressure Independent Valve.

They provide 1000N or 3000N according with the valve dimensions. The actuators are used to control the valve and to set the maximum desired flow.

Features

- Linear actuator with high control accuracy provides the equal percentage flow curve
- Actuator has manual function that allows for manual positioning of the valve
- The potentiometer on the actuator is use to set the maximun flow of the VPA Valve
- They provide 1000N or 3000N according with the valve dimensions.
- In the VAP300-24-C model, a led display gives several function information
- 0-10 Vdc or 4-20 mA setpoint and feedback

Spring Return Plant Valve Actuators

VA7820 - VA7830

Floating and Proportional Control

The VA78x0 spring return actuator with 1000 N thrust for valves in heating, ventilation and air conditioning applications is available for floating (3-point) control or proportional control.

All models have manual override as standard and provide stroke capabilities of 7 mm to 25 mm.

Proportional models are self-calibrating.

The actuator is intended for use with Johnson Controls VG7000 and VGS800 threaded valves as well as VG9000, VG8000 and VG8300 flanged valves. All valves should be fitted in accordance with the maximum close-off pressure ratings specified.

Valve-actuators can be ordered as separate units or as a factory fitted valve / actuator combinations.

Features

- Proportional actuators are self calibrating
- All models can also be used as floating and ON/OFF actuators
- Force controlled motor shut-off
- Manual override as standard
- IP54 enclosure protection
- Delivered with fitted 1.5 m cable and wire terminals
- Status LED
- Control-Signal failure - stem to pre-determined position
- Stroke position indicator
- Spring return functions

Spring Return Plant Valve Actuators

VA1000

Floating and Proportional Control

The VA1000 valve actuators are used to control valves in HVAC systems. They are of modular construction so that the required type of control signal is achieved simply by fitting a module with the required function in-situ. It can be mounted onto VG8000, VG8300 and VG9000 series valves.

Features

- 24 VAC and 230 VAC power supply
- Floating and Proportional control
- Manual override
- Automatic stem coupling
- Actuator fixed to valve with one ring nut
- Self adjusting, automatic stroke adjustment, calibrated pressure control at the end positions
- 2 aux. switches, feedback potentiometer and split range unit available
- IP66
- Selectable characteristic curve
- Selectable running time

Spring Return Plant Valve Actuators

FA-2000

Floating and Proportional Control

The FA-2000 series electric actuators are available for 3-point control or with electronic positioner for 0...10 V or 0...20 mA control. It provides a fully variable valve aperture, a power failure spring return safety mechanism and an electrically operated manual override. Three models of the FA-2000 are available.

The FA-22 ("failsafe" position down = stem fully extended) and FA-25 ("failsafe" position up = stem fully retracted):

this model pair has a 25 mm stroke and a minimum of 2400 N thrust.

The FA-23 ("failsafe" position down) and FA-26 ("failsafe" position up):

this model pair has a 42 mm stroke of and a minimum thrust of 2200 N.

The FA-24 ("failsafe" position down) and FA-27 ("failsafe" position up):

this model pair has a stroke of 13 mm and 2000 N minimum thrust. The actuator can be combined with VG8000 (H, N, V) series in accordance with the maximum close-off pressure ratings specified.

The FA-2000, when delivered as a single unit, is pre-set to facilitate installation with minimum adjustment; it is also available with a variety of options such as auxiliary switches and feedback potentiometers

Features

- Power failure mechanism (Spring Return)
- Visible calibration ring on stem coupling
- Positioner with adjustable starting point, span and direct/reverse action
- Electrically operated manual override
- Quick-fit coupling clamp

Rotary Actuators for Ball Valves

VA9203

(Joventa BxFx.03SZ)

3 Nm, ON/OFF, Floating and Proportional Control
Rotary Actuators for Ball Valves

The VA9203 Series Electric Spring Return Actuators are direct-mount actuators.

These bidirectional actuators are used to provide accurate positioning on Johnson Controls® VG1000 Series DN15 up to DN25 ball valves in Heating, Ventilating and Air Conditioning (HVAC) applications.

One Integral line voltage auxiliary switch, available only on the VA9203-xxB-1(Z) models, indicate end-stop position, or perform switching functions within the selected rotation range.

A graduated scale from 0% to 100% and a position indicator provide visual indication of the valve's opening.

When power fails during service, the mechanical spring return system open or close the valve ports.

The series includes the following control options:

ON/OFF, 24 V AC/DC, 100 to 240 VAC power

ON/OFF and Floating Point, 24 V AC/DC power

Proportional, 24 V AC/DC power, for 0(2) to 10 VDC or 0(4) to 20 mA Control.

Features

- 3 Nm Rated Torque
- Mechanical Spring Return System
- Direct-Coupled Design
- Reversible Mounting
- Rugged IP54 Rated Enclosure
- Electronic Stall Detection
- Double-Insulated Construction
- Microprocessor Controlled Brushless DC Motor (-AGx and -GGx Models)
- External Mode Selection Switch (-AGx and -GGx Models)
- Integral Cables with Colored and Numbered Conductors
- Optional Integrated Auxiliary Switch
- Override Control (Proportional Models Only)
- UL, CE, and C-Tick Compliance
- Manufacturing under International Standards Organization (ISO) 9001 Quality Control Standards.

Rotary Actuators for Ball Valves

VA9208

(Joventa BxFx.08S)

8 Nm, ON/OFF, Floating and Proportional Control
Rotary Actuators for Ball Valves

The VA9208 Series Electric Spring Return Actuators are direct-mount actuators.

These bidirectional actuators are used to provide accurate positioning on Johnson Controls® VG1000 Series DN32 up to DN50 Ball Valves in Heating, Ventilating and Air Conditioning (HVAC) applications.

Two Integral line voltage auxiliary switches are available only on the VA9208-xxC-1 models, indicate end-stop position, or perform switching functions within the selected rotation range.

A graduated scale from 0% to 100% and a position indicator provide visual indication of the valve's opening.

When power fails during service, the mechanical spring return system open or close the valve ports.

The series includes the following control options:

ON/OFF, 24 V AC/DC, 230 V AC power

ON/OFF and Floating Point, 24 V AC/DC power

Proportional, 24 V AC/DC power, for 0(2) to 10 VDC or 0(4) to 20 mA Control

Non Spring Return Damper Actuators

M910x-xGA-xS

(*Joventa DAB / DAD / DMD*)

2 and 4 Nm, ON/OFF, Floating and Proportional Control

The Small Family electric damper actuator series have been developed to operate small air dampers in ventilation and air conditioning systems.

The compact design make this actuator highly versatile.

Features

- Floating, ON/OFF and Proportional Control
- Load-independent running time
- Up to 5 actuators in parallel operation possible
- Actuators available with PVC cable or with Plug-in terminal block connection
- Simple direct mounting with universal adapter for fitting to \varnothing 8...13 mm or with 8...10 mm square shaft. 45 mm minimum shaft length
- Selectable direction of rotation
- Manual release button

Non Spring Return Damper Actuators

M9304-xxx-1N

(Joventa DAN / DAN2 / DMN)

4 Nm, ON/OFF, Floating and Proportional Control

The Silence electric damper actuator series have been developed to operate small and medium air dampers in ventilation and air conditioning systems. The compact design and universal adapter fitted with limitation of rotation angle make this actuator highly versatile.

A key feature of the design is the Johnson Controls stem adapter which also incorporates angle-of-rotation limiting and position indication.

Features

- ON/OFF, Floating and Proportional Control
- Load-independent running time
- Up to 5 actuators in parallel operation possible
- Plug-in terminal block connection
- Simple direct mounting with universal adapter for fitting to \varnothing 6 mm to 16 mm shaft or with M9000-ZxxDN adapter kit for 8, 10, 11 and 12 mm square shaft. 45 mm min shaft length
- Selectable direction of rotation
- Limitation of rotation angle
- Manual release button
- 2 adjustable auxiliary switches
- Automatic shut-off at end position (overload switch)
- Energy saving at end positions
- Actuators available with 1 m halogen-free cable

Non Spring Return Damper Actuators

M9310-HGA-1

(Joventa DM1.10)

Available
Soon

10 Nm, ON/OFF, Floating and Proportional Control

The M9310 Series Electric Non-Spring Return Actuators are used to control of dampers in HVAC systems. The actuator provides 10 Nm rated torque.

The model includes an all-in-one On/Off, Floating Point and Proportional control with 24 V power.

It can be mounted directly to a round damper shaft from 9.5 to 19 mm diameter or square shaft from 9.5 to 15 mm with a universal clamp.

An optional line voltage auxiliary switch kit can be field installed to indicate an end-stop position or perform switching functions within the selected rotation range.

Optional potentiometric feedback kits are available as well to be mount on field.

Features

- Universal model: On/Off, floating and proportional
- Optional Kits with One and Two auxiliary switches and different potentiometer feedback.
- Self-Calibrating to Adjust Stroke
- Electronic Stall Detection
- CLASS III insulation rating
- Microprocessor-controlled Brushless DC Motor
- Mode Selection Switch to select reversal logic, calibration and span/offset signal adjustment
- Integral Cables with Colored and Numbered
- Underwriters Laboratories Inc.® (UL), CE Mark, and C-Tick Compliance
- Manufactured under International Standards Organization (ISO) 9001 Quality Control Standards
- 5-Year Warranty

Non Spring Return Damper Actuators

M9100

(Joventa DAS-DMS / DA-DM / DAL-DML / DAG-DMG)

8, 16, 24 and 32 Nm, ON/OFF, Floating and Proportional Control

The M9100 Series Electric Actuators are direct-mount actuators. These bidirectional actuators do not require a damper linkage, and are easily installed on round shafts or square shafts using the standard shaft clamp included with the actuator.

A single M9100 Series Electric Non Spring Return Actuator provides 8, 16, 24 or 32 Nm torque depending on the model. Two integral line voltage auxiliary switches, available only on the M91xx-xxC models, indicate end stop position or performs switching functions within the selected rotation range.

M9100 Series Actuators provide 90° of rotation. A graduated scale from 0° to 90° and a position indicator provide visual indication of stroke.

Features

- Direct-Coupled Design
- Selectable direction of rotation
- Electronic Stall Detection
- Double-Insulated Construction
- Load independent
- Optional Integrated Auxiliary Switches
- Manufactured under International Standards Organization (ISO) 9001 Quality Control Standards

Actuators

Spring Return Damper Actuators

M9203

(Joventa DxF1.03S-Z)

3 Nm, ON/OFF, Floating and Proportional Control

The M9203 Series Electric Spring Return Actuators are direct-mount actuators.

These bidirectional actuators do not require a damper linkage, and are easily installed on round shafts or square shafts using the standard shaft clamp included with the actuator.

A single M9203 Series Electric Spring Return Actuator provides 3 Nm running and spring return torque.

An integral line voltage auxiliary switch, available only on the M9203-xxB-1(Z) models, indicates end stop position, or performs switching functions within the selected rotation range.

M9203 Series Actuators provide 95° of rotation. A graduated scale from -5° to 90° and a position indicator provide visual indication of stroke.

When power fails during service, the mechanical spring return system provides rated torque to the connected equipment, returning it to the home position.

The series includes the following control options:

ON/OFF, 24 V, 100 to 240 VAC power

ON/OFF and Floating Point, 24 V power

Proportional, 24 V power, for 0(2) to 10 VDC or 0(4) to 20 mA Control Signal.

Features

- 3 Nm Rated Torque
- Direct-Coupled Design
- Reversible Mounting
- Electronic Stall Detection
- Double-Insulated Construction
- Microprocessor-controlled Brushless DC Motor (-AGx and GGx types)
- External Mode Selection Switch (-AGx and -GGx types)
- Integral Cables with Colored and Numbered Conductors
- Optional Integrated Auxiliary Switch
- Override Control (Proportional Models Only)
- Manufactured under International Standards Organization (ISO) 9001 Quality Control Standards

Spring Return Damper Actuators

M9208-xxx-1

(*Joventa DBF1.08 / DAFx.08 / DMF1.08*)

8 Nm, ON/OFF, Floating and Proportional Control

The spring return electric damper-actuator series has been specially developed for the motorized operation of air dampers in air conditioning systems.

When the control signal is applied the actuator drives the damper to the operational position, while evenly tensioning the integrated spring. After a power failure the stored energy in the spring immediately brings the damper to the safety position.

Manual operation is automatically cancelled when the actuator is in electrical operation.

The compact design and universal adapter fitted with limitation of rotation angle make this actuator highly versatile.

Features

- ON/OFF and Floating control signal
- Up to 5 actuators in parallel operation possible
- Electrical connection with halogen-free cable
- Simple direct mounting with universal adapter on \varnothing 8 mm to 16 mm shaft or 6 mm to 12 mm square shaft. An optional M9208-600 Jackshaft Coupler Kit is available for 12 to 19 mm round shafts, or 10 mm to 14 mm square shafts
- Limitation of rotation angle
- Manual positioning with crank handle
- 2 auxiliary switches, 1 adjustable

Spring Return Damper Actuators

M9220-xxx-1

(*Joventa DAFx.20 / DBF1.20 / DMF1.20*)

20 Nm, ON/OFF, Floating and Proportional Control

The M9220 Series Actuators are direct mount, spring return electric that provide reliable control of dampers and valves in Heating, Ventilating, and Air Conditioning (HVAC) systems.

The Actuators are available for use with ON/OFF, floating, and proportional controllers. These bidirectional actuators do not require a damper linkage, and are easily installed on dampers.

Features

- ON/OFF, Floating and Proportional Control
- Two or three models mounted in tandem deliver twice or triple the torque
- Up to 5 actuators in parallel operation possible
- Optional adjustable end stops.
The Optional Adjustable End Stops are used to shorten the actuator stroke electronic stall detection throughout entire rotation range that extends the life of the actuator by deactivating the actuator motor when an overload condition is detected
- Integrated cables halogen-free cables
- IP54 (NEMA2)
- Rated Aluminium Enclosure
- Easy-to-Use Locking manual override with auto release and crank storage
- Energy saving at end position
- Two Integral gold Auxiliary switches (xxC Models)

Safety Damper Actuators

S9208-BxC-33x

(Joventa SAFx.08Sx/12)

8 Nm, ON/OFF Control

The S9208 Security Fire electric, Spring Return damper actuator series has been specially developed for the motorized operation of fire protection dampers.

When the control signal is applied the actuator drives the damper to the operational position, while evenly tensioning the integrated spring.

After a power failure the stored energy in the spring immediately brings the damper to the safety position.

Manual operation is automatically cancelled when the actuator is in electrical operation.

Features

- ON/OFF control signal
- 12 mm square shaft and 10 mm, 8 mm adapter inside the package
- Connection with halogen-free cable
- ST1.72E temperature sensor.
Switch point of temperature sensor ca. 72°C
- Actuator temperature sensor to monitor ambient sensor.
- Low noise level
- Manual positioning with crank handle
- 2 fixed auxiliary switches (8° and 83°)

Pneumatic Valve Actuators

MP8000

The MP8000 series pneumatic valve-actuators are designed to accurately position valve plugs in larger chilled water, hot water and steam applications in response to a pneumatic signal from a controller. A pneumatic positioner is also available for use in applications where sequential operation is desired or more positioning power and accuracy are required. They can be ordered as a factory fitted and ready-to-install valve/actuator combination or separately for local installation.

This robust actuator can be combined with VG8000 series flanged valves in accordance with the maximum close-off pressure ratings specified.

Features

- Pneumatic positioner
- Quick-fit coupler system
- Action reversible in-situ
- Optional hand wheel for factory or in-situ installation
- Optional auxiliary switches and feedback potentiometer available

Dimensions in mm

Pneumatic Valve Actuators

PA-2000

The PA-2000 Pneumatic Valve Actuators Series is available for ON/OFF Control.

The actuator can be combined with VG8000 and VG8300 series in accordance with the maximum close-off pressure ratings specified.

The fail safe position of the PA-2000 can be changed in-situ with a conversion kit.

Features

- Manual override
- Reversible action in-situ
- Accessories available

Carbon Dioxide

CD-2xx-E00-00

Wall Mount - CO₂ and Temperature Transmitter

The CD-2xx-E00-00 series is a wall mount transmitter for measuring the CO₂ levels and the relevant temperature within Heating, Ventilation and Air Conditioning (HAVC) applications.

The CD-2xx Series incorporates a single beam dual wavelength NDIR CO₂ sensor, which compensates for ageing effects, is highly insensitive to pollution and offers outstanding long term stability.

A multiple point CO₂ and T factory adjustment procedure leads to excellent CO₂ measurement accuracy over the entire T working range.

This compact wall-mounted device produces 0 to 10 V or 4 to 20 mA signals.

It is designed to work:

- in stand-alone mode
- as part of any integrated Building Automation System (BAS)

This new CO₂ transmitter is easy to install, offers a full 3-year warranty, and requires no maintenance or field calibration.

Features

- Power Supply 15...35 VDC / 24 VAC
- 0...10 V or 4...20 mA CO₂ and Temperature Output
- Models with Display
- Snap-on Enclosure
- Outstanding long-term stability
- CO₂ Factory Calibration Certificate

Wall Mount - CO₂, Relative Humidity and Temperature Transmitter

The CD-3xx-E00-00 series is a wall mount transmitter for measuring the CO₂ levels, the relevant humidity and the temperature within Heating, Ventilation and Air Conditioning (HAVC) applications.

The CD-3xx Series incorporates a single beam dual wavelength NDIR CO₂ sensor, which compensates for ageing effects, is highly insensitive to pollution and offers outstanding long term stability.

A multiple point CO₂ and T factory adjustment procedure leads to excellent CO₂ measurement accuracy over the entire T working range.

It is designed to work:

- in stand-alone mode
- as part of any integrated Building Automation System (BAS)

This new CO₂ transmitter is easy to install and requires no maintenance or field calibration.

Features

- Power Supply 15...35 VDC / 24 VAC
- 0...10 V CO₂ and Relative Humidity Output
- 0...10 V and Pt1000 Temperature Output on the same device
- Models with Display
- Snap-on Enclosure

Carbon Dioxide

CD-Pxx

Duct Mount

The CD-Pxx series duct mount CO₂ sensors feature a carbon Dioxide (CO₂) transmitter for measuring and transmitting CO₂ levels, ranging from 0 to 2,000 parts per million (ppm), within Heating Ventilating and Air Conditioning (HVAC) CO₂ applications.

Specific HVAC CO₂ applications include Demand Control Ventilation (DCV), fresh air and indoor Air Quality (IAQ), and rooftop air handling economizer controls system.

The device produce 0 to 10 V (default) 0 to 20 mA or 4 to 20 mA signal.

Features

- Power supply: 20 to 30 VAC (18 to 30 VDC), class 2
- Response time (0 to 63%): 1 minute
- Accuracy at 25 °C: ± 30 ppm + 2.0% of reading
- Operating temperature range: -5 to 45 °C
- Humidity range: 0 to 85%

Dew Point HX-9100

The HX-9100 dew sensor is used to prevent condensation on surfaces such as cold water pipes, cool ceilings and windows.

The HX-9100 can be connected to Johnson Controls System controllers to provide override functions when condensation is forming.

Features

- Supply voltage: 15 VDC \pm 10%
- Action: ON/OFF or 0...10 VDC
- Hysteresis: 1%
- Output: open collector closed: 0.5 VDC max or \leq + 0.5 VDC
- Protection class: IP44

Differential Pressure

DP2500 - DP0250

The DP low differential pressure transmitter series is an accurate and cost competitive solution for measuring low pressures of air and non-aggressive gases in order to monitor and control pressures in building automation, HVAC and clean room systems.

Features

- Power supply 24 VAC/VDC
- Pressure range: 8 different ranges in one device (see the table)
- Output signal: 0...10 VDC or 4...20 mA
- Automatically autozero point adjusting
- Response time selectable
- 2 rows x 12 characters digit display
- Back-light Display
- Protection class: IP54
- Configurable measuring unit (Pa, kPa, mbar, inchwc, mmwc, psi)

HVAC CONTROL PRODUCTS Sensors

Plant Temperature

TS-6300

The TS-6300 series temperature sensors provide a passive signal that corresponds to the air or water temperature in heating, ventilating and air conditioning applications.

They are passive resistive signal NTC K2, NTC K10, Pt100 or Pt1000 related to the sensed temperature. The TS-6300 temperature sensor series has been designed to work with Metasys and System91 field controllers.

Features

- Wide range of mounting types and signal outputs
- Different length of tubes and wells for duct and immersion applications
- Bayonet mounting system
- For immersion applications, well can be mounted before duct sensor is mounted
- IP54 Ingress Protection (except cable sensor)
- IP67 Ingress Protection for cable sensor

Pressure

PT-5217

Liquid or Air Pressure Transmitter

The PT-5217 pressure transmitter accurately measures pressure and converts the measurement into a standard proportional 0...10 V signal.

The PT-5217 is especially adapted to measure relative and absolute pressure of liquid and gases.

The pressure transmitter consists of a piezoresistive ceramic measuring cell with a diaphragm, installed in a stainless steel housing.

Features

- Compact, rugged construction
- Negligible temperature influence on accuracy
- Low hysteresis
- High accuracy
- Direct mounting, 1,5 m cable included
- Splash proof enclosure

Mounting holes
Ø 5,4 mm

Dimensions in mm

Room Humidity

HT-1000

Wall Mount

The HT-1000 series room humidity sensors provide active sensing of relative humidity and on specific models, also active/passive sensing of temperature in HVAC applications.

It features a polymer capacitance humidity sensing element and provides within either $\pm 2\%$ or $\pm 4\%$ accuracy a voltage output signal proportional 0 to 100% relative humidity.

The HT-1000 series room humidity sensors are designed for use with Johnson Controls System 91 and Facility Explorer controllers or for other systems having compatible input and output voltages.

Features

- Supply voltage: 15 VAC / 24 VAC
- Output RH%: 0...10 VDC
- Output Temperature: 0...10 VDC, NTC K2, Pt1000
- Protection class: IP30

Dimensions in mm

Ordering Codes	Humidity Range	Humidity Output	Humidity Accuracy	Temperature Range	Temperature Output	Supply Voltage

Room Temperature

RS-1100

Room Command Module

The RS-1100 room command modules are designed for use with Facility Explorer series or System 91 controllers from Johnson Controls and provides a 0...10 V signal directly proportional to the sensed temperature.

Models are available with and without LCD display, room temperature setpoint adjustment dial and temporary occupied override function and fan speed button.

Features

- Power supply
15 VDC (all models)
24 VAC/VDC (only models with display)
- 0...10 VDC temperature output
- Remote temperature setpoint adjustment,
- Occupancy override function, (models with or without display)
- Room enclosures 80 x 80 mm
- Protection class: IP30
- Fan speed button

Room Temperature

TE-7000

Room Command Module

The TE-7000 room command module is designed for use with the VMA1400 series VAV Modular Assembly.

The module has an NTC temperature sensor, a dial for setpoint adjustment within the range of 12 to 28°C or -3 to +3K, and an occupancy button with an LED indicator.

If the VAV controller is not already in occupied mode, as shown by the LED indicator, the occupant may press the occupancy button to obtain comfort control for a set period of time, normally defaulted to one hour.

The module also has a built-in connector for a PC with the software to test and commission the VMA1400 series VAV Modular Assembly and the air supply system.

Features

- Power supply: Power from VMA1400
- Temperature sensor: NTC K2
- Occupancy override button
- Protection class: IP30
- Remote setpoint adjustment

Dimensions in mm

Ordering Codes	Color	Setpoint Dial Range

Room Temperature

TM-1100

Room Command Module

The TM-1100 series of room command modules are designed for use with the TC-9102, TC-9109 and TCU series of DDC terminal unit controllers.

The setpoint dial enables the room occupant to adjust the working set point of the controller within the range of 12...28 °C or -3...+3°, according to the model number.

The occupancy button enables the occupant to switch the mode of operation of the controller between COMFORT and STANDBY or to request a temporary COMFORT mode during NIGHT operation.

A LED indicator shows the current operating mode.

For TC-9102 and TCU fan coil unit controllers, a room command module with a 3-speed fan override is available. Models without a temperature sensing element are provided for application where the temperature sensor is mounted inside the fan coil unit.

Features

- Passive sensor
- NTC K2 temperature output
- Remote temperature setpoint adjustment
- 3-speed fan override
- Occupancy override button
- Room enclosures 80 x 80 mm
- Protection class: IP30

Room Temperature

NS

Network Room Command Module

The NS Series Network Sensors are designed to function directly with Metasys® system Field Equipment Controllers (FECs), Input/Output Modules (IOMs), Variable Air Volume (VAV) Modular Assembly (VMA16) Controllers.

The majority of NS Series Network Zone Sensors monitor room temperature; however, options are available to also monitor zone humidity, carbon dioxide (CO₂), local temperature setpoint adjustments and other variables. This data is transmitted to a controller on the Sensor Actuator (SA) Bus.

Features

- BACnet® Master-Slave/Token-Passing (MS/TP) protocol communication:
provides compatibility with Metasys system field controllers and Facility Explorer programmable controllers in a proven communication network
- Backlit Liquid Crystal Display (LCD) available on some models:
provides real-time status of the environment with backlighting activated during user interaction
- Simple temperature setpoint adjustment available on some models:
enables to change the setpoint with the turn of a dial
- Temporary occupancy available on some models:
provides a timed override command, which temporarily initiates an alternate mode
- Field selectable default display setting on some models:
allows to toggle between temperature and RH on the display and set the desired default for continuous viewing
- Fahrenheit/Celsius (F/C) button available on some models:
toggles the display temperature between degrees Celsius and degrees Fahrenheit

Wireless Room Sensor

WRS

Proprietary Wireless Protocol

The WRS Many-to-One and TE-7800 One-to-One wireless room temperature sensing system are designed to gather temperature and zone data from multiple wireless room temperature sensors, and distribute that data to multiple field controllers on a Metasys® network.

A Many-to-One WRS system consists of multiple WRS-TTx series wireless room temperature sensors communicating with one or more WRS-RTN series receivers.

The receivers collect wireless temperature, zone, and battery-condition data messages and route that data over Ethernet to a Network Automation Engine (NAE) or a Network Control Engine (NCE).

The NAE or NCE distributes the temperature and zone data to supported BACnet®, N2 and LonWORKS® controllers on Metasys networks.

A simple One-to-One wireless sensing system consists of one WRS-TTx series wireless room temperature sensor communicating single-zone temperature data to an associated TE-7800 series receiver. Up to four sensors can report to a single receiver to provide enhanced zone control.

Features

- Power supply: 24 VAC
- RF band: 2.4 GHZ ISM Bands
- Transmission range: 114 m max indoor line-of-sight 50 m practical average indoor
- Transmissions: every 60 seconds
- Ambient operating temperature: 0 to 50 °C
- Ambient operating humidity: 0 to 95% RH

Dimensions in mm

Ordering Codes	Description	Transmission Power
WRS-RTN0000-1	Receiver for Many-to-One wireless room temperature sensing system, includes omnidirectional antenna	10 dBm (CE Mark)
TE-7820-1	Receiver with Zone Bus Interface for One-to-One wireless room temperature sensing system, interfaces with VMA1400 series controllers (only). Includes 1.8 m Zone Bus Interface cable and omnidirectional antenna	
TE-7830-1	Receiver with Analog Interface for One-to-One wireless room temperature sensing system, Interfaces with Specified Analog Digital controllers (Johnson Controls AS-AHU, AS-UNT, AS-VAV, DX-9100 or FXxx Series Controllers). Includes 1.8 m Analog Interface cable and omnidirectional antenna.	
WRS-TTP0000-1	Wireless Room Temperature sensor, warmer/cooler (+/-) set point adjustment	
WRS-TTR0000-1	Wireless Room Temperature sensor, no set point adjustment	
WRS-TTS0000-1	Wireless Room Temperature sensor, set point adjustment scale: 13 to 29°C	

Wireless Room Sensor

WRZ

ZigBee Wireless Protocol

The WRZ Series Wireless Room Sensors are designed to sense room/zone temperature and transmit wireless temperature control data. Some models also sense and transmit relative humidity.

In a ZFR1800 Series Wireless Field Bus System application, the sensors communicate with FEC16 Series, FEC26 Series and VMA16 Series Controllers by means of the ZFR1811 Router.

In wired field bus applications, the sensors communicate with a WRZ-7860 Wireless Receiver. The WRZ-7860 Receiver transfers data to the controller by means of the Sensor Actuator (SA) communication bus. In a typical application, one WRZ Series Sensor reports to one WRZ-7860 Receiver, but up to five WRZ Series Sensors can be associated with a single WRZ-7860 Receiver for multi-sensor averaging or high/low temperature selection.

WRZ Series sensor models are available with or without a Liquid Crystal Display (LCD). Depending on the sensor model, the WRZ Series Sensor can transmit sensed temperature, setpoint temperature, sensed humidity, occupancy status & PIR occupancy sensor and low battery conditions to an associated router or receiver. The WRZ Series Sensors are designed for indoor, intra-building applications only.

The WRZ Sensors use direct-sequence, spread-spectrum RF technology, and operate on the 2.4 GHz Industrial, Scientific, and Medical (ISM) band. The receiver meets the IEEE 802.15.4 standard for low power, low duty cycle RF transmitting systems.

Refer to the WRZ Series Wireless Room Sensors Product Bulletin (LIT-12011653) for important product application information.

Features

- Wireless RF Design
- Integral Wireless Signal Strength Testing Built into the Sensor
- Easy Installation and Relocation
- Easily-Applicable Data Types
- Simple, Field Adjustable DIP Switches
- Optional, Battery-Powered WRZ-SST-110 Wireless System Survey Tool
- High Resistance to RF Interference from Other Radio Devices or RF Noise Sources
- User Selectable Default Display for Humidity Models
- Display Models
- Three Temperature Setpoint Range Options

Electric Fan Coil Thermostat

T125-E

Analog Fan Coil Thermostats

T125 Electric Fan Coil Thermostats are designed to control heating, cooling, or air conditioning unit in Commercial, Industrial and Residential Installation.

Typical application includes the control of fan coil units, packaged terminal air conditioners and combination heating and cooling equipment. As part of the system that consists of a two-way or three-way valve and a multi-speed line voltage fan.

Features

- 220 V power supply
- Heating and Cooling mode
- 2-4 pipes configuration
- 3-speed fan override
- 86 x 86 mm room enclosures
- Temperature dial ranges 10...30 °C
- Relay output max. 5A

Electric Fan Coil Thermostat

T5200-E

LCD Digital Fan Coil Thermostats

T5200-E LCD Digital Fan Coil Thermostats are designed to control heating, cooling, or year round air conditioning unit in Commercial, Industrial and Residential Installation. Typical Application includes the control of fan coil units, packaged terminal airconditioners and combination heating and cooling equipment. As part of the system that consists of a two-way or three-way valve and a multi-speed line voltage fan. These aesthetic design thermostat features with Backlit Liquid Crystal Display (LCD); an attractive white color in a compact size complements any decor.

The thermostat does not require any battery backup as setpoint and other parameters are stored in nonvolatile memory.

The intuitive operation makes the thermostat very user-friendly.

Features

- 85...260 VAC power supply
- Heating and Cooling mode
- 2-4 pipes configuration
- 3-speed fan override
- 88 x 88 mm room enclosures
- Setpoint Temperature 10...30 °C
- °C & °F Changeable
- Relay output max. 5A
- Occupancy Mode

Electric Fan Coil Thermostat

T8200

Touch Screen Thermostats

T8200-Txx0-9JS0/9JR0 Touch Screen Thermostats, are designed to control heating and cooling through air conditioning unit in Commercial, Industrial and Residential Installation.

Typical applications include the control of fan coil units, packaged terminal air conditioners and combination of heating and cooling equipment. As part of the system, T8000 controls a two-way or three-way valve and a multi-speed line voltage fan.

T8000 features with large LCD screen display, and displays the status of work mode (cooling / floor, heating / heating / floor, heating & heating / air venting), fan speed, indoor temperature and set temperature etc..

Capacitance touch screen enhances the fluency on operation.

Keypad includes: Power on/off  Mode selection , Fan Speed Selection , Clock/Timer  and two Adjustment buttons  & .

Features

- Touch screen
- Backlit Liquid Crystal Display (LCD)
- 6 Function Keys
- Appearance
- Energy Saving
- Installation, Service and Maintenance

Programmable Networked

TEC2000

Room Thermostats

The TEC2000 series thermostat is a networked small equipment controller providing N2, BACnet® MS/TP and LonWORKS® communicating options. It offers equipment control from a single product: thermostat, controller and temperature sensor.

The TEC series staged controllers can be used with rooftop units (with and without economizers), heat pumps and single- and multi-stage heating/cooling equipment.

The TEC2x45, TEC2x6 and TEC2x7 series controllers are available for commercial and hospitality applications, including cabinet unit heaters, perimeter heating/cooling, zoning and fan coil units.

They provide control of various two- and four-pipe fan coil equipment, have options for one- to three-speeds of fan control and offer additional application flexibility by providing advanced control signals – proportional 0 to 10 VDC, ON/OFF, or floating.

All TEC2000 models have two configurable binary inputs for advanced functions and features over 20 configurable parameters, which enable the thermostat to be customized for any application.

The thermostats features a two-line, eight-character backlit LCD display with status texts in English.

Models with display texts in other languages are available on special requests. For easy programming and commissioning, all controllers are pre-programmed and may be configured directly using the local display and keyboard eliminating the need for separate tools.

Analog Room Controller

TC-8900 - PM-8900

Room Thermostats

TC-8900 is a family of analogue controllers designed for control of fan coils with 2-pipe, 2-pipe with change-over, 2-pipe with electrical coil or 4-pipe configurations.

For applications without fan speed control the family includes stand alone units (TC-890x), local controllers (TC-893x) with remote setpoint module (ES-8930) and local controllers (TC-894x) with central setpoint module (ES-8940).

For applications with fan speed control the family includes the PM-8900 power modules in connection with TC-894x with or without central setpoint module (ES-8940).

Features

- 2-pipe, 2-pipe with change-over, 2-pipe with electrical coil or 4-pipe configurations with and without 3-speed fan override
- 80 x 80 mm room enclosures
- Temperature dial ranges 12...28 °C, +/-
- 24 VAC power supply for the TC-8900 controls, 230 VAC in connection the the PM-8900 power module

Electronic Heating Controller

ER65-DRW

Digital Controller Hot Water and Air Unit

The controller is a digital device for domestic or residential heating units.

It covers water and air heating applications.

All-in-one design allows full flexibility to apply a single controller to many small heating applications.

The controller incorporates a comprehensive energy saving application, and can be connected to a supervisory system via its on board communications port.

Features

- Standard heating systems
- Compact design: up to 3 sensors, 2 digital inputs and 5 outputs in a 4 DIN modules housing
- Robust front panel for durability and long term use
- Removable plug connectors for quick mounting and wiring
- Direct 230V supply: no external transformer required
- Embedded RS485: no additional communication card required
- Pre-set models and selectable options to extend controller options

Dimensions in mm

Ordering Code

Ordering Code	Description
ER65-DRW-501C	Heating controller, sensor not included, compatible with the ER-NTC sensor line, Modbus communication

Electro-Pneumatic Transducers

EP-1110

The EP-1110 is an electric to air pressure transducer designed to convert an electrical input signal into a pressure output with a linear relationship. It is using a force balance with moving coil system.

The input signal 0...+10 V or 0...20 mA is converted to an output signal 0,2...1 bar.

Ordering Codes	Input	Output
EP-1110-7001	0...10 V (DC), $R_i \geq 1 \text{ k}\Omega$, current through coil approx. 10 mA	20-100 kPa, linearly proportional to input
EP-1110-7002	2...10 V (DC), 0...10 V (DC), $R_i \geq 1 \text{ k}\Omega$, current through coil approx. 10 mA	20-100 kPa, 3...100 kPa, linearly proportional to input
EP-1110-7003	0...20 mA (DC), $R_i \leq 450 \Omega$, current through coil approx. 10 mA	20-100 kPa, linearly proportional to input
EP-1110-7004	4...20 V (DC), 0...20 mA (DC), $R_i \leq 450 \Omega$, current through coil approx. 10 mA	20-100 kPa, 3...100 kPa, linearly proportional to input

HVAC CONTROL PRODUCTS Pneumatic and Transducers

Electro-Pneumatic Transducers

EP-2000

The EP-2000 electro-pneumatic transducer with motor drive is used for converting an electrical contact signal into a 0.2 to 1.0 bar pneumatic standard signal.

The instrument is suitable for connection of electrical incremental controllers with pneumatic devices or for electrical remote adjustment of the set point of pneumatic controllers.

A reversible synchronous motor drives a cam disk over a gear box. The direction of travel of the cam disk is transformed by a leaf spring into a change of force, which by a pneumatic force comparison system is converted into a control pressure change.

On models with position transmitter a potentiometer is installed for electrical position feed back.

Features

- High linearity
- Low hysteresis
- high accuracy
- Small supply air influence
- Small air consumption
- High air capacity

Ordering Codes	Limit switch and 2 k Ω feedback potentiometer	Accessories	Voltage Supply (50/60 Hz)
EP-2000-7001	120 seconds	None	230 V

EP-2000-7024			24 V

HVAC CONTROL PRODUCTS

Pneumatic and Transducers

Electro-Pneumatic Transducers

EP-8000

EP-8000 series electro-pneumatic transducers convert a voltage or current signal from an electronic controller into a pneumatic output pressure signal. An increase or decrease in the input signal proportionally increases or decreases (respectively) the output pressure signal from the EP-8000.

It is designed to output a proportional pneumatic control signal in response to an electronic control signal. All units feature barbed air connections for 5/32 or 1/4 inch O.D. polytubing.

Sequencing of pneumatic valve or damper actuators can be accomplished using a Johnson Controls V-9502 (valve) or D-9502 (damper) actuator positioner.

Four models are available, which are grouped into two basic versions: low volume output units (nonrelay) and high volume output units (relay).

Features

- Compact, simple design
- Choice of 0 to 10 VDC or 4 to 20 mA input range
- Hypodermic needle test point
- Factory set, fully adjustable zero and span
- High accuracy with low hysteresis

Dimensions in mm

Ordering Codes	Output	Input Range	Factory Output Range kPa (psig)
EP-8000-1	Low volume (non-relay)	0.5...9 VDC	7...126 (1-18)
EP-8000-2	High volume (relay)	0.25...9.5 VDC	3.5...133 (0.5-19)
EP-8000-3	Low volume (non-relay)	4...20 mADC	21...105 (3-15)
EP-8000-4	High volume (relay)	4...20 mADC	21...105 (3-15)

Metasys®

ADS-Lite

Application and Data Server-Lite

The Application and Data Server (ADS) Lite is an optional component of the Metasys system that manages the collection and presentation of large amounts of trend data, event messages, operator transactions, and system configuration data. As Site Director, the ADS-Lite provides secure communication to a network of Network Automation Engine (NAE) 35s, NAE45s, Network Control Engines (NCEs), and Network Integration Engines (NIEs). The ADS-Lite is available for purchase and use in Europe, Africa, and Latin America. For more information on the NIE29, NIE39, and NIE49, contact Johnson Controls® Systems Integration Services (SIS).

The Site Management Portal UI of the ADS-Lite provides flexible system navigation, user graphics, comprehensive alarm management, trend analysis, and summary reporting capabilities. With the Site Management Portal UI, you can efficiently manage occupant comfort and energy usage, quickly respond to critical events, and optimize control strategies. The ADS-Lite includes an Open Database Connectivity (ODBC) compliant database package for secure storage of historical and configuration data.

An optional interface called the Ready Access Portal UI provides an intuitive, task-based user experience designed for building tenants and other specialized users.

The Ready Access Portal UI is in the exit phase of its product life cycle. Ready Access Portal functionality will be available in the new mobile optimized Metasys UI.

The Metasys system can communicate with cloud-based applications easily and securely. To make this connection, the Metasys system requires minor programming and setup by Johnson Controls.

When you are connected, you can access multiple cloud-base applications and features. To learn more, please visit the Building Management page located on the Johnson Controls website.

Note: In this document, the term engine refers to all supported NAE35s, NAE45s, NCEs, and NIE, unless otherwise noted.

The ADS-Lite supports up to five engines in any combinations of NAE35, NAE45, NCE, or NIE29/39/49

Features

- Support of IT Standards and Internet Technologies
- Secure User Access
- Flexible System Navigation and Dynamic User Graphics
- Alarm and Event Management
- Long-Term Trend Data Storage

The following table lists by operating system the Microsoft® SQL Server® software editions that have been fully qualified by Johnson Controls for Release 7.0. You can select other combinations, but we recommend that you select from the following pairings.

Recommended Operating System and SQL Server Combinations

Operating System	Database Software			
	SQL Server 2014 Express (64-bit)	SQL Server 2012 Express SP2 (64-bit)	SQL Server 2008 Express R2 SP2 (64-bit)	SQL Server 2008 Express R2 SP2 (32-bit)
Windows® 8.1 Pro and Windows 8.1 Enterprise (64-bit)	•	•	•	---
Windows 8 Pro and Windows 8 Enterprise (64-bit)	•	•	•	---
Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (64-bit)	•	•	•	---
Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (32-bit)	---	---	---	•

Note

To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative package 3 (KB2984923) for SQL Server 2014.

To download the update package, visit <http://support.microsoft.com/kb/2984923/>.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys® ADS-Lite

Application and Data Server-Lite System Requirements (5 Users)

Recommended Computer Platform ¹	Intel Core I7 processor, 4 th generation or later 2 x 320 GB hard disk (RAID 1) ² with 40 GB free space after installation of all prerequisite software and before installation of ADS-Lite software. Configure RAID 1 (mirroring) with disk write-caching turned on. DVD drive Graphics card (1 GB RAM, ATI® Technologies or NVIDIA® Corporation, 64-bit compatible [for 64-bit operating systems], Small Form Factor [SFF] if required) ³
Recommended Memory ⁴	4 GB RAM (32-bit systems) 8 to 16 GB RAM (64-bit systems)
Supported Operating Systems ⁵ and Database Software	Windows® 8.1 Pro and Windows 8.1 Enterprise Editions (64-bit) Supports Microsoft SQL Server® 2014 Express (64-bit) ⁶ , Microsoft SQL Server 2012 Express with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (64-bit)
	Windows 8 Pro and Windows 8 Enterprise Editions (64-bit) Supports Microsoft SQL Server® 2014 Express (64-bit) ⁵ , Microsoft SQL Server 2012 Express with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (64-bit)
	Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (32-bit or 64-bit) Supports Microsoft SQL Server 2014 Express (32-bit or 64-bit) ⁵ , Microsoft SQL Server 2012 Express with SP2 (32-bit or 64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (32-bit or 64-bit) Note: The OS and software must both be 32-bit or 64-bit.
Supported Operating Systems for Metasys Site Management Portal Client Computer	Windows 8.1 Pro or Windows 8.1 Enterprise Windows 8 Pro or Windows 8 Enterprise Windows 7 Professional, Enterprise, or Ultimate Edition with SP1 (32-bit or 64-bit) Windows XP® Professional with SP3 Apple® OS X® 10.9 Mavericks Apple OS X 10.8 Mountain Lion Note: In OS X, you cannot view Graphics in the Site Management Portal UI. Note: Windows XP and Apple operating systems are supported for Metasys client computers only.

Application and Data Server-Lite System Requirements (5 Users)

Supported Web Browser Software for Metasys Site Management Portal Client Computers	Windows Internet Explorer® version 8, 9, 10, and 11 Note: In Internet Explorer 11, select the Use Microsoft compatibility lists option, found under Tools > Compatibility View Settings, to ensure that websites appear and function correctly. Apple Safari® version 6.0.5 and 7.0 Other browsers, such as Google® Chrome® and Mozilla® Firefox®, may also be used but are not fully supported. Note: You use the web browser to download the Launcher application. After you install the Launcher application, you use the Launcher, not the web browser, to log in to the Site Management Portal (SMP) user interface.	
Supported Virtual Environments	Microsoft Hyper-V™, VMware®	
Supported User Interfaces	Site Management Portal (SMP) Metasys UI Ready Access Portal	
Additional Software Included with the ADS	CCT software	Launcher software
	Export Utility software	Microsoft SQL Server 2012 Express software with SP2 (64-bit)
	Metasys Database Manager software	Microsoft SQL Server 2008 R2 Express software with SP2 (32-bit and 64-bit)
	Ready Access Portal software	Microsoft .NET Framework Version 3.5 SP1
	SCT software	Metasys UI6
Optional Hardware	Any network or local printer supported by the qualified Windows operating system	
Optional Software	Graphic Generation Tool	

Note

- Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable. Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information regarding computer/server recommendations.
- For best performance, use Serial Attached SCSI (SAS) hard drives, not small Computer System Interface (SCSI) hard drives.
- For improved performance only when ADS and Ready Access Portal share the same computer.
- Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for specific Microsoft Windows operating system settings that may be required for your Metasys system configuration.
- To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative update package 3 (KB2984923) for SQL Server 2014. To download the update package, visit <http://support.microsoft.com/kb/2984923/>.
- For more information on the Metasys UI, refer to the Metasys UI Installation Instructions (LIT-12011952)

Metasys®

ADX - ADS

Application and Data Server

The Application and Data Server (ADS) and Extended Application and Data Server (ADX) are optional components of the Metasys system that manage the collection and presentation of large amounts of trend data, event messages, operator transactions, and system configuration data. The ADS is an entry-level server that runs on personal computers and supports up to 5 users. The ADX is a larger scale system that runs on a server operating system to provide extended historical archiving and reporting capabilities. The ADX is offered in several models to support up to 10, 25, 50, or 100 users. As Site Director, the ADS/ADX provides secure communication to a network of Network Automation Engines (NAEs), Network Control Engines (NCEs), and Network Integration Engines (NIEs).

The Site Management Portal UI of the ADS/ADX provides flexible system navigation, user graphics, comprehensive alarm management, trend analysis, and summary reporting capabilities. With the Site Management Portal UI, you can efficiently manage occupant comfort and energy usage, quickly respond to critical events, and optimize control strategies. The ADS/ADX includes an Open Database Connectivity (ODBC) compliant database package for secure storage of historical and configuration data.

The new Metasys UI is designed to enhance our customers' productivity and effectiveness. It allows users to navigate by space to view summaries, trends, and activities, emulating the way they work every day. The new user interface is also optimized for all devices, enabling our customers to work smarter from any device and any location. This release is the first in a series of enhancements that will consolidate existing Metasys user interface products into a single, dramatically improved experience that is accessible from any device. The ADS and ADX support virtual environments, including VMware® and Microsoft® Hyper-V™. Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information.

The Metasys system can communicate with cloud-based applications easily and securely. To make this connection, the Metasys system requires minor programming and setup by Johnson Controls. When you are connected, you can access multiple cloud-based applications and features. To learn more, please visit the Building Management page located on the Johnson Controls website. For the ADX, the Metasys Advanced Reporting System and Energy Essentials report on system configuration performance, energy usage, demand and cost.

Note

In this document, the term network engine refers to NAEs, NCEs and NIEs, unless otherwise noted.

Refer to the ADS Product Bulletin (LIT-1201525) for important product application information.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Features

- Support of IT Standards and Internet Technologies
- Secure User Access
- Flexible System Navigation and Dynamic User Graphics
- Alarm and Event Management
- Long-Term Trend Data Storage
- Optional Metasys Advanced Reporting System and Energy Essentials

Applications

Use an ADS when:

- The number of network engines becomes larger than a single network engine can handle efficiently as Site Director.
 - Long-term historical data storage needs exceed the capacity of a typical network engine.
 - The number of simultaneous users logging in exceeds the capacity of a single network engine.
- The ADS supports up to 5 simultaneous users, and up to 10 to 14 NxE engines.

Refer to the Metasys System Configuration Guide (LIT-12011832).

Use an ADX when:

- The Metasys Advanced Reporting System, Energy Essentials, or the Metasys for Validated Environments (MVE), Extended Architecture application is required
 - You need to support more than 5 simultaneous users. The ADX supports up to 10, 25, 50, or 100 users, and up to 1,000 NxE engines.
- Refer to the Metasys System Configuration Guide (LIT-12011832).
- Any one of your data storage or access requirements is not met by an ADS.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys® ADX - ADS

Ordering Information

For complete ordering information, refer to the Metasys System Software Purchase Options Product Bulletin (LIT-12011703).

ADS/ADX Ordering Information for New or Upgrade Software

New Software Ordering Codes	Product Description	Upgrade Software Product Code Number	Migration Software Product Code Number
MS-ADS05U-0	Application and Data Server For up to 5 users	MS-ADS05U-6	MS-ADS05U-8
MS-ADX10U-0	Extended Application and Data Server For up to 10 users	MS-ADX10U-6	MS-ADX10U-8
MS-ADX10SQL-0	Extended Application and Data Server For up to 10 users Includes Microsoft® SQL Server® 2012 software with core license	MS-ADX10SQL-6	MS-ADX10U-8
MS-ADXSWO-0	Extended Application and Data Server For up to 25 users	MS-ADXSWO-6	MS-ADXSWO-8
MS-ADXSWOSQL-0	Extended Application and Data Server For up to 25 users Includes Microsoft SQL Server 2012 software with core license	MS-ADXSWOSQL-6	MS-ADXSWOSQL-8
MS-ADX50U-0	Extended Application and Data Server For up to 50 users	MS-ADX50U-6	MS-ADX50U-8
MS-ADX50SQL2-0	Extended Application and Data Server For up to 50 users For use on server with dual processors or 8 cores ¹ Includes Microsoft SQL Server 2012 software with core license	MS-ADX50SQL2-6	MS-ADX50SQL2-8
MS-ADX50SQL-0	Extended Application and Data Server For up to 50 users For use on server with single processor or 4 cores Includes Microsoft SQL Server 2012 software with core license	MS-ADX50SQL-6	MS-ADS50SQL-8
MS-ADX100U-0	Extended Application and Data Server For up to 100 users	MS-ADX100U-6	MS-ADX100U-8
MS-ADX100SQL2-0	Extended Application and Data Server For up to 100 users For use on server with dual processors or 8 cores ¹ Includes Microsoft SQL Server 2012 software with core license	MS-ADX100SQL2-6	MS-ADX100SQL2-8

Note

¹ Servers with dual processors or 8 cores are recommended for ADX 50 user and 100 user software.

Metasys® ADX - ADS

Technical Specifications

Application and Data Server (ADS) System Requirements (5 Users)

Recommended Computer Platform ¹	3.4 GHz Intel® Core™ Quad processor 2 x 500 GB hard disk (RAID 1) ² with 40 GB free space after installation of all prerequisite software and before installation of ADS software. Configure RAID 1 (mirroring) with disk write-caching turned on. DVD drive Note: Prerequisite software includes the supported operating system, database software, .NET Framework, and any other software or service packs required for your ADS configuration.	
	Graphics card (1 GB RAM, ATI® Technologies or NVIDIA® Corporation, 64-bit compatible [for 64-bit operating systems], Small Form Factor [SFF] if required) ³	
Recommended Memory ⁴	8 to 16 GB RAM (64-bit systems) 4 GB RAM (32-bit systems)	
Supported Operating Systems ⁵ and Database Software	Windows® 8.1 Pro and Windows 8.1 Enterprise Editions (64-bit) Supports Microsoft SQL Server® 2014 Express (64-bit) ⁶ , Microsoft SQL Server 2012 Express with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (64-bit) Windows 8 Pro and Windows 8 Enterprise Editions (64-bit) Supports Microsoft SQL Server® 2014 Express (64-bit) ⁶ , Microsoft SQL Server 2012 Express with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (64-bit) Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (32-bit or 64-bit) Supports Microsoft SQL Server 2014 Express (32-bit or 64-bit) ⁶ , Microsoft SQL Server 2012 Express with SP2 (32-bit or 64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (32-bit or 64-bit) Note: The OS and software must both be 32-bit or 64-bit.	
Supported Virtual Environments	Microsoft Hyper-V™, VMware®	
Supported User Interfaces	Site Management Portal (SMP) Metasys UI Ready Access Portal	
Additional Software Included with the ADS	CCT software	Launcher software
	Export Utility software	Microsoft SQL Server 2012 Express software with SP2 (64-bit)
	Metasys Database Manager software	Microsoft SQL Server 2008 R2 Express software with SP2 (32-bit and 64-bit)
	SCT software	Microsoft .NET Framework Version 3.5 SP1
Optional Hardware	Any network or local printer supported by the qualified Windows operating system	
Optional Software	Graphic Generation Tool	

Note

- Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable. Refer to the *Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279)* for more information regarding computer/server recommendations.
- For best performance, use Serial Attached SCSI (SAS) hard drives, not Small Computer System Interface (SCSI) hard drives.
- For improved performance in configurations where ADS and Ready Access Portal share the same computer.
- For best performance, use the maximum amount of memory that the computer allows.
- Refer to the *Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279)* for specific Microsoft Windows operating system settings that may be required for your Metasys system configuration.
- To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative update package 3 (KB2984923) for SQL Server 2014. To download the update package, visit <http://support.microsoft.com/kb/2984923/>.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys® ADX - ADS

Extended Application and Data Server System Requirements (Unified ADX Systems, 10 or 25 Users)

Recommended Server Platform ¹	2.20 GHz E5 Series Intel Xeon® Quad Core single processor or better 2 x 600 GB hard disk (RAID 1) ² with 40 GB free space after installation of all prerequisite software and before installation of ADS software. Configure RAID 1 (mirroring) with disk write-caching turned on. DVD drive Note: ADX prerequisite software includes the Windows operating system, SQL Server software, Windows .NET Framework, and any other software or SPs required by your ADX configuration.	
Recommended Memory ³	16 GB RAM (10 or 25 user ADX)	
Supported Operating Systems ⁴ and Database Software	Windows Server® 2012 R2 (64-bit) ⁵ Supports Microsoft SQL Server 2014 (64-bit) ⁶ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2012 (64-bit) ⁵ Supports Microsoft SQL Server 2014 (64-bit) ⁶ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2008 R2 with SP1 (64-bit) ⁷ Supports Microsoft SQL Server 2014 (64-bit) ⁶ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2008 with SP2 (32-bit) ⁷ Supports Microsoft SQL Server 2008 R2 with SP2 (32-bit) Note: A 32-bit operating system only supports a maximum of 4 GB memory. For best performance, use a 64-bit operating system.	
Supported Virtual Environments	Microsoft Hyper-V™, VMware®	
Supported User Interfaces	Site Management Portal (SMP) Metasys UI Ready Access Portal	
Additional Software Included with the ADX	CCT software	Microsoft SQL Server 2012 software with SP2 (64-bit) ⁸
	Export Utility software	SCT software
	Metasys Database Manager software	Microsoft .NET Framework Version 3.5 SP1
	Launcher software	
	Note: The Metasys Advanced Reporting System requires an ADX. The SCT computer must be online and accessible to the ADX at all times.	
Optional Hardware	Any network or local printer supported by the qualified Windows operating system	
Optional Software	Energy Essentials Graphic Generation Tool	

Note

- Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable.
Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information regarding computer/server recommendations.
- For best performance, use SAS hard drives (not SATA hard drives) that use RAID controllers with write caching enabled.
- For best performance, use the maximum amount of memory. An ADX with 16 GB RAM has much greater performance than an ADX with only 4 GB RAM.
A 32-bit operating system does not support more than 4 GB of RAM.
- Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for specific Microsoft Windows operating system settings that may be required for your Metasys system configuration.
- For SQL Server 2014 software or SQL Server 2012 software, you must purchase a SQL Server software license for each individual processor core (with a minimum of four core licenses). For example, if you have a single processor with dual cores, purchase four core licenses (the minimum) for SQL Server 2014 software or SQL Server 2012 software.
- To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative update package 3 (KB2984923) for SQL Server 2014.
To download the update package, visit <http://support.microsoft.com/kb/2984923/>.
- For SQL Server 2008 R2 software, you must purchase a SQL Server software license for each individual processor you have. You do not need to purchase multiple licenses if you have a single processor divided into multiple cores. For example, if you have a single processor with dual cores, purchase one license for SQL Server software.
- SQL Server software is only included with the MS-ADX10SQL product.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys® ADX - ADS

Extended Application and Data Server System Requirements (Unified ADX Systems, 50 or 100 Users)

Recommended Server Platform ¹	Two processors: 2.20 GHz Intel Xeon® Dual Processors with a minimum of 4 cores each 6 x 300 GB 15,000 RPM hard disk (RAID 5) ² with 50 GB free space after installation of all prerequisite software and before installation of ADS software. Configure RAID 5 with disk write-caching turned on. RAID Controller-PERC H710 with 512 NV Cache DVD drive Note: ADX prerequisite software includes the Windows operating system, SQL Server software, Windows .NET Framework, and any other software or SPs required by your ADX configuration.	
Recommended Memory	32 GB RAM	
Supported Operating Systems ³ and Database Software	Windows Server® 2012 R2 (64-bit) ⁴ Supports Microsoft SQL Server 2014 (64-bit) ⁶ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2012 (64-bit) ⁴ Supports Microsoft SQL Server 2014 (64-bit) ⁶ Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2008 R2 with SP1 (64-bit) ⁵ Supports Microsoft SQL Server 2014 (64-bit) ⁶ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
Supported Virtual Environments	Microsoft Hyper-V™, VMware®	
Supported User Interfaces	Site Management Portal (SMP) Metasys UI Ready Access Portal	
Additional Software Included with the ADX	CCT software	Microsoft SQL Server 2012 software with SP2 (64-bit) ⁷
	Export Utility software	Microsoft .NET Framework Version 3.5 SP1
	Metasys Database Manager software	SCT software
	Launcher software	
	Note: The Metasys Advanced Reporting System requires an ADX. The SCT computer must be online and accessible to the ADX at all times.	
Optional Hardware	Any network or local printer supported by the qualified Windows operating system	
Optional Software	Energy Essentials Graphic Generation Tool	

Note

- Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable.
Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information regarding computer/server recommendations.
- For best performance, use SAS hard drives (not SATA hard drives) that use RAID controllers with write caching enabled.
- Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for specific Microsoft Windows operating system settings that may be required for your Metasys® system configuration.
- For SQL Server 2014 software or SQL Server 2012 software, you must purchase a SQL Server software license for each individual processor core (with a minimum of four core licenses). For example, if you have a single processor with dual cores, purchase four core licenses (the minimum) for SQL Server 2014 software or SQL Server 2012 software.
- For SQL Server 2008 R2 software, you must purchase a SQL Server software license for each individual processor you have. You do not need to purchase multiple licenses if you have a single processor divided into multiple cores. For example, if you have a single processor with dual cores, purchase one license for SQL Server software.
- To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative update package 3 (KB2984923) for SQL Server 2014.
To download the update package, visit <http://support.microsoft.com/kb/2984923/>.
- SQL Server software is only included with the MS-ADX50SQL product.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys® ADX - ADS

Extended Application and Data Server System Requirements (Split ADX Systems, 10 or 25 Users)

Recommended Server Platform ¹	Web/Application Server 2.20 GHz E5 Series Intel Xeon® Quad Core single processor or better. 2 x 600 GB hard disk (RAID 1) ² with 40 GB free space after installation of all prerequisite software ⁴ and before installation of ADS software. Configure RAID 1 (mirroring) with disk write-caching turned on. DVD drive Note: Metasys UI must reside on the ADX web/application server.	
	Database Server 2.20 GHz E5 Series Intel Xeon® Quad Core single processor or better. 2 x 600 GB hard disk (RAID 1) with 40 GB free space after installation of all prerequisite software ⁴ and before installation of ADS software. Configure RAID 1 (mirroring) with disk write-caching turned on. DVD drive	
	SCT Computer In a split configuration, you cannot install SCT or Ready Access Portal software on either the ADX web/application server computer or the ADX database server computer. <i>Refer to the System Configuration Tool Catalog Page (LIT-1900198) for current SCT computer requirements.</i>	
Recommended Memory ³	16 GB RAM (web/application server and database server for 10 or 25 user ADX)	
Supported Operating Systems ^{5,6} with Supported Database Software	Windows Server® 2012 R2 (64-bit) ⁷ Supports Microsoft SQL Server 2014 (64-bit) ⁹ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2012 (64-bit) ⁷ Supports Microsoft SQL Server 2014 (64-bit) ⁹ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2008 R2 with SP1 (64-bit) ⁸ Supports Microsoft SQL Server 2014 (64-bit) ⁹ , Microsoft SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 with SP2 (64-bit)	
	Windows Server 2008 with SP2 (32-bit) ⁸ Supports Microsoft SQL Server 2008 R2 with SP2 (32-bit) Note: A 32-bit operating system only supports a maximum of 4 GB memory. For best performance, use a 64-bit operating system.	
Supported Virtual Environments	Microsoft Hyper-V™, VMware®	
Supported User Interfaces	Site Management Portal (SMP) Metasys UI Ready Access Portal	
Additional Software Included with the ADX	CCT software	Microsoft SQL Server 2012 software with SP2 (64-bit) ¹⁰
	Export Utility software	Microsoft .NET Framework Version 3.5 SP1
	Metasys Database Manager software	SCT software
	Launcher software	
	Note: The Metasys Advanced Reporting System requires an ADX. The SCT computer must be online and accessible to the ADX at all times.	
Optional Hardware	Any network or local printer supported by the qualified Windows operating system	
Optional Software	Energy Essentials Graphic Generation Tool	

Note

- Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable. Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information regarding computer/server recommendations.
- For best performance, use SAS hard drives (not SATA hard drives) that use RAID controllers with write caching enabled.
- For best performance, use the maximum amount of memory. An ADX with 16 GB RAM has much greater performance than an ADX with only 4 GB RAM. Also, a 32-bit operating system only supports a maximum of 4 GB of RAM.
- ADX prerequisite software includes the Windows operating system and SQL Server software, Windows .NET Framework, and any other software or service packs required for your ADX configuration.
- The web/application and database servers must have the same operating system installed.
- Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for specific Microsoft Windows operating system settings that may be required for your Metasys system configuration.
- For SQL Server 2014 software or SQL Server 2012 software, you must purchase a SQL Server software license for each individual processor core (with a minimum of four core licenses). For example, if you have a single processor with dual cores, purchase four core licenses (the minimum) for SQL Server 2014 software or SQL Server 2012 software.
- For SQL Server 2008 R2 software, you must purchase a SQL Server software license for each individual processor you have. You do not need to purchase multiple licenses if you have a single processor divided into multiple cores. For example, if you have a single processor with dual cores, purchase one license for SQL Server software.
- To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative update package 3 (KB2984923) for SQL Server 2014. To download the update package, visit <http://support.microsoft.com/kb/2984923/>.
- SQL Server software is only included with the MS-ADX10SQL product.

Note

- Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable.
Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information regarding computer/server recommendations.
- For best performance, use SAS hard drives (not SATA hard drives) that use RAID controllers with write caching enabled.
- For best performance, use the maximum amount of memory. An ADX with 32 GB RAM has much greater performance than an ADX with only 16 GB RAM.
A 32-bit operating system does not support more than 4 GB of RAM.
- ADX prerequisite software includes the Windows operating system and SQL Server software, Windows .NET Framework, and any other software or service packs required for your ADX configuration.
- The web/application and database servers must have the same operating system installed.
- Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for specific Microsoft Windows operating system settings that may be required for your Metasys system configuration.*
- For SQL Server 2014 software or SQL Server 2012 software, you must purchase a SQL Server software license for each individual processor core (with a minimum of four core licenses). For example, if you have a single processor with dual cores, purchase four core licenses (the minimum) for SQL Server 2014 software or SQL Server 2012 software.
- For SQL Server 2008 R2 software, you must purchase a SQL Server software license for each individual processor you have. You do not need to purchase multiple licenses if you have a single processor divided into multiple cores. For example, if you have a single processor with dual cores, purchase one license for SQL Server software.
- To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative update package 3 (KB2984923) for SQL Server 2014.
To download the update package, visit <http://support.microsoft.com/kb/2984923/>.
- SQL Server software is only included with the MS-ADX50SQL product.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys®

GGT - Graphic Generator Tool

Graphics+ Feature

Graphics+ is a data visualization software package designed for Metasys system customers who are looking for a quick way to create interactive building data representations, thus empowering them to visualize, analyze, and respond to problems faster. The Graphics+ software package comprises two components: the Graphic Generation Tool (GGT) and the Graphics+ Viewer.

The Graphic Generation Tool is a simple yet powerful diagramming tool that helps designers create compelling representations of their building equipment and floor plans and bind them to Metasys data objects. The tool includes an extensive library of pre-built symbols and templates, shortcut keys, and right-click functions, giving designers the ability to assemble graphics faster. The tool also provides flexibility to create customized graphics using a rich set of effects known as behaviors. Behaviors allow users to command, navigate, change color, apply flash, set visibility, and display a context menu for bound Metasys objects. You can save these graphics directly to a supported Metasys Host, such as a Site Director or a System Configuration Tool (SCT) archive database.

With the GGT, you can easily create a graphic of status summaries for each monitored system or space (for example, building, floor, or floor group). The graphic uses color to summarize the overall condition of monitored points. In one quick glance, you can view the number of warnings, alarms, or offline items across your entire facility or campus. By clicking any one of these spaces or systems, you can see a detailed view of the monitored equipment. You can also open historical data for any trended point within the graphic using the Trend Module. The Trend Module can show trend data for up to four points at once for system diagnosis and comparison purposes. Additionally, using the predefined set of gauges, you can create an energy dashboard graphic that quickly conveys the current state of energy savings in your facility. The Graphics+ Viewer is integrated with the Site Management Portal (SMP), SCT, and Ready Access Portal, allowing users to show, command, or update in real time all the data linked objects that were created in the GGT. The graphical display gives you a three-dimensional view of your facility, offering an intuitive way to manage the daily events of your buildings or campus.

Refer to the Graphics+ Feature Product Bulletin (LIT-12011698) for important product application information.

Features

- Thermographic Display of Temperature Conditions of a Floor
- Easy and Consistent Access to Room Information
- Summary Data of Multiple Buildings in a Single Graphical View with Navigational Aids
- Ability to Quickly and Easily Switch from Tabular to Graphical Views
- Stand-Alone Graphic Generation Tool
- Extensive Library of Prebuilt Dynamic Symbols and Templates
- Dynamic Symbol Capabilities, Including Commanding, Flashing, Changing Color, Showing and Hiding Elements, Navigation, and Context Menus, for Enhanced User Experience
- HVAC Library Elements Pre-Populated with Aliased Binding Strings
- Historical Trend Information Available Directly within a Graphic
- Computer Aided Drafting (CAD) File Import Capability
- Right-Click Functions, Short-Cut Keys, and User-Configurable Symbols Properties
- Comprehensive Representation of Facility Support Systems
- Multiple Language Support
- Optimal Graphics Display Performance

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys®

GGT - Graphic Generator Tool

Technical Specifications

System Requirements

Product	MS-GGT-0 (new Graphic Generation Tool software) MS-GGT-6 (upgrade Graphic Generation Tool software)
Recommended Computer Platform ¹	Intel® Core™ 2 Duo E6700 or better (Intel Core 2 Duo E4300 minimum) 100 MB recommended free hard disk space available DVD drive
Memory	4 GB RAM recommended (2 GB RAM minimum)

Graphic Generation Tool System Requirements

Operating System	Windows® 8.1 and Windows 8.1 Enterprise Editions (64-bit) Windows 8 and Windows 8 Enterprise Editions (64-bit) Windows 7 Professional, Enterprise, or Ultimate Editions with SP1 (32-bit and 64-bit) Windows Server 2012 R2 (64-bit) Windows Server 2012 (64-bit) Windows Server 2008 R2 with SP1 (64-bit) Windows Server 2008 with SP2 (32-bit)
Other Software	Microsoft .NET Framework 4.0 (required for creating Graphics+ graphics; included on the GGT product disk) Note: We recommend you install the full version of Microsoft .NET Framework 4.0.
Communication	Ethernet network interface card 10/100/1,000 Mbps (100 Mbps network recommended) Note: We recommend a wired connection. Wireless 802.11 connection.

Note

- 1** Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable.
Refer to the *Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279)* for more information regarding computer/server recommendations.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys®

GGT - Graphic Generator Tool

Graphics+ Viewer System Requirements

Product	Graphics+ Viewer built into Site Management Portal UI, SCT UI, and Ready Access Portal UI
Recommended Computer Platform ^{1,2}	Intel Core™ 2 Duo E6700 or better (Intel Core 2 Duo E4300 minimum)
Memory	4 GB RAM recommended (2 GB RAM minimum)
Operating System	Windows® 8.1 and Windows 8.1 Enterprise Editions (64-bit) Windows 8 and Windows 8 Enterprise Editions (64-bit) Windows 7 Professional, Enterprise, or Ultimate Editions with SP1 (32-bit and 64-bit) Windows Server 2012 R2 (64-bit) Windows Server 2012 (64-bit) Windows Server 2008 R2 with SP1 (64-bit) Windows Server 2008 with SP2 (32-bit) Apple® OS X® 10.8 Mountain Lion Apple OS X 10.9 Mavericks Note: Apple operating systems are supported for Metasys client computers only. Note: In OS X, you cannot view Graphics+ graphics in the Site Management Portal UI.
Other Software	Windows Internet Explorer® Version 8, 9, 10, or 11 Note: In Internet Explorer 11, select the Use Microsoft compatibility lists option, found under Tools > Compatibility View Settings, to ensure that websites appear and function correctly. Microsoft Silverlight 5.0 or higher (available as a free download from Microsoft Corporation.) Apple® Safari version 6.0.5 and 7.0 (Other browsers, such as Google® Chrome and Mozilla Firefox, may also be used but are not fully supported.)
Communication	Ethernet network interface card 10/100/1,000 Mbps (100 Mbps network recommended) Note: We recommend a wired connection. Wireless 802.11 connection.

Note

- 1 For large graphics, rendering the image is CPU intensive. In general, a higher performing CPU with multiple cores is recommended.
- 2 Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable.
Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information regarding computer/server recommendations.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys®

MEU

Metasys Export Utility

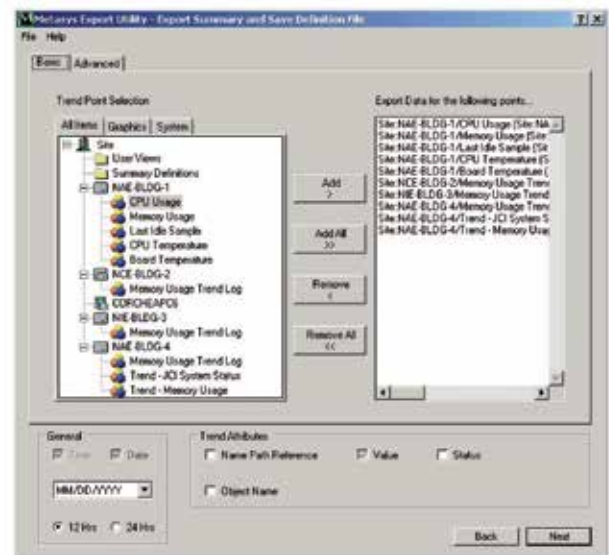

The Metasys system Export Utility makes it easy for a facility manager to efficiently manage daily operations. The Export Utility extracts historical trend, alarm, and audit data from the system and presents the historical data in a variety of formats. Using these flexible formats, in programs such as Microsoft® Excel® and Access®, you can easily sort, compare, and archive data in spreadsheets and databases.

Export Utility is a valuable tool for effective historical data analysis. You can determine how to use the data to perform time studies and root cause analyses of system changes and mechanical equipment failure.

The scheduling capability of Export Utility allows you to extract the selected data immediately, or to schedule an extraction at a convenient time or interval.

When the base set of reports provided with Export Utility is insufficient, functionality is included that allows you to create a program to customize reports that fit your needs.

Refer to the *Metasys Export Utility Product Bulletin (LIT-1201800)* for important product application information.

Export Utility User Interface

Features

- Historical Data Retrieval
- Flexible Filtering of Historical Data
- Scheduled Collection of Historical Data
- Versatile Report Capabilities
- Custom Reporting
- Dynamic Link Library (DLL) Examples
- Historical Data Backup

Export Utility DLL Example File

Technical Specifications

Export Utility System Requirements

Product Code	MS-EXPORT-0, MS-EXPORT-6
Recommended Computer/Server Platform ¹	Intel® Core™ 2 Duo E6700 or better (Intel Core 2 Duo E4300 minimum) 20 GB free hard disk space available (600 MB minimum) DVD drive When Export Utility is installed on an Application and Data Server/Extended Application and Data Server (ADS/ADX) or Open Data Server (ODS), follow the requirements for an ADS/ADX or ODS. <i>Refer to the Application and Data Server (ADS/ADX) Product Bulletin (LIT-1201525), the Application and Data Server (ADS) Lite Product Bulletin (LIT-12011690 or the Open Data Server Product Bulletin (LIT-12011943).</i>
Recommended Memory ¹	Computer Platforms: 2 GB RAM (1 GB RAM minimum) Server Platforms: 4 GB RAM (2 GB RAM minimum)
Supported Operating Systems	Windows® 8.1 Pro and Windows 8.1 Enterprise Editions (64-bit) Windows 8 Pro and Windows 8 Enterprise Editions (64-bit) Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (64-bit) Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (32-bit) Windows Server 2012 R2 Windows Server 2012 Windows Server 2008 R2 with SP1 Windows Server 2008 with SP2
Additional Software Included on the Product Disks	Microsoft .NET Framework version 3.5 SP1 or version 4.0 For steps on installing .NET Framework version 3.5 SP1, refer to the ADS, ADX, and SCT Installation and Upgrade Instructions Wizard Content (LIT-12011331) or the ADS-Lite Installation and Upgrade Instructions Wizard Content (LIT-12011688). Note: The Windows 8.1, Windows 8, Windows 7, Windows Server 2012 R2, Windows Server 2012, and Windows Server 2008 R2 operating systems include Microsoft .NET Framework version 3.5/3.5.1. These applications are built into the operating system (no separate software installation is necessary). We recommend you also install Microsoft.NET Framework version 4.5 if you are using Windows 8.1, Windows 8, Windows Server 2012 R2, or Windows Server 2012.
Additional Requirements (Order Separately)	Microsoft Office Professional 2013, Microsoft Office Enterprise 365, Microsoft Office Professional 2010, or Microsoft Office Professional 2007 software to generate reports. Note: To extract data to Microsoft Excel or Microsoft Access software, you must have the respective software installed on the computer running Export Utility. Note: Export Utility can extract data to 32-bit and 64-bit versions of Microsoft Office. However, the DLL file and example files used to create custom reports are compatible only with 32-bit versions of Microsoft Office. Microsoft Office Professional 2013 and Microsoft Office 2010 do not support custom DLL files.

Note

- 1** Our computer platform and memory recommendations are not meant to imply that older or slower machines are not usable.
Refer to the Network and IT Guidance for the BAS Professional Technical Bulletin (LIT-12011279) for more information regarding computer/server recommendations.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys®

SCT

System Configuration Tool

The System Configuration Tool (SCT) supports the engineering, installation, and commissioning of your building automation system.

The SCT application enables offline generation of the complete site and user interface creation of the system, including point naming; schedule trend log definition; integration of N1, N2, BACnet®, and LONWORKS® networks; integration of Modbus, M-Bus, and KNX third-party protocols; integration of local and remote Master-Slave/Token-Passing (MS/TP) devices; definition of tailored summaries and user views; and the creation of custom control logic using a graphical user interface.

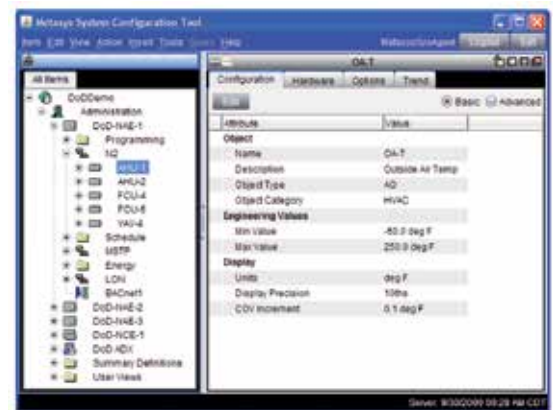

SCT also manages the maintenance of the archive database for the Network Automation Engine (NAE), Network Control Engine (NCE), Network Integration Engine (NIE), Application and Data Server/Extended Application and Data Server (ADS/ADX) and Open Data Server (ODS).

To keep the archive database current, the user can set up the SCT to schedule regular uploads from the devices on the site.

When the system is operational, you can make online changes to the database at the engine, ADS/ADX, or ODS with the same user interface that was used for the offline data generation in SCT.

Lastly, SCT offers productivity features such as database import and export, supervisory device code download, field controller upload, and site discovery. For example, with site discovery, you can rebuild the entire archive database from the online system, a useful option if the original archive is missing or was never maintained. SCT also lets you fully manage a mixed release site for a Metasys system at Release 5.2 or later.

Refer to the *SCT Technical Bulletin (LIT-1201534)* for details.

Features

- Generate and simulate the system in offline mode (simulation is available in the local version only)
- Use step-by-step wizards to assist with system configuration
- Quickly and easily recreate the Site's archive database with Site Discovery if the archive is missing, corrupt, or was never maintained
- Conveniently import and export the archive database for databases at Release 5.2 or later
- Download the software image (code) of a supervisory device without the NAE/NIE Update Tool
- Apply patches to Nx55 and Nx59 devices at Release 6.5 or later
- Copy the Security database of the SCT to supervisory devices
- Create spaces and define equipment for use with the Metasys UI
- Upload the controller application files (.caf) from online field controllers into the archive database
- Maintain controller application files (.caf) seamlessly by exporting them from one or all field controllers connected to a field bus to the computer's hard drive

SCT Selection Chart

Code Number	Description
MS-SCTSWO-0	System Configuration Tool Software for local installations. Includes a copy of N2 Configuration Tools ¹ and CCT. New project software for sites that do not have a previous version of SCT installed.
MS-SCTSWO-6	System Configuration Tool Software for local installations. Includes a copy of N2 Configuration Tools ¹ and CCT. Upgrade software for previous SCT versions being upgraded to the latest release.

Note

¹ N2 Configuration Tools are supported only on non-server-based 32-bit platforms.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys® SCT

Technical Specifications

The following table describes the recommended and minimum computer requirements for a computer on which you are installing a stand-alone SCT.

For applications where SCT is installed on an ADS/ADX, refer to the specifications in the Application and Data Server (ADS/ADX) Product Bulletin (LIT-1201525).

For applications where SCT is installed on an ODS, refer to the specifications in the Open Data Server (ODS) Product Bulletin (LIT-12011943).

SCT-Local System Requirements (1/2)

Product Codes	MS-SCTSWO-0: New User Software MS-SCTSWO-6: Upgrade software
Recommended Computer/Server Platform ²	Full Server Platform Intel® Core™ 2 Duo E6700 or better (Intel Core 2 Duo E4300 minimum) 20 GB minimum free hard disk space available 4 GB RAM (2 GB RAM minimum) 20 GB free hard disk space available (600 MB minimum) DVD drive Note: SCT prerequisite software includes the Windows operating system, SQL Server software, Windows .NET Framework, and any other software or SPs required by your SCT configuration.
	Desktop Computer Platform Intel Core 2 Duo E6700 or better (Intel Core 2 Duo E4300 minimum) 20 GB minimum free hard disk space available 2 GB RAM (1 GB RAM minimum) Note: A 32-bit operating system only supports a maximum of 4 GB memory. For best performance, use a 64-bit operating system. DVD drive Note: Prerequisite software includes the supported operating system, database software, .NET Framework, and any other software or service packs required for your SCT configuration.
Supported Operating Systems Full Server Platforms and Database Software ²	Full Server Platforms Windows Server® 2012 R2 ⁴ Supports Microsoft SQL Server 2014 (64-bit) ⁵ , SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Standard with SP2 (64-bit)
	Windows Server 2012 ⁴ Supports Microsoft SQL Server 2014 (64-bit) ⁵ , SQL Server 2012 with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Standard with SP2 (64-bit)
	Windows Server 2008 R2 with SP1 Supports Microsoft SQL Server 2012 with SP2 (64-bit) or Microsoft SQL Server 2008 R2 Standard with SP2 (64-bit) Note: The OS and software must both be 32-bit or 64-bit.
	Windows Server 2008 with SP2 (32-bit) Supports Microsoft SQL Server 2008 R2 with SP2 (32-bit) Note: A 32-bit operating system only supports a maximum of 4 GB memory. For best performance, use a 64-bit operating system.
Desktop Computer Platform	Windows® 8.1 and Windows 8.1 Pro (64-bit) Supports Microsoft SQL Server 2014 Express (64-bit) ⁵ , SQL Server 2012 Express with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (64-bit)
	Windows 8 and Windows 8 Pro (64-bit) Supports Microsoft SQL Server 2014 Express (64-bit) ⁵ , SQL Server 2012 Express with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (64-bit)
	Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (32-bit or 64-bit) Supports Microsoft SQL Server 2014 Express (32-bit or 64-bit) ³ , SQL Server 2012 Express with SP2 (64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (32-bit or 64-bit) Note: The OS and software must both be 32-bit or 64-bit.

Metasys®

VMD

Generator Express

VMD Generator Express (VGE) is software designed to support the creation of the Vendor Model Definition (VMD) files, used by the Modbus RTU and TCP integration on NIEx9 for third party integrations platform.

VMD Generator Express supplies a user friendly user's interface to create, modify and view VMD files.

VMD Generator Express incorporates a version tracking system, storing user, date/time and comment, every time a VMD is saved (created or modified).

VMD Generator Express allows creating generic models for standard integrations, like meters, chillers, AHU, to optimize the engineering time and follow standardization approach.

Features

- User friendly UI
- Version Tracking
- User Target Behaviour
- Excel string Import
- Model / Standardization
- Points List Export

Ordering Codes	Description
TL-NIE-DVD	VMD Generator Express software. It does not include the license

Note

The usage of the VMD Generator Express Tool requires a certification, which is achieved by attending a training course. For more information please contact your local technical support team.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys®

CCT

Controller Configuration Tool

The Controller Configuration Tool (CCT) is used to configure, simulate and commission the Field Equipment Controllers (FECs), Advanced Application Field Equipment Controllers (FACs), Network Control Engines (NCEs), Input/Output Modules (IOMs), and Variable Air Volume (VAV) Modular Assembly (VMA16s). You can also configure N2 VMAs using the System Section Wizard or using pre-built applications that cover the most common VMA configurations.

CCT operates in three modes that provide key functionality for your system: Configuration, Simulation, and Commissioning.

The Configuration mode allows you to select a wide variety of mechanical and control logic options through system selection trees for typical air handling, terminal unit, central plant and VAV box mechanical systems. When required you can customize the standard logic provided by the system selection process to meet your specialized control logic requirements. A comprehensive CCT Help (press F1) is provided to assist you as you make selections in the System Selection Tree and build and customise your applications. The Simulation mode allows you to review the application logic as if you were commissioning the system. You can make adjustments to setpoints, inputs, or sensors during a simulation session to validate the logic before assigning the configuration to a specific controller.

The Commissioning mode manages the downloading of files to the FECs through three different network connection points. You can connect using a Wireless Commissioning Converter (MS-BTCVT-1) or BACnet® router (TL-BRTRP-0) between your laptop and the MS/TP bus, using a USB adapter with ZigBee™ driver for your laptop computer, or using the Ethernet Passthru mode. After downloading the controllers, you can use the Commissioning mode to validate the application and adjust setpoints and setup parameters.

For VAV applications, CCT includes an optional box flow test to automatically exercise all the VAV boxes to ensure correct mechanical installation and proper configuration of the key flow setup parameters. In addition, the Commissioning mode has a Balancer tab for VAV applications that guides you through the typical steps of setting the flow constants. The ZFR Checkout Tool (ZCT) is available to validate the wireless connectivity and health of your wireless mesh network.

A Commissioning mode-only version of the CCT software is available for which is restricted to commissioning tasks only. The Configuration and Simulation modes are disabled in the CCT Commissioning mode only software.

Features

- Capability to customize standard control system logic that is created from simple system selection trees
- Consistent user interface across the Configuration, Simulation and Commissioning modes.
- Flexible connection capabilities for loading and commissioning controller
- Ability to download, upload, and upgrade multiple controllers at once
- Wireless commissioning via optional Bluetooth® adaptor
- Select required protocol for FEC/FAC and VMA controllers, BACnet mstp or N2 (CCT10.1 or later)

For best performance, use a 64-bit operating system. Note: The OS and software must both be 32-bit or 64-bit. Note: cTool applications (for example, HVACPro or GX) cannot be installed on 64-bit platforms. Note: We recommend Windows 8 for users that need cTools.</p> <p>Windows 7 Professional, Enterprise, and Ultimate Editions with SP1 (32-bit or 64-bit) Supports Microsoft SQL Server 2014 Express (32-bit or 64-bit)¹, Microsoft SQL Server 2012 Express with SP2 (32-bit or 64-bit), or Microsoft SQL Server 2008 R2 Express with SP2 (32-bit or 64-bit) Note: A 32-bit operating system only supports a maximum of 4 GB memory. For best performance, use a 64-bit operating system. Note: The OS and software must both be 32-bit or 64-bit. Note: cTool applications (for example, HVACPro or GX) cannot be installed on 64-bit platforms.</p>
Required Web Browser Software for Metasys Client Computers	<p>Windows Internet Explorer® version 8, 9, 10, and 11 Note: In Internet Explorer 11, select the Use Microsoft compatibility lists option, found under Tools > Compatibility View Settings, to ensure that websites appear and function correctly. Note: Web browser software is required if you want to view the Controller Tool Help (LIT-12011147) online. However, you can also access this help system as a PDF from the software.</p>
Network Communication for Metasys CCT Client Computers	Ethernet network interface card 10/100/1000 Mbps (100 Mbps network or better recommended)
Software Optionally Installed During CCT Install	Microsoft .NET Framework version 3.5 with SP1 or 3.5.1 Microsoft SQL Server 2008 Express software with SP2
Optional Hardware	Any network or local printer supported by the qualified Windows operating system

Note

- 1** To use SQL Server 2014 with Metasys products, you must install Microsoft cumulative update package 3 (KB2984923) for SQL Server 2014. To download the update package, visit <http://support.microsoft.com/kb/2984923/>.

Accessories

Ordering Codes	Description
BT-CVTVT-1	Bluetooth® commissioning adaptor
TL-BRTRP-0	Portable BACnet/IP to MSTP Router, includes a 1.8M USB cable and a 1.5M Ethernet cable
ZFR-USBHA-0	USB Dongle with ZigBee™ Driver provides a wireless connection through the CCT to allow wireless commissioning of the wirelessly enabled FEC and VMA16 field controllers. Also allows use of the ZCT in CCT.

Metasys®

CPO10

Central Plant Optimization™

Johnson Controls has combined expertise from designing YORK® chillers and Metasys controls to bring the best world-class program to operate your chiller plant. The result is Johnson Controls Central Plant Optimization™ 10, which saves energy and improves reliability in your facility. A facility's central chiller plant uses a significant portion of the HVAC energy, typically 35%. Managing this load, while still maintaining occupant comfort is a primary strategy for overall energy management. CPO 10, which is powered by the Metasys system, provides such a strategy. The Metasys CPO 10 application uses field-proven, factory-tested and fully documented best practices to select the most efficient combination of chillers, pumps, heat exchangers and cooling towers needed to match the building load. The application then commands the selected devices to the appropriate state or speed, providing the necessary sequencing of pumps, isolation valves and main equipment, while observing all the timing delays for safe and stable operation of the central chiller plant.

Features

- Advanced Control Algorithms - Evaluate all possible combinations of devices considering capacities, efficiencies, runtimes, and number of starts resulting in the most efficient operating state rather than simply selecting the next available device as the building load increases.
- Total Automation of All Equipment - Provides proper sequencing of all devices in a safe and stable fashion.
- Simulation Mode Application Preview - Allows you to test a newly generated program prior to downloading the program to the field controllers.
- Optional Integration of Third-Party Equipment - Provides additional energy savings.
- Control Sequences Created by the System Selection Tool (SST) within Controller Configuration Tool (CCT) - Allow you to select from tens of thousands of possible equipment combinations, piping configurations, and control strategies, each resulting in the automatic creation of a software program using proven best practices.
- CCT Editor Allowing Customization of Individual Components of the Program Created Using SST - Addresses special situations that cannot be described in SST and easily customizes the program, without the need to build the entire program from scratch.

BAS SYSTEM SOFTWARE Supervisor Software and Tools

Metasys® CPO10

The CPO10 Application Supports:

- Up to eight chillers, centrifugal (mix of constant or variable speed), screw, reciprocating or scroll compressor of mixed sizes, piped in parallel
- Up to eight primary chilled water pumps of mixed sizes, all dedicated or headered and all constant or variable speed
- Up to eight secondary chilled water pumps that are mixed in size, are piped in parallel and are variable speed
- Up to eight condenser water pumps that are mixed in size, all dedicated or headered and all constant or variable speed
- Up to four heat exchangers of mixed sizes, piped in parallel
- Up to eight cooling towers piped in common to the chillers, are single speed (with optional vernier control), multispeed or variable speed with a variety of tower/sump valve arrangements
- A non-integrated waterside economizer able to control up to eight total devices (chillers and heat exchangers) piped in parallel
- Air-cooled chillers

The CPO10 application offers a variety of primary control strategies including measuring building chilled-water flow and differential temperature, the chillers' kW load and flow through a decoupler pipe in a primary/secondary system, or differential temperature only in a constant speed chilled water pump system. You can also select dozens of secondary strategies, such as open loop control of the cooling towers (as defined by the American Society of Heating, Refrigerating and Air-Conditioning Engineers [ASHRAE]) or closed loop control of condenser-water setpoint. The CPO10 application supports 24 sequences through any combination of the following chilled water systems and condenser water systems:

Chilled Water Systems

- Variable Primary Headered
- Variable Primary Dedicated
- Primary Secondary Headered
- Primary Secondary Dedicated
- Constant Headered

Condenser Water Systems

- Constant Dedicated
- Variable Headered
- Variable Dedicated
- Constant Headered

BAS NETWORK AUTOMATION Supervisory Controllers

Metasys®

NAE

Network Automation Engine

Network Automation Engines (NAEs) enable Internet Protocol (IP) connectivity and web-based access to Metasys Building Management Systems (BMSs).

NAEs leverage standard building management communication technologies, including BACnet® protocol, LONWORKS® network, and N2 Bus protocol to monitor and supervise a wide variety of Heating, Ventilating and Air Conditioning (HVAC); lighting, security, fire and access control equipment.

NAEs provide comprehensive equipment monitoring and control, scheduling, alarm and event management, energy management, data exchange, data trending and data storage.

NAEs feature an embedded site management portal user interface, support multiple concurrent web browser sessions with password and permission access control and provide the protection of industry standard Information Technology (IT) security.

NAE55 models support a comprehensive set of supervisory features and functions for large facilities and technically advanced buildings and complexes.

The NAE35/NAE45 models enable cost-effective NAE connectivity and control in smaller facilities, and can extend NAE supervisory functions in larger facilities.

The NAE85 is a high-capacity NAE that allows integration of large BACnet IP systems and can take the place of multiple NAEs.

NAE55 Network Automation Engine

NAE45 Network Automation Engine

Features

- Communication using commonly accepted IT standards at the automation and enterprise level
- Web-based user interface
- Site director function
- Support for web services at the automation network level
- User interface and online system configuration software embedded in NAE
- Supervision of field controller networks including BACnet MS/TP, N2 Bus, LONWORKS Network and BACnet IP Devices
- Multiple connection options for data access

NAE35

Ordering Codes	Description
MS-NAE35xx-xxx (Base Features of Each NAE35)	NAE35 Network Automation Engines: Requires a 24 VAC power supply. Each model includes one RS-232-C serial port, one USB serial port, one Ethernet port, and an MS-BAT1020-0 data protection battery.
MS-NAE3510-2	Supports one N2 or BACnet MS/TP (RS-485) trunk; includes an additional RS-232-C serial port for optional external modem; supports up to 50 devices on the N2 or BACnet MS/TP trunk.
MS-NAE3511-2	Supports one N2 or BACnet MS/TP (RS-485) trunk (RS-485 port); includes an internal modem; supports up to 50 devices on the N2 or BACnet MS/TP trunk.
MS-NAE3514-2	Supports one N2 or BACnet MS/TP (RS-485) trunk; features basic access support; includes an additional RS-232-C serial port for optional external modem; supports up to 50 devices on the N2 or BACnet MS/TP trunk.
MS-NAE3515-2	Supports one N2 or BACnet MS/TP (RS-485) trunk; features basic access support; includes an internal modem; supports up to 50 devices on the N2 or BACnet MS/TP trunk.
MS-NAE3520-2	Supports one LonWorks trunk, includes an additional RS-232-C serial port for optional external modem. Supports up to 64 devices on the LonWorks port.
MS-NAE3521-2	Supports one LonWorks trunk, includes an internal modem. Supports up to 64 devices on the LonWorks port.
MS-NAE3524-2	Supports one LonWorks trunk, features Basic Access support, and includes an additional RS-232-C serial port for optional external modem. Supports up to 64 devices on the LonWorks trunks.
MS-NAE3525-2	Supports one LonWorks trunk, features Basic Access support, and includes an internal modem. Supports up to 64 devices on the LonWorks trunks.

NAE45

Ordering Codes	Description
MS-NAE45xx-xxx (Base Features of Each NAE45)	NAE45 Network Automation Engines: Requires a 24 VAC power supply. Each model includes one RS-232-C serial port, one USB serial port, one Ethernet port, and an MS-BAT1020-0 data protection battery.
MS-NAE4510-2	Supports one N2 or BACnet MS/TP (RS-485) trunk; includes an additional RS-232-C serial port for optional external modem; supports up to 100 devices on the N2 or BACnet MS/TP trunk.
MS-NAE4511-2	Supports one N2 or BACnet MS/TP (RS-485) trunk; includes an internal modem; supports up to 100 devices on the N2 or BACnet MS/TP trunk.
MS-NAE4520-2	Supports one LonWorks trunk, includes an additional RS-232-C serial port for optional external modem; supports up to 127 devices on the LonWorks port.
MS-NAE4521-2	Supports one LonWorks trunk, includes an internal modem; supports up to 127 devices on the LonWorks port.

NAE55

Ordering Codes	Description
MS-NAE55xx-x (Base Features of Each NAE55)	NAE55 Network Automation Engines: Requires a 24 VAC power supply. Each model includes two RS-232-C serial ports, two USB serial ports, two RS-485 ports, one Ethernet port and one MS-BAT1010-0 Data Protection Battery. Supports up to 100 devices on each N2 or BACnet MS/TP trunk.
MS-NAE5510-2E	Supports two N2 or two BACnet MS/TP (RS-485) trunks (or one N2 trunk and one BACnet MS/TP trunk).
MS-NAE5511-2E	Supports two N2 or two BACnet MS/TP (RS-485) trunks (or one N2 trunk and one BACnet MS/TP trunk); includes an internal modem.
MS-NAE5520-2E	Supports a LonWORKS trunk, and two N2 trunks or two BACnet MS/TP (RS-485) trunks (or one N2 trunk and one BACnet MS/TP trunk). Supports up to 255 devices on the LonWORKS trunk.
MS-NAE5521-2E	Supports a LonWORKS trunk, and two N2 trunks or two BACnet MS/TP (RS-485) trunks (or one N2 trunk and one BACnet MS/TP trunk); includes an internal modem. Supports up to 255 devices on the LonWORKS trunk.

NAE85

Ordering Codes	Description
MS-NIE8500-0 *	NxE85 model with 1U chassis for mounting in a server rack. Note: The NAE85 models ship as MS-NIE8500-0 models. Use the ChangeModel utility in the NxE85 Metasys software to change an NIE85 to an NAE85.
MS-NxE85SW-0	NxE85 software for 10,000 objects (new projects only software).

Note

* Standard NxE85 models supports 10,000 objects; an upgrade is available to support an additional 15,000 objects.

Accessories

Ordering Codes	Description
MS-BAT1010-0	Replacement data protection battery for NAE55 and NIE55. Rechargeable gel cell battery: 12 V, 1.2 Ah, with a typical life of 3 to 5 years at 21°C (70°F)
MS-BAT1020-0	Replacement data protection battery for NAE35, NAE45, and NCE25. Rechargeable NiMH battery: 3.6 V 500 mAh, with a typical life of 10 years at 21°C (70°F)
MS-15KUPG-0	15,000 object upgrade for NxE85
MS-MULTENGSW-6	Network Engine Image Upgrade for all NAE/NIE/NCE Engines on a Site, Excluding NxE85
MS-EXPORT-0	Export Utility extracts historical trend, alarm, and audit data from the system and presents the historical data in a variety of formats. Note: This option is not necessary for sites that have an ADS/ADX that is the Site Director because Export Utility is provided with the ADS/ADX solution.
SC450RM1U (OEM Part No.)	Recommended Uninterruptible Power Supply (UPS) for NxE85 model: American Power Conversion (APC®) Smart-UPS SC 450VA, 280 W 120 VAC input/output with NEMA 5-15R output connections

NAE35 and NAE45 - Technical Specification

Power Requirement	Dedicated nominal 24 VAC, Class 2 power supply (North America), Safety Extra- Low Voltage (SELV) power supply (Europe), at 50/60 Hz (20 VAC minimum to 30 VAC maximum)
Power Consumption	25 VA maximum
Ambient Operating Conditions	0 to 50°C; 10 to 90% RH, 30°C maximum dew point
Ambient Storage Conditions	-40 to 70°C; 5 to 95% RH, 30°C maximum dew point
Data Protection	Supports data protection on power failure. Rechargeable NiMH battery: 3.6 VDC 500 mAh, with a typical life of 5 to 7 years at 21°C; Product Code Number: MS-BAT1020-0
Processor	192 MHz Renesas™ SH4 7760 RISC processor
Memory	128 MB Flash nonvolatile memory for operating system, configuration data, and operations data storage and backup 128 MB Synchronous Dynamic Random Access Memory (SDRAM) for operations data dynamic memory
Operating System	Microsoft® Windows® CE embedded
Network and Serial Interfaces	One Ethernet port; connects at 10 or 100 Mbps; 8-pin RJ-45 connector One optically isolated RS-485 port; 9.6k, 19.2k, 38.4k, or 76.8k baud (depending on protocol); with a pluggable and keyed 4-position terminal block (FC Bus available on NAE351x and NAE451x models only) One LonWorks port; FTT10 78 Kbps; pluggable, keyed 3-position terminal block (LonWorks port available on NAE352x-x and NAE452x models only) One RS-232-C serial port with standard 9-pin sub-D connector that supports standard baud rates. A second serial port, on models without an internal modem, that supports an optional, user-supplied external modem. One USB serial port with standard USB connector that supports an optional, user-supplied external modem. Option: One telephone port for internal modem; up to 56 Kbps; 6-pin modular connector (NAE models with an optional internal modem have one RS-232-C serial port only.)
Housing	
<i>Plastic Housing Material</i>	ABS + polycarbonate UL94-5VB
<i>Protection</i>	IP20 (IEC 60529)
Mounting	On flat surface with screws on three mounting clips or a single 35 mm DIN rail
Dimensions (H x W x D)	131 x 270 x 62 mm Minimum space for mounting NAE35 and NAE45: 210 x 350 x 110 mm
Shipping Weight	1.2 kg
Compliance

Metasys®

NIEx9

Network Integration Engine

Network Integration Engines (NIEx9s) for 3rd party integrations enable Internet Protocol (IP) connectivity and Web-based access to Metasys Building Management Systems (BMSs).

NIEx9s leverage standard building management communication technologies, including BACnet® protocol, LONWORKS® network and N2 Bus protocol, Modbus, MBus, KNX and 3rd party proprietary protocols to monitor and supervise a wide variety of Heating, Ventilating and Air Conditioning (HVAC); lighting; security; fire; electrical and thermal measuring and access control equipment.

NIEx9s provide comprehensive equipment monitoring and control, scheduling, alarm and event management, energy management, data exchange, data trending and data storage.

NIEx9s feature an embedded Site Management Portal user interface, support multiple concurrent Web browser sessions with password and permission access control and provide the protection of industry standard Information Technology (IT) security.

NIE59 models support a comprehensive set of supervisory features and functions for large facilities and technically advanced buildings and complexes.

The NIE39/NIE49 models enable cost effective NAE connectivity and control in smaller facilities, and can extend NIEx9 supervisory functions in larger facilities.

The NIE29 models enable compact and combined solution including supervisory and control capacity. It can be used in smaller facilities where an "all-in-one" (supervisory, control and integration) platform is required.

Refer to the Network Integration Engine for 3rd Party Integrations Product Bulletin (LIT-12011923) for important product application information.

Features

- Communication using commonly accepted IT standards at the automation and enterprise level Web-based user interface
- Site Director function
- Support for Web services at the automation
- Network level
- User interface and online system
- Configuration software embedded in NAE supervision of field controller networks including N2 Bus, LONWORKS network, BACnet Master- Slave/Token-Passing (MS/TP), BACnet IP devices, Modbus RTU, Modbus IP, M-Bus, KNX and other 3rd party protocols
- Multiple connection options for data access

Each model includes two RS-232-C serial port, one USB serial port, one Ethernet port and an MS-BAT1020-0 Data Protection Battery. Note: Only one port can be defined for 3rd party integration. The other ports have to be defined in order to use standard protocols (N2, BACnet or LON)
MS-NIE3910-2	Supports one third-party trunk (Modbus RTU or TCP/IP, M-Bus, or KNX) and one N2 Bus or one BACnet MS/TP (RS-485) trunk. The number of supported devices on the third-party trunk depends on the protocol. For the N2 Bus or BACnet MS/TP trunk, up to 50 devices are supported.
MS-NIE3920-2	Supports one third-party trunk (Modbus RTU or TCP/IP, M-Bus, or KNX) and one LonWORKS trunk. The number of supported devices on the third-party trunk depends on the protocol. For the LonWORKS network, up to 64 devices are supported.

NIE49

Ordering Codes	Description
MS-NIE49xx-x (Base features of each NIE49)	Requires a 24 VAC power supply. Each model includes two RS-232-C serial port, one USB serial port, one Ethernet port and an MS-BAT1020-0 Data Protection Battery. Note: Only one port can be defined for 3rd party integration. The other ports have to be defined in order to use standard protocols (N2, BACnet or LON)
MS-NIE4910-2	Supports one third-party trunk (Modbus RTU or TCP/IP, M-Bus, or KNX) and one N2 Bus or one BACnet MS/TP (RS-485) trunk. The number of supported devices on the third-party trunk depends on the protocol. For the N2 Bus or BACnet MS/TP trunk, up to 100 devices are supported.
MS-NIE4920-2	Supports one third-party trunk (Modbus RTU or TCP/IP, M-Bus, or KNX) and one LonWORKS trunk. The number of supported devices on the third-party trunk depends on the protocol. For the LonWORKS trunk, up to 127 devices are supported.

Technical Specifications

Power Requirement	Dedicated nominal 24 VAC, Class 2 power supply (North America), Safety Extra Low Voltage (SELV) power supply (Europe), at 50/60 Hz (20 VAC minimum to 30 VAC maximum)
Power Consumption	25 VA maximum
Ambient Operating Conditions	0 to 50°C; 10 to 90% RH, 30°C maximum dew point
Ambient Storage Conditions	-40 to 70°C; 5 to 95% RH, 30°C maximum dew point
Data Protection	Supports data protection on power failure. Rechargeable NiMH battery: 3.6 VDC 500 mAh, with a typical life of 5 to 7 years at 21°C; Product Code Number: MS-BAT1020-0
Processor	192 MHz Renesas™ SH4 7760 RISC processor
Memory	128 MB Flash nonvolatile memory for operating system, configuration data, and operations data storage and backup 128 MB Synchronous Dynamic Random Access Memory (DRAM) for operations data dynamic memory
Operating System	Microsoft® Windows® CE embedded
Network and Serial Interfaces	One Ethernet port; 10/100 Mbps; 8-pin RJ-45 connector (Metasys communications & integration bus) One optically isolated RS-485 port; 9600, 19.2k, 38.4k, or 76.8k baud (depending on protocol); with a pluggable and keyed 4-position terminal block (available on NIE3910 and NIE4910 models only) One LonWORKS port; FTT10 78 Kbps; pluggable, keyed 3-position terminal block (available on NIE3920 and NAE4920 models only) Two RS-232-C serial port with standard 9-pin sub-D connector that supports standard baud rates: 9600, 19.2k, 38.4k, or 76.8k baud. One USB serial port with standard USB connector that supports an optional, user-supplied external modem.
Housing	Plastic housing material: ABS + polycarbonate UL94-5VB
Protection	IP20 (IEC 60529)
Mounting	On flat surface with screws on three mounting clips or a single 35 mm DIN rail
Dimensions (H x W x D)	131 x 270 x 62 mm Minimum space for mounting: 210 x 350 x 110 mm
Shipping Weight	1.2 kg
Compliance	Europe CE Mark - Johnson Controls, Inc. declares that this product is in compliance with the essential requirements and other relevant provisions of the EMC Directive 2004/108/EC. BACnet International BACnet Testing Laboratories™ (BTL) 135-2004 Listed BACnet Building Controller (B-BC)

BAS NETWORK AUTOMATION Supervisory Controllers

Metasys® NIEx9

NIE59

Ordering Codes	Description
MS-NIE59xx-x (Base features of each NIE59)	Requires a 24 VAC power supply. Each model includes two RS-232-C serial ports, two USB serial ports, two RS-485 ports, one Ethernet port and one MS-BAT1010-0 Data Protection Battery. Supports up to 100 devices on each N2 or BACnet MS/TP trunk. Note: Only one port can be defined for 3rd party integration. The other ports have to be defined in order to use standard protocols (N2, BACnet or LON)
MS-NIE5960-2	Supports one third-party trunk (Modbus RTU or TCP/IP, M-Bus, or KNX) and one N2 or BACnet MS/TP (RS-485) trunk. The number of supported devices depends on third-party protocol. For the N2 or BACnet MS/TP (RS-485) trunk, up to 100 devices are supported.
MS-NIE5920-2	Supports one third-party trunk (Modbus RTU or TCP/IP, M-Bus, or KNX) and one LONWORKS Network trunk. The number of supported devices depends on protocol. For the LONWORKS trunk, up to 255 devices are supported.

NIE59xx-2 - Technical Specifications

Power Requirement	Dedicated nominal 24 VAC, Class 2 power supply (North America), Safety Extra-Low Voltage (SELV) power supply (Europe), at 50/60 Hz (20 VAC minimum to 30 VAC maximum)
Power Consumption	50 VA maximum
Ambient Operating Conditions	0 to 50°C; 10 to 90% RH, 30°C maximum dew point
Ambient Storage Conditions	-40 to 70°C; 5 to 95% RH, 30°C maximum dew point
Data Protection	Supports data protection on power failure. Rechargeable gel cell battery: 12 V, 1.2 Ah, with a typical life of 3 to 5 years at 21°C; Product Code Number: MS-BAT1010-0
Clock Battery	Maintains real-time clock through a power failure. Onboard cell; typical life 10 years at 21°C
Processor	1.6 GHz Intel® Atom™ processor
Memory	4 GB Flash nonvolatile memory for operating system, configuration data, and operations data storage and backup 1 GB Synchronous Dynamic Random Access Memory (SDRAM) for operations data dynamic memory for all models
Operating System	Microsoft® Windows® Embedded Standard (WES) 2009
Network and Serial Interfaces	One Ethernet port; 10/100 Mb; 8-pin RJ-45 connector (Metasys® communications & integration bus) One optically isolated RS-485 ports; 9600, 19.2K, 38.4K or 76.8K baud; pluggable and keyed 4 position terminal blocks Two RS-232-C serial ports, with standard 9-pin sub-D connector, that support all standard baud rates One LONWORKS port; FTT10 78 Kbps; pluggable, keyed 3-position terminal block (available on NIE5920 model only) Two USB serial ports; standard USB connectors support an optional, user-supplied external modem
Housing	Plastic housing with internal metal shield
Plastic material	ABS + polycarbonate UL94-5VB Protection: IP20 (IEC 60529)
Mounting	On flat surface with screws on four mounting feet or on dual DIN rail
Dimensions (H x W x D)	226 x 332 x 96.5 mm including mounting feet. Minimum space for mounting: 303 x 408 x 148 mm
Shipping Weight	2.9 kg
Compliance	<p>Europe CE Mark - Johnson Controls, Inc. declares that this product is in compliance with the essential requirements and other relevant provisions of the EMC Directive 2004/108/EC.</p> <p>BACnet International BACnet Testing Laboratories™ (BTL) 135-2004 Listed BACnet Building Controller (B-BC)</p>

BAS NETWORK AUTOMATION Supervisory Controllers

Metasys®

NIE89 Software

Network Integration Engine Software

The Metasys NIE89 is high-capacity server model for the integration of large third-party networks into the Metasys network.

The NIE89 software is supplied for installation on a Microsoft® Windows server computer. The NIE89 supports 10,000 objects with an optional upgrade available to increase the capacity to 25,000 objects.

The NIE89 supervisory engines can integrate power and energy meters, lighting, HVAC, security, access control, and many proprietary systems that communicate over various protocols. NIE89s provide comprehensive equipment monitoring and control, scheduling, alarm and event management, energy management, data exchange, data trending, and data storage. These engines feature the same embedded Site Management Portal user interface, support multiple concurrent web browser sessions with password and permission access control, and provide the protection of industry-standard IT security.

Upto 8 third-party integration trunks are supported on an NIE89, for example four M-bus trunks and four Modbus trunks each using a specific TCP/IP port. One licensed driver per defined protocol will be required.

Features

- Support for up to four supervisory devices when configured as a Site Director
- A web-based user interface using HTTP
- Web services for access to data and services at the automation network level
- Routing of event and alarm notifications to an ADS or ADX (ADS-Lite does not support the NIE89)
- The capability to send event and alarm notifications to pager and email destinations directly
- Data collection, trend sampling, and audit trail logging
- Standard protocol clients:
 - Simple Network Management Protocol (SNMP) for network device management
 - Simple Network Time Protocol (SNTP) for time and date synchronization
 - Dynamic Host Configuration Protocol (DHCP) for dynamic IP address assignment
 - Simple Mail Transfer Protocol (SMTP) for sending email notification of alarms and events

BAS NETWORK AUTOMATION Supervisory Controllers

Metasys® NIE89 Software

Ordering Code	Description
MS-NIE89SW-0	Network Integration Engine software for installation on a Microsoft® Windows server computer: supports up to 8 third-party trunks (Modbus RTU or TCP/IP, M-Bus, or KNX) and a total of 10,000 objects
MS-NIE89SW-6	Upgrade NIE89 software; for existing NIE89s
MS-MOVBUSN89-0	Modbus driver for NIE89
MS-MBUSN89-0	M-Bus driver for NIE89
MS-KNXN89-0	KNX driver for NIE89
MS-15KUPG-0	15,000 object expansion upgrade for NIE89 (one expansion only per NIE89)

Computer recommendations for NIE89 installation

Recommended Computer Platform	Intel® Quad-Core Processor 2.0 GHz minimum
Hard Disk	160 GB minimum
Recommended Memory	8 GB RAM minimum
Supported Operating Systems (OS) and Software	Windows Server® 2012 R2 Windows Server 2012 Windows Server 2008 R2 Standard with SP1 Windows Server 2008 R2 Web with SP1 Windows Server 2008 Standard with SP2 (32-bit) Note: Microsoft .NET Framework 3.5 Service Pack (SP) 1 is required for each operating system.
Internal Optical Drive	DVD ROM, SATA
Supported Web Browser Software for Metasys Site Management Portal Cloud-based Client Computers	Windows Internet Explorer® version 8, 9, 10, and 11 Note: In Internet Explorer 11, select the Use Microsoft compatibility lists option, found under Tools > Compatibility View Settings, to ensure that websites appear and function correctly. Apple Safari® version 7.0 and 6.0.5 Other browsers, such as Google® Chrome® and Mozilla® Firefox®, may also be used but are not fully supported. Note: You use the web browser to download the Launcher application. After you install the Launcher application, you use the Launcher, not the web browser, to log in to the Site Management Portal UI.
Supported Virtual Environments	Microsoft Hyper-V™, VMWare®
Network Communication	Network interface Single Ethernet network interface card 10/100/1000 Mbps (100 Mbps or better recommended)
Recommended Data Protection	Uninterruptible power supply (UPS) Smart-UPS SC 450VA, 280 W, 120 VAC input/output, NEMA 5-15R output connections, OEM Part No. SC450RM1U

Accessories (M-BUS)

Ordering Code	Description
SIS-MBUSNCLH-0E	M-Bus level converter for up to 100 units loads, 230 VAC (TCP connected)
SIS-MBUSNCLL-0E	M-Bus level converter for up to 100 units loads, 24 VAC/DC (TCP connected)
SIS-MBUSRPLH-0E	M-Bus repeater for up to 100 units loads, 230 VAC
SIS-MBUSRPLL-0E	M-Bus repeater for up to 100 units loads, 24 VAC/DC
SIS-MBUSSCLL-0E	M-Bus level converter for up to 100 units loads, 24 VAC/DC (RS232 connection)
SIS-MBUSSCSL-0E	M-Bus level converter for up to 6 units loads, 24 VAC/DC (RS232 connection)
INT-DX-KAB01	Optional connection cable SUB-D to RJ-12 for use with SIS-MBUSSCLL-0E

NIE89 Tools

Item	Description
VMD Generator Express Tool	The VMD Generator Express Tool is required to manage the creation of the 3 rd party integrations on the NIE platform. The usage of the VMD Generator Express Tool requires a certification, which is achieved by attending a training course. For more information please contact your local technical support team.

BAS NETWORK AUTOMATION Supervisory Controllers

Metasys®

NxE to NIE Migration kit

Network Integration Engine

The NxE to NIE Migration kit provides the tools and licenses to convert an existing NAE or NCE into an NIE. This allows you to take a standard NCE or NAE device and add the integration capabilities.

The NIE migration can be applied to an NxE from release 4.1 or later.

All standard NIE's being shipped can only be used with Metasys release 7.0 or higher. It is not possible to downgrade a new NIE to an earlier version of Metasys. If you would like to install an NIE on an existing site that cannot be upgraded to the latest version of Metasys this solution can be used to create an NIE with Metasys release 4.1 or later.

Features

- Add an NIE at required Metasys release to existing site that cannot be upgraded to release 7.0 or later
- To add 3rd party integration capabilities to an existing NxE
- Avoid the need to upgrade from ADS-Lite to ADS when integrations are required. Integrations can be added to existing engine to remain within the limit for ADS-Lite

Benefits

- To be more competitive with our integration solutions
- Provide flexible integration solutions to the market
- Reduce installation costs, eliminates the need to replace the engine to add integration

BAS NETWORK AUTOMATION Supervisory Controllers

Metasys®

NCE

Network Control Engine

The Metasys Network Control Engine (NCE) series controllers combine the network supervisor capabilities and Internet Protocol (IP) network connectivity of a Network Automation Engine (NAE) with the Input/Output (I/O) point connectivity and direct digital control capabilities of a Field Equipment Controller (FEC).

NCEs provide a cost-effective solution designed for integrating central plants and large built-up air handlers into your Metasys networks.

All NCE models provide IP Ethernet network connectivity, the Metasys site management portal User Interface (UI) and the network supervisory capabilities featured on NAE35/NAE45 series network automation engines.

All NCE models provide connectivity to and supervisory control of a specified field bus trunk with up to 32 field controllers. Depending on the model, an NCE25 supports either a BACnet® Master-Slave/Token-Passing (MS/TP) trunk, an N2 Bus trunk, or a LONWORKS® network trunk.

All NCE models feature 33 integral I/O points and a Sensor Actuator (SA) Bus, which allow you to increase the NCE's I/O field point capacity and also integrate NS series Network Sensors and Variable Frequency Drives (VFDs) into your NCE application.

Some NCE models feature an integral field controller display screen with a navigation keypad. In addition, some NCE models feature an internal modem that supports standard dial-up capabilities.

NCE25 Network Control Engine

Features

- Communication using commonly accepted IT standards at the automation and enterprise level Web-based user interface
- Web-based User Interface
- Supervision of either an N2 Bus, LONWORKS Network or BACnet MS/TP Bus field controller trunk
- Multiple connection options for data access
- Integral field controller with 33 I/O points
- Expandable I/O point capacity, NS sensor connectivity and VFD control on field controller SA Bus

Ordering Codes	Description
MS-NCE25xx-x (Base Features on Each NCE25)	Each NCE25 series model requires a 24 VAC power supply and includes one RS-232-C serial port, one RS-485 optically isolated SA Bus port, one USB serial port, one Ethernet port, and an MS-BAT1020-0 data protection battery. Each NCE25 series model has 33 integral I/O points and supports up to 128 additional I/O points on the SA Bus.
MS-NCE2500-0	Base features with no physical field controller trunk connection.
MS-NCE2506-0	Base features with no physical field controller trunk connection. Includes integral display screen.
MS-NCE2510-0	Supports one N2 Bus trunk with up to 32 N2 devices.
MS-NCE2511-0	Supports one N2 Bus trunk with up to 32 N2 devices. Includes internal modem.
MS-NCE2516-0	Supports one N2 Bus trunk with up to 32 N2 devices. Includes integral display screen.
MS-NCE2517-0	Supports one N2 Bus trunk with up to 32 N2 devices. Includes integral display screen and internal modem.
MS-NCE2520-0	Supports one LonWORKS network trunk with up to 32 LonWORKS devices.
MS-NCE2521-0	Supports one LonWORKS network trunk with up to 32 LonWORKS devices. Includes internal modem.
MS-NCE2526-0	Supports one LonWORKS network trunk with up to 32 LonWORKS devices. Includes integral display screen.
MS-NCE2527-0	Supports one LonWORKS network trunk with up to 32 LonWORKS devices. Includes integral display screen and internal modem.
MS-NCE2560-0	Supports one FC Bus trunk with up to 32 MS/TP devices.
MS-NCE2561-0	Supports one FC Bus trunk with up to 32 MS/TP devices. Includes internal modem.
MS-NCE2566-0	Supports one FC Bus trunk with up to 32 MS/TP devices. Includes integral display screen.
MS-NCE2567-0	Supports one FC Bus trunk with up to 32 MS/TP devices. Includes integral display screen and internal modem.

Accessories

Ordering Codes	Description
MS-BAT1020-0	Replacement data protection battery for NAE35, NAE45, and NCE25. Rechargeable NiMH battery: 3.6 V 500 mAh, with a typical life of 10 years at 21°C (70°F)
MS-BTCVT-1	Wireless commissioning converter, with Bluetooth® technology, for configuring and commissioning the NCE field controller and the devices on the NCE SA Bus
MS-DIS1710-0	Local controller display connects to NCE on SA Bus and provides menu display and navigation keypad for monitoring status and controlling parameters on the NCE's integral field controller. Note: A DIS1710 display does not operate on NCE models that have an integral controller display.
MS-EXPORT-0	Metasys export utility, which extracts historical trend, alarm, and audit data from the system and presents the historical data in a variety of formats. Note: This option is not necessary for sites that have an ADS/ADX as the site director because it is provided with the ADS/ADX solution.

Mobile Access Portal Gateway

MAP Gateway

Available
in Spring 2016

The Mobile Access Portal (MAP) Gateway is a pocket-sized web server that provides a wireless mobile user interface to Smart Equipment and Johnson Controls branded system controllers and thermostats.

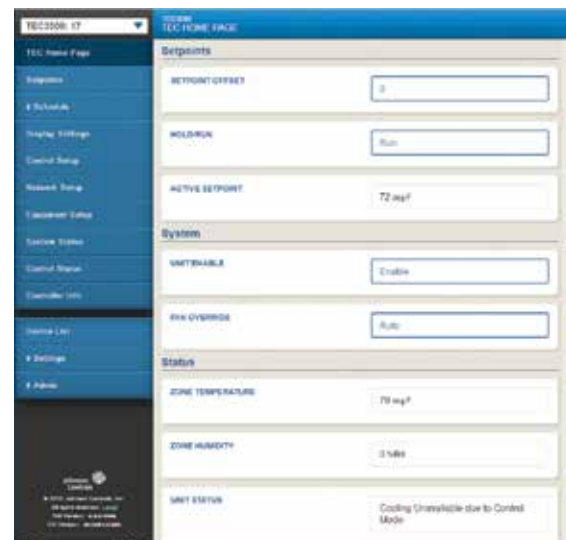

The MAP Gateway can be used to see trunk devices on Metasys® systems. It supports Johnson Controls branded Field Controllers, including FEC, FAC, VMA and TEC3000 (when available).

Offering many-to-one, multi-client connectivity, the MAP Gateway gives you access to any supported device that is on a connected BACnet® Master-Slave/Token-Passing (MS/TP) field bus. The MAP Gateway solution is conveniently sized and has a built-in wireless access point. The MAP Gateway provides an intuitive, browser-based user interface to access advanced features like alarms and point configuration.

Features

- Multi-Client Connectivity - Provides access to all identifiable supported devices connected to the BACnet® MS/TP trunk
- Browser-based Interface - Offers a local display replacement solution that allows you to access device information through any supported web browser
- Wi-Fi Connectivity - Lets you commission, configure, and access building automation equipment using Wi-Fi-enabled smart devices or laptops
- Advanced Features - Allows you to view alarms, events, and trends. Also to modify schedules and commission devices
- Browser-based Remote Building Management - Allows remote management of building systems
- Portable Size and Mobility - Allows for options to permanently mount or carry the unit from site to site
- Configurable Home Pages for Devices - Allows you to customize your work processes using the Display Object in the Controller Tool
- Easy-to-use Intuitive User Interface - Uses color coded bars on point listings to enable you to quickly get the most important statuses from a long list of points

Web Browser Requirements for Computers and Handheld Devices	
<i>Computer</i>	Windows® Internet Explorer® 10 and Windows Internet Explorer 11, Apple® Safari® 6.1 and later, or Google® Chrome™
<i>Handheld Device</i>	The handheld device must be running either Internet Explorer Mobile for Windows Mobile version 5 or version 6 operating system (OS); Apple® iPhone® and iPod touch® iOS version 7.0 or greater; or Android™ 4.0.3, 4.0.4, and 4.1+, or Google Chrome. Other web browsers may display the UI, but the functionality is not guaranteed.
Compliance	
<i>Europe</i>	CE Mark - Johnson Controls, Inc. declares that this product is in compliance with the essential requirements and other relevant provisions of the R&TTE Directive 1999/05/EC and EMC Directive 2004/108/EC. IC: RSS-210
<i>CE Emission</i>	EN61000-6-3: 2007; Generic standards for residential, commercial, and light-industrial Environments. ETSI EN 301 489-1:2001-09, ETSI EN301 489-3:2001-11 (Class 2), IEC 60950-1/ EN 60950-1

BAS NETWORK AUTOMATION Network Displays

Field Advanced Display

FAD

The Field Advanced Display (FAD) is a user friendly operator interface featuring BACnet® communication and a colorful, graphic display with touch-screen interface.

The solution is specifically designed to enable user interaction with a BACnet MS/TP-based Building Automation Control System through a convenient, comprehensive and intuitive user interface. The FAD is delivered with a factory programmed application for ease of use and to reduce and simplify its set-up.

Its flexible, attractive and intuitive graphical interface allows any user type to navigate the Building Automation Control System to view useful information such as temperatures, adjust parameters as set-points, program schedules and calendars and monitor dynamic information such as alarms and events. The access authority to information is managed through a series of optional user passwords.

The FAD offers various options to configure. It can be configured directly without the need of a PC or software tool, using its own user interface or it can be conveniently prepared off-line using a PC. The device configuration can be easily archived, exported or imported with a widely supported file format (CSV) through the embedded USB port.

Its compact dimensions, IP protection ratings and multiple mounting options, together with its modern and discrete design, allow the FAD to properly adapt its style to any type of room and user's preference.

Features

- Factory Programmed Application
- BACnet® MS/TP Communication
- Portable configurations and easily upgradeable
- Compact and neutral design

FED2611-0	Field Equipment Controller, 24 Vac, 17-Points with FAD Display
FCD2612-1	Field Advanced Controller, 24 Vac, 18-Points with FAD Display
FCD2612-2	Field Advanced Controller, 230 Vac, 18-Points with FAD Display
FCD2611-0	Field Advanced Controller, 24 Vac, 17-Points with FAD Display
FCD3611-0	Field Advanced Controller, 24 Vac, 26-Point with FAD Display

Metasys® Controllers

FEC - FAC

Field Equipment Controllers

The Metasys Field Equipment Controllers (FEC) are a complete family of BACnet® compatible field controllers and accessories designed with the flexibility to meet a wide range of your HVAC control applications. Built on the ASHRAE standard for building automation system control and communication, these controllers support Johnson Controls commitment to open communication standards and greater control options for you.

The FEC family includes the 10-point FEC16, 16-point FEC25 and the 17-point FEC26 field controllers, as well as I/O expandability. All seamlessly integrate with the Metasys building management system. FEC controllers are available with optional LCD display.

FAC Series controllers feature an integral real-time clock and support time-based tasks, which enables these field controllers to monitor and control schedules, calendars, alarms and trends.

All FEC and FAC controllers feature selectable N2 or BACnet® MS/TP communication protocol, this allows them to be used as functional replacements for legacy N2 controllers.

Features

- Supports peer-to-peer communications
- Continuous tuning adaptive control provides more efficient control and reduces level of manual intervention
- Advanced diagnostics for failure detection, resolution and prevention
- Standard packaging and terminations simplify installation

- Field Equipment Controllers have been tested by the BACnet Testing Labs (BTL) and are certified as BACnet application specific controllers
- FAC models feature a integral real time clock with on-board time schedules, calendars, trends and alarms and are BTL certified as BACnet Advanced Application Controllers (B-AAC)

Point Type Counts per Model

Point Types	Signals Accepted	FEC16	FEC25	FEC2611 & FAC2611	FAC2612	FAC3611
Universal Input (UI)	Analog input, voltage mode, 0–10 VDC Analog input, current mode, 4–20 mA Analog input, resistive mode, 0–2k ohm, RTD (1k NI [Johnson Controls], 1k PT, A99B Si), NTC (10k type L, 2.252k type 2) Binary input, dry contact maintained mode	2	4 ¹	6	5	8
Binary Output (BI)	Dry contact maintained mode Pulse counter/accumulator mode (high speed) 100 Hz (50 Hz – FEC25, FAC36)	1	6	2	4	6
Analog Output (AO)	Analog output, voltage mode, 0–10 VDC Analog output, current mode, 4–20 mA	0	2 ²	2	0	6
Binary Output (BO)	24 VAC triac	3	2	3	0	6
Configurable Output (CO)	Analog output, voltage mode, 0–10 VDC Binary output mode, 24 VAC triac	4	2	4	4	0
Relay Outputs (RO)	240 VAC maximum voltage 1/3 hp 125 VAC, 1/2 hp 250 VAC 400 VA Pilot Duty at 240 VAC 200 VA Pilot Duty at 120 VAC 3 A Noninductive 24–240 VAC	0	0	0	5 (2 x SPDT) (3 x SPST)	0

Note

- ¹ Does not support 4–20 mA input
² Does not support 4–20 mA output

MS-FAC3611-0	26-point Advanced Application Field Controller with 8 UI, 6 BI, 6 AO and 6 BO; 24 VAC; SA Bus

Accessories

Ordering Codes	Description
MS-DIS1710-0	Local Controller Display for FEC and FAC Models
MS-BTCVT-1	Bluetooth wireless commissioning adaptor
MS-BTCVTCBL-700	Cable replacement Set for the MS-BTCVT-1 includes retractable 5 m cable
TL-BRTRP-0	Portable BACnet/IP to MS/TP Router. Includes 1.8m Cable and 1.5 m Ethernet cable
AP-TBK4SA-0	Replacement MS/TP SA Bus Terminal, 4-Position Connector, Brown, Bulk Pack
AP-TBK4FC-0	Replacement MS/TP FC Bus Terminal, 4-Position Connector, Blue, Bulk Pack
AP-TBK3PW-0	Replacement Power Terminal, 3-Position Connector, Grey, Bulk Pack
MS-TBKLV03-0	FAC2612, 3 Position Line Voltage Terminal Block. Includes 3 pieces (Grey)
MS-TBKRO02-0	FAC2612, 2 Position Relay Output Terminal Block. Includes 9 pieces, 3 of each position (Red)
MS-TBKRO03-0	FAC2612, 3 Position Relay Output Terminal Block. Includes 6 pieces, 3 of each position (Red)
MS-TBKCO04-0	FAC2612, 4 Position Configurable Output Terminal Block. Includes 6 pieces, 3 of each position (Black)
MS-TBKUI04-0	FAC2612, 4 Position Universal Input Terminal Block. Includes 9 pieces, 3 of each position (White)
MS-TBKUI05-0	FAC2612, 5 Position Universal Input Terminal Block. Includes 3 pieces (White)
MS-ZFR1810-1	Wireless Field Bus Coordinator, 10 mW Transmission Power. Functions with NAE35xx, NAE45xx, NAE55xx, and NCE25xx models.
MS-ZFR1811-1	Wireless Field Bus Router, 10 mW Transmission Power. Functions with Metasys BACnet FECs, VMA1600s, and WRZ-TTx Series Wireless Mesh Room Temperature Sensors.
ZFR-USBHA-0	USB Dongle with ZigBee™ Driver provides a wireless connection through CCT to allow wireless commissioning of the wireless enabled FEC, FAC, IOM, and VMA16 field controllers. Also allows use of the ZFR Checkout Tool (ZCT) in CCT

BAS CONTROLLERS

Field Controllers

Metasys® Controllers

FEC - FAC

FEC - Technical Specifications

Supply Voltage	24 VAC (nominal, 20 VAC minimum/30 VAC maximum), 50/60 Hz, Safety Extra-Low Voltage (SELV) (Europe)
Power Consumption	14 VA maximum for FEC models with no integral display 20 VA maximum for FEC models with integral display Note: VA ratings do not include any power supplied to the peripheral devices connected to Binary outputs (BOs) or Configurable Outputs (COs), which can consume up to 12 VA for each BO or CO, for a possible total consumption of an additional 84 VA (maximum).
Ambient Conditions	
<i>Operating</i>	0 to 50°C; 10 to 90% RH noncondensing (-xET models -40 to 70°C; 10 to 90% RH noncondensing)
<i>Storage Temperature</i>	-40 to 80°C; 5 to 95% RH noncondensing
Controller Addressing	DIP switch set; valid field controller device addresses 4–127 (Device addresses 0–3 and 128–255 are reserved and not valid field controller addresses.)
Communications Bus	Selectable N2 or BACnet® MS/TP RS-485: 3-wire FC Bus between the supervisory controller and field controllers 4-wire SA Bus between field controller, network sensors, and other sensor/actuator devices, includes a lead to source 15 VDC supply power (from field controller) to bus devices.
Processor	H8SX/166xR Renesas® microcontroller
Memory	1 MB flash memory and 512 KB Random Access Memory (RAM)
Input and Output Capabilities	
<i>FEC16 Model</i>	2 – Universal inputs: Defined as 0–10 VDC, 4–20 mA, 0–600k ohm or binary dry contact 1 – Binary inputs: Defined as dry contact maintained or pulse counter/accumulator mode 3 – Binary outputs: Defined as 24 VAC triac (selectable internal or external source power) 4 – Configurable outputs: Defined as 0–10 VDC or 24 VAC triac BO
<i>FEC25 Model</i>	4 – Universal inputs: Defined as 0–10 VDC, 0–600k ohm or binary dry contact 6 – Binary inputs: Defined as dry contact maintained or pulse counter/accumulator mode 2 – Binary outputs: Defined as 24 VAC triac (external source power only) 2 – Configurable outputs: Defined as 0–10 VDC or 24 VAC triac BO 2 – Analog outputs: Defined as 0–10 VDC only
<i>FEC26 Model</i>	6 – Universal inputs: Defined as 0–10 VDC, 4–20 mA, 0–600k ohm or binary dry contact 2 – Binary inputs: Defined as dry contact maintained or pulse counter/accumulator mode 3 – Binary outputs: Defined as 24 VAC triac (selectable internal or external source power) 4 – Configurable outputs: Defined as 0–10 VDC or 24 VAC triac BO 2 – Analog outputs: Defined as 0–10 VDC or 4–20 mA
Analog Input/Analog Output Resolution and Accuracy	Analog input: 16-bit resolution Analog output: 16-bit resolution and ±200 mV in 0–10 VDC applications
Terminations	Input/output: Fixed screw terminal blocks FC Bus, SA Bus and power supply: 3-wire and 4-wire pluggable screw terminal blocks FC Bus and SA Bus: RJ-12 6-pin modular jacks
Mounting	Horizontal on single 35 mm DIN rail mount (preferred) or screw mount on flat surface with three integral mounting clips on controller
Housing	Enclosure material: ABS and polycarbonate UL94 5VB; Self-extinguishing, plenum-rated protection class: IP20 (IEC529)
Dimensions (H x W x D)	
<i>FEC16/25 Model</i>	150 x 164 x 53 mm including terminals and mounting clips
<i>FEC2611 Model</i>	150 x 190 x 53 mm including terminals and mounting clips Note: Mounting space for FAC models requires an additional 50 mm space on top, bottom, and front face of controller for easy cover removal, ventilation, and wire terminations.
Weight	
<i>FEC16/25 Model</i>	0.4 kg
<i>FEC2611 Model</i>	0.5 kg
Compliance	
<i>Europe</i>	CE Mark – Johnson Controls, Inc., declares that this product is in compliance with the essential requirements and other relevant provisions of the EMC Directive 2004/108/EC
<i>BACnet International</i>	BACnet Testing Laboratories (BTL) 135-2004 Listed BACnet Application Specific Controller (B-ASC)

Metasys® Controllers

VMA16

Variable Air Volume Modular Assembly

VMA16s (32-bit) are programmable digital controllers tailored for VAV applications that communicate via the BACnet Master-Slave/Token-Passing (MS/TP) protocol. The VMA16 (32-bit) controllers feature an integral digital pressure sensor, an integral damper actuator, and a 32-bit microprocessor. The controllers' small package size facilitates quick field installation and efficient use of space, while not compromising high-tech control performance. The VMA16 (32-bit) controllers connect easily to the NS-Series Network Sensors for zone and discharge air temperature sensing.

These features make the VMA16 (32-bit) the product of choice for VAV systems. The wide variety of network sensor models provides options for measuring and displaying zone temperature, occupancy detection, duct temperature, zone humidity and dewpoint determination, carbon dioxide (CO₂) level, setpoint adjustments, VAV box fan speed control, and discharge air temperatures.

Features

- Standard BACnet® Protocol.
Provides interoperability with other Building Automation System (BAS) products that use the widely accepted BACnet standard.
- Standard Hardware and Software Platform.
Uses a common hardware design throughout the family line to support standardized wiring practices and installation workflows. Also uses a common software design to support use of a single tool for control applications, commissioning, and troubleshooting to minimize technical training.
- ZigBee™ Wireless Field Controller (FC)/Sensor/Actuator (SA) Bus Interface.
Provides a wireless alternative to hard-wired Metasys system counterparts, providing application flexibility and mobility with minimal disruption to building occupants.
- Bluetooth® Wireless Commissioning Interface - Provides an easy-to-use connection to the configuration and commissioning tool.
- Auto Tuned Control Loops.
Reduce commissioning time, eliminate change-of-season re-commissioning, and reduce wear and tear on mechanical devices.
- Universal Inputs, Configurable Outputs, and Point Expansion Modules.
Allow multiple signal options to provide input/output flexibility.
- Optional Local User Interface Display.
Allows convenient monitoring and adjusting capabilities at the local device.
- BACnet Testing Laboratories™ (BTL) Listing.
Ensures interoperability with other BTL-listed devices. BTL is a third-party agency which validates that BAS vendor products meet the BACnet industry-standard protocol.
- 32-bit microprocessor ensures optimum performance and meets industry specifications.
- BACnet Automatic Discovery support enables easy controller integration into Metasys BAS.
- Integral End-of-Line (EOL) switch enables field controller as a terminating device on the communications bus.
- Pluggable communications bus and supply power terminal blocks expedite installation and troubleshooting.
- Wireless capabilities via a ZFR1800 Series Wireless Field Bus System enable wireless mesh connectivity between Metasys field controllers to WRZ Series Wireless Room Temperature Sensors and to supervisory controllers, facilitating easy initial location and relocation.
- Patented proportional adaptive control (P-Adaptive) and Pattern Recognition Adaptive Control (PRAC) technologies provide continuous loop tuning.
- Writable flash memory allows standard or customized applications to be downloaded from the Controller Configuration Tool (CCT) and enables persistent application data.
- Large product family provides a wide range of point mix to meet application requirements and allows the addition of one or more Input/Output Module (IOM)s and/or Network Sensors to provide even more application capacity.
- A state-of-the-art digital non-flow pressure sensor to provide 14-bit resolution with bidirectional flow operation that supports automatic correction for polarity on high- and low-pressure DP tube connections; this pressure sensor eliminates high- and low-pressure connection mistakes
- Two additional Universal Inputs over the previous models (VMA1610 & VMA1620), that provides more low-cost sensor options
- A 33 percent smaller package than the earlier VMA1610 and VMA1620s (16-bit) models.
- The phone jack-style connector on the FC Bus and SA Bus of the VMA16 series to support quick connection to the BTCVT Wireless Commissioning Converter, ZFR1811 wireless router, and network sensors
- A fast response actuator that drives the damper from full open to full closed (90°) in 60 seconds to reduce commissioning time

Mounting	Mounts to damper shaft using single set screw and to duct with single mounting screw.
Actuator Rating	4 Nm minimum shaft length = 44 mm
Dimensions (H x W x D)	165 x 125 x 73 mm Center of Output Hub to Center of Captive Spacer: 135 mm
Weight	0.65 kg
Compliance	<p>Europe Johnson Controls, Inc., declares that this product is in compliance with the essential requirements and other relevant provisions of the EMC Directive 2004/108/EC.</p> <p>BACnet International BACnet Testing Laboratories (BTL) 135–2010 Protocol Revision 7 Listed BACnet Application Specific Controller (B-ASC)</p>

Metasys® Controllers

VMA18

VAV Controllers for the Field Replacement of the obsolete VMA14

VMA18 series (32-bit) are programmable digital controllers tailored for VAV applications that communicate via the N2 protocol, which can be integrated to any supervisory controller capable of managing N2 Open networks and devices, such as the Network Communication Module (NCM) and Network Automation Engine (NAE).

The VMA18 series controllers feature an advanced design that provides optimum performance and easy access to power, network, and field terminations. These controllers come with 32-bit microprocessors that meet and exceed ever demanding industry standards.

Our wide variety of network sensor models provides options for measuring and displaying zone temperature, occupancy detection, duct temperature, zone humidity, carbon dioxide (CO₂) level, setpoint adjustments, and discharge air temperatures.

The VMA18 series controllers embedded capabilities, in addition to its modular accessories, make it well-suited as a replacement for legacy VMA14xx Series Controllers.

Features

- N2 Open Communications Protocol
- Standard Hardware and Software Platform
- Bluetooth® Wireless Commissioning Interface.
Provides an easy-to-use connection to the configuration and commissioning tool.
- Auto Tuned Control Loops.
Reduce commissioning time, eliminate change-of-season re-commissioning, and reduce wear and tear on mechanical devices.
- Universal Inputs, Configurable Outputs, and Point Expansion Modules.
Allow multiple signal options to provide input/output flexibility.
- Optional Local User Interface Display.
Allows convenient monitoring and adjusting capabilities at the local device.
- 32-bit microprocessor ensures optimum performance and meets industry specifications
- Pluggable communications bus and supply power terminal blocks expedite installation and troubleshooting
- Can be converted to BACnet Master-Slave/Token-Passing MS/TP protocol with a software download. This functionality provides a differentiated and cost-effective platform upgrade path for existing VMA14xx customers who are looking for a gradual upgrade strategy.

VMA18 Ordering Information

Ordering Codes	Description
MS-VMA1826-0	32-bit, Integrated VAV Controller and Actuator, 3 UI, 3 BO, and 2 CO; 24 VAC; FC Bus, and SA Bus; (This model is not fitted with the Differential Pressure Transducer). Use for VMA14xx retrofits. Includes cable adapters for use when replacing VMA14xx Series controllers.
MS-VMA1832-0	32-bit, Integrated VAV Controller/Actuator/DPT, 3 UI, 3 BO, and 2 CO; 24 VAC; FC Bus, and SA Bus. Use for VMA14xx retrofits. Includes cable adapters for use when replacing VMA14xx Series controllers.

VMA18 Selection Charts

Point Types	Signals Accepted	VMA1826	VMA1832
Modular Jacks		6-pin SA Bus with four communicating sensors and 6-pin FC Bus for tool support	
Universal Input (UI)	Analog Input, Voltage Mode, 0–10 VDC Analog Input, Resistive Mode, 0–2k ohm, RTD (1k NI [Johnson Controls], 1k PT, A998 SI), NTC (10k Type L, 2.252k Type 2) Binary Input, Dry Contact Maintained Mode	3	3
Binary Output (BO)	24 VAC Triac	3	3
Configurable Output (CO)	Analog Output, Voltage Mode, 0–10 VDC Binary Output Mode, 24 VAC Triac	2	2
Integrated Actuator	Internal	1	1
Integrated Differential Pressure Transducer	Internal	0	1
Zone Sensor Input	On SA Bus ¹	Up to 4 NS Series Network Zone Sensors Up to 9 WRZ sensors when using the ZFR1811 Wireless router configuration and up to 5 WRZ Sensors when using the one-to-one WRZ-78xx wireless configuration	

Note

1 A total of 10 MS/TP master addresses (IOMs), not including sensor addresses (MS/TP slaves), can be used in a single VMA controller.

Metasys® Controllers

IOM

Input/Output Modules

A range of Input/Output modules compatible with Metasys. IOMs can serve in one of two capacities depending on where they are installed on the Metasys system. When installed on the Sensor Actuator (SA) Bus of an Field Equipment Controller (FEC), the IOMs expand the point count of these controllers. When installed on the Field Controller (FC) Bus as point multiplexers, IOMs allow a Network Automation Engine (NAE) or Network Controller Engine (NCE) to monitor and control supervisory points directly. A full range of FEC/FAC models combined with the IOM models can be applied to a wide variety of building applications ranging from simple fan coil or heat pump control, to advanced central plant management.

Features

- Expands controllers for larger applications
- Flexible configurations: 4, 6, 10, 12, 16 and 17-point expandability
- Integrates at both field and supervisory levels
- Models with 16 inputs for monitoring applications

Point Type Counts per Model

Point Types	Signals Accepted	IOM17	IOM27	IOM37	IOM47	IOM2721	IOM3721	IOM3731

MS-BTCVTCBL-700	Cable replacement Set for the MS-BTCVT-1 or the NS-ATV7003-0; includes one 5-foot retractable cable

Metasys® Controllers

Romutec

Input/Output Modules

Romutec Input/Output Modules are designed to integrate seamlessly into the Metasys system. They are installed on the BACnet MS/TP Sensor Actuator (SA) Bus of a Network Control Engine (NCE) or on the SA Bus of a Field Equipment Controller (FEC/FAC) and expand the point count of these controllers. A full range of FEC/FACs, NCEs and Romutec IO Modules allow various combinations, which will meet the requirements from simple to advanced building applications.

Romutec Input/Output modules can be used when manual overrides are required or when control panel space is limited and a small footprint is needed.

Five models of IO modules are offered with different combinations of BI's, BO's, AI's and AO's. In addition to the standard models optional manual override modules are available. Manual override modules come in two versions, one which can be used inside a control cabinet (DIN rail mounting) and the other for fixing on the cabinet door (front panel mounting). The manual override modules are connected with a USB type cable directly to their corresponding host IO Module.

They are preconfigured so setting up requires nothing more than selecting the appropriate DIP switch settings.

Five additional models are also available to meet the requirement for DIN rail mounted IO modules with integral overrides.

Features

- Small footprint, compared with the Metasys® Input/Output Module (IOM) series.
- Manual overrides available as an option. Integral Manual overrides for AO and BO on selected models.
- Models available for indicating the status of binary inputs with LED's.
- Supports BI, BO, AI and AO objects.
- Easy engineering as supported by CCT (Controller Configuration Tool).
- Quick engineering for manual overrides as all modules are preconfigured.
- Connected to the SA Bus of the FEC/FAC or NCE controller as an MSTP slave device.
- Equipped with fault and status LED's for troubleshooting.
- Pluggable terminals with spring clamp for quick and simple wire termination without special tools.

Ordering Information

Ordering Codes	Description
JDB8410	12-Point Romutec IOM with 8 BI, 4 BO and SA Bus Support (four 1-state drives)
JDB8420	Optional manual override module for JDB8410, Front Panel mounting
JDB8430	Bundle of JDB8410 (Base module), JDB8420 (Override module, panel) and 3,0 m USB-cable
JDB8440	Optional manual overrides for JDB8410, DIN Rail mounting
JDB8450	Bundle of JDB8410 (Base module), JDB8440 (Override module, DIN rail) and 0,1 m USB-cable
JDB6410	10-Point Romutec IOM with 6 BI, 4 BO and SA Bus Support (two 2-state drives)
JDB6420	Optional manual override module for JDB6410, Front Panel mounting
JDB6430	Bundle of JDB6410 (Base module), JDB6420 (Override module, panel) and 3,0 m USB-cable
JDB6440	Optional manual overrides for JDB6410, DIN Rail mounting
JDB6450	Bundle of JDB6410 (Base module), JDB6440 (Override module, DIN rail) and 0,1 m USB-cable
JDB8010	8-Point Romutec IOM with 8 BI and SA Bus Support
JDB8020	Optional LED's for indicating the BI status of JDB8010, Front Panel mounting
JDB8030	Bundle of JDB8010 (Base module), JDB8020 (LED module, panel) and 3,0 m USB-cable
JDB8040	Optional LED module for indicating the BI status of JDB8010, DIN Rail mounting
JDB8050	Bundle of JDB8010 (Base module), JDB8040 (LED module, DIN rail) and 0,1 m USB-cable
JAB0410	4-Point Romutec IOM with 4 AO and SA Bus Support
JAB0420	Optional manual overrides for JAB0410, Front Panel mounting
JAB0430	Bundle of JDB8010 (Base module), JAB0420 (Override module, panel) and 3,0 m USB-cable
JAB0440	Optional manual overrides for JAB0410, DIN Rail mounting
JAB0450	Bundle of JAB0410 (Base module), JAB0440 (Override module, DIN rail) and 0,1 m USB-cable
JAB6610	12-Point Romutec IOM with 2 BI, 2 BO, 4 AI, 4 AO and SA Bus Support (Points only, no overrides or input status LED's), DIN rail mounting
JDB8451	12-Point Romutec IOM with 8 BI, 4 BO (four 1-state drives) and SA Bus Support with Integral overrides and status LED's, DIN rail mounting
JDB6451	10-Point Romutec IOM with 6 BI, 4 BO (two 2-state drives) and SA Bus Support with integral overrides and status LED's, DIN rail mounting
JDB8051	8-Point Romutec IOM with 8 BI and SA Bus Support with integral status LED's, DIN rail mounting
JAB0451	4-Point Romutec IOM with 4 AO and SA Bus Support with integral overrides and status LED's, DIN rail mounting
JAB6651	12-Point Romutec IOM with 2 BI, 2 BO, 4 AI, 4 AO and SA Bus Support (Points only, no overrides or input status LED's), DIN rail mounting, Part of integral family

BAS CONTROLLERS Field Controllers

Terminal Unit Controllers

TUC03

Configurable Terminal Unit Controller

The TUC03 configurable Terminal Unit Controller is designed specifically to provide direct digital control of terminal unit applications with heating and/or cooling coils, an electric heater and a three-speed or variable speed fan.

These applications include close control units, fan coil units, unit ventilators and chilling or heating ceiling beam installations.

The device can be configured by the installer, without the need of a PC and software tool, using a set of on-board dip-switches.

The controller is designed for field installation in a panel or enclosure or for mounting by original equipment manufacturers (OEMs) on DIN-rail or directly on a surface.

The space comfort set point, occupancy mode and fan speed may be adjusted from a wide range of room sensor modules with options for a digital display.

Communication options are available to enable the controller to be integrated into an N2 Open or BACnet® network of a building automation system. The BACnet interface of the controller complies with the ANSI/ASHRAE Standard 135-2004 for sharing data other devices on the network.

Features

- Field Selectable application type, communication protocol and room module, via dip-switches on controller
- 230 VAC power supply
- 5 VDC / 15 VDC / 24 VAC power supply for field devices, directly provided by the controller
- Modular range of room sensor modules
- Network communications options - N2 Open and BACnet MS/TP
- BACnet MS/TP with peer to peer communication
- Configurable using standard tools

Mechanical Thermostats

270XT

Freeze Protection, IP30

Sensing element is 3 or 6 meters long to permit attaching across the surface of a coil to guard against freezing at any point.

When any 30 cm or more of this element senses a temperature as low as the control setpoint, it will "switch off".

A special version is available with bulb and 2 m capillary, range 24/+18 °C for clamp on or immersion purposes.

SPDT change over contacts permit the use of an alarm signal.

Features

- Dust tight Pennswitch
- SPDT contacts
- 270XTAN provided with trip-free manual reset
- Controls have adjustable range

Application

These controls are designed for protection against freeze up of hydronic heating coils, cooling coils and similar application.

Capillary and Space Thermostats, IP30

These thermostats are available with fixed or adjustable differential. The various control ranges cover a broad range of temperature applications with a minimum number of models.

On request a built-in high or low limit stop is possible and can be adjusted quickly and easily in the field. All models have a universal way of adjustment. For this purpose a knob and sealing cap are enclosed.

All are equipped with IP50 enclosure.

Features

- Liquid filled sensing element
- Dust tight Penn switch
- Trip free manual reset
- Front adjustment

Application

These thermostats are designed for refrigeration, cooling, heating, ventilation and air-conditioning applications. Standard models are provided for remote sensing or room sensing. Models with manual reset are available for low or high limit functions.

Capillary and Space Thermostat, IP65

These thermostats are available with fixed or adjustable differential. The various control ranges cover a broad range of temperature applications with a minimum number of models.

SPDT contacts are standard on all models.

Features

- Liquid filled sensing element
- Dust tight Penn switch
- IP65 protection class
- Front adjustment

Application

These thermostats are designed for applications where a splash-proof and/or dust-tight enclosure is required.

Four types are available:

- Types A19ARC are general purpose capillary thermostats.
- Types A19BRC and A19BQC are space thermostats with coiled element to be used as farm control, outdoor thermostats or in cold storage rooms.
- Types A19AQF is specially designed for milkcool-tank applications.
- Type A19AQC-9101 is specially designed for ice-bank application.

2-stage Capillary and Space Thermostat, IP30 / IP65

Controls are compact with fixed differential per stage and (on most models) adjustable differential between stages. Liquid filled element provides wide range, constant differential over whole range and no influence from barometric pressure.

Since the bulb contains the major portion of the total fill the thermostat may be considered as cross-ambient, capillary and cup temperature variations affect the operating point only slightly due to the small amount of fill they contain.

For quantity orders it is possible to have the below stated optional constructions:

- Without case and cover for panel mounting
- Close differential per stage
- Different capillary lengths

All standard IP30 enclosure models have a universal way of adjustment. For this purpose a knob and sealing cap are enclosed.

Features

- Liquid filled sensing element
- Dust tight Penn switch
- IP65 protection class models available
- Front adjustment

Application

These thermostats are designed for various types of heating, cooling, ventilation, or air-conditioning applications. All models have two SPDT switches providing the following control possibilities:

- 2 stage heating
- 2 stage cooling
- Heating/cooling with automatic changeover

3- or 4- Stage Thermostat

Models are available in 'open' construction for panel mounting. Single knob adjustment moves the entire staging band up and down within the range of the control. The differential on each stage and sequencing between stages are factory set.

This permits the OEM to completely engineer the cycling of their equipment without the hazard of field mis-adjustments and erratic sequencing.

Features

- Dust-tight SPDT switches
- Cushion mounted
- Operation from a single, liquid filled element
- Case compensation standard on all models

Application

Designed for multi-stage thermostatic operation of electrically controlled equipment such as:

- Packaged liquid chillers
- Heat pumps
- Electric duct heaters
- Computer room airconditioners

Mechanical Thermostats

T22 - T25

Stage Room Thermostat, Line Voltage, IP20

These thermostats with a sturdy steel cover are provided with a liquid filled sensing element. This element is formed to achieve maximum sensitivity to surrounding air temperature changes. Coupled with a highly efficient diaphragm and leverage mechanism, the element operates a totally enclosed Penn switch contact with a close differential switching action without the use of "heat or cool" anticipators.

Features

- Liquid filled elements
- Dust tight Penn switch
- Small differential
- 2-Stage Thermostats with dead band and automatic change over

Application

These room thermostats are designed to control heating and/or cooling equipment, in commercial industrial or residential installations. Typical uses are for unit heaters, fan coils, cooling rooms etc. Type T22SRX can be used for either heating or cooling.

Type T25B (2 stages) can be used for:

- 2-Stages heating
- 2-Stages cooling
- Heating/cooling with dead band and automatic change over

Temperature Controls

Mechanical Thermostats

A25

Limit Control Manual Reset, IP30

A rod and tube type sensing element actuate the switch contacts. Main contacts (1 - 2) are normally closed, and open when the temperature at the element rises to the dial setpoint. Contacts are re-closed only by operation of the reset lever. The reset lever is "trip-free" and cannot be used to block contacts in a closed position.

Features

- Rod and tube type of element
- Adjustable duct mounting flange
- Trip-free manual reset
- Dust-tight Penn switch

Application

These warm air limit controls "lock out" on a temperature increase to the control setpoint. Manual reset is required to re-close the electrical contacts. A typical application is to stop air-conditioning or ventilating fans in the event of excessive return air temperature, as from a fire.

REFRIGERATION COMPONENTS

Float and Flow Controls

Mechanical Liquid Flow Switch

F61

Flow Switch for Liquid

The F61 liquid flow switches can be used in liquid lines carrying water, sea water, swimming pool water, ethylene glycol or other liquids not harmful to the specified materials.

The switches have SPDT contacts and can be wired to energise one device and de-energise another when liquid flow either exceeds or drops below the set flow rate. Pipe insert models and the T-body types for low-flow applications are available.

The IP43 versions can be used for liquid temperatures above dewpoint (for use in other environments see the Product Data Sheet).

Typical applications are to shut down the compressor on liquid chiller systems, to prove flow on electric immersion heaters and to give a signal or alarm when the pump on condenser cooling system shuts down.

Dimensions in mm

Features

- T-body and Pipe-insert types available
- Polycarbonate IP43 enclosure
- Vapour tight IP67 enclosure
- Stainless steel Pipe-insert type
- Large wiring space
- Range screw easy accessible.

Mechanical Liquid Flow Switch

F261

Flow Switch for Liquid

The F261 Series Flow Switches respond to fluid flow in lines carrying water, ethylene glycol, or other nonhazardous fluids. These models also work in applications with swimming pool water and lubricating oils.

F261 Series Standard Flow Switches use a variety of paddle sizes to respond to fluid flow rates in applications with 1 inch trade size (or greater) pipe.

Features

- Type 3R (NEMA) or Type 4 (NEMA) Polycarbonate Enclosure
- Viton® Diaphragm
- Gold-Plated Contacts on Selected Models
- Maximum Fluid Pressure of 290 psig (20 bar)

Compliance	
North America	cULus Listed; UL 60730, File E6688; FCC Compliant to CFR47, Part 15, Subpart B, Class B Industry Canada (IC) Compliant to Canadian ICES-003, Class B limits
Europe 	CE Mark – Johnson Controls, Inc. declares that this product is in compliance with the essential requirements and other relevant provisions of the EMC Directive and the Low Voltage Directive.
Australia/New Zealand	Mark RCM Compliant

Note

- 1 Ensure that the low liquid temperature combined with the low ambient temperature does not lead to the freezing the liquid inside the body (or bellows, where appropriate). Please observe the liquid freezing point.
- 2 At higher ambient temperatures, the maximum allowed liquid temperature becomes lower. The temperature of the electrical switch inside should not exceed 70°C.

REFRIGERATION COMPONENTS

Float and Flow Controls

Mechanical Air Flow Switch

F62

Air Flow Switch

The F62 airflow switch detects air flow or the absence of air flow by responding only to the velocity of air movement within a duct. The control can be wired to open one circuit and close a second circuit (SPDT) for either signaling or interlock purposes.

Failure of air flow during normal operation of air handling systems may cause over-heating, coil icing and other conditions that may be detrimental to the equipment.

Typical applications include make-up air systems, air cooling or heating processes and exhaust systems.

Features

- Polycarbonate IP43 enclosure
- Large wiring space
- Range screw easily accessible

Dimensions in mm

1	Cable Inlet hole \varnothing 22.7 mm; Dust cup is installed
2	Mounting plate gasket 0.2 mm thick neoprene cell rubber
3	Four mounting holes \varnothing 5 mm.
4	One paddle 55 mm wide (mounted) One paddle 80 mm wide (packed with the control)

Float and Flow Controls

Mechanical Liquid Level Switch

F63

Liquid Level Float Switch

The F63 Liquid Level Switch is designed to maintain a liquid level in indoor or outdoor closed tanks holding water, Chlorinated water, Ethylene Glycol or other non-corrosive liquids.

The switch has SPDT contacts and can be wired to close one circuit and open a second circuit when the liquid level rises above or falls below the required level.

The switch maintains the liquid level within (approx.) 13 mm.

The float switch should not be used for liquids lighter than water (density less than 0.95 kg/dm³).

Features

- Solid polycarbonate float
- Vapour tight IP67 enclosure
- Convenient wiring terminals

Dimensions in mm

REFRIGERATION COMPONENTS

Pressure Controls

Adjustable Differential Pressure Switch

P232

Sensitive Differential

This switch senses a change in the differential pressure (either velocity pressure or pressure drop across a restriction) as the air flow changes. The pressure, as sensed by two sensing ports, is applied to the two sides of a diaphragm in the control. The spring loaded diaphragm moves and actuates the switch.

The series P232 can also be used to detect small positive gauge pressure by using only the high pressure connection and leaving the low pressure connector open, or to detect a vacuum by using only the low pressure connection and leaving the high pressure connector open to ambient pressure.

Features

- Easy to read Setpoint scale
- Large wiring space
- Versatile mounting options

Application

- This (differential) pressure switch is used to sense flow of air, single or differential air pressure

Typical applications include:

- Clogged filter detection
- Detection of frost on air conditioning coils and initiation of defrost cycle
- Air proving in heating or ventilation ducts
- Maximum air flow controller for variable air volume system

Dimensions in mm

REFRIGERATION COMPONENTS

Pressure Controls

Adjustable Differential Pressure Switch

P233

Sensitive Differential

This switch senses a change in the (differential) pressure as the airflow changes. The (differential) pressure is applied to the two sides of a diaphragm in the control.

The spring-loaded diaphragm moves and actuates the switch. The series P233A/F can also be used to detect small positive gauge pressure or to detect a vacuum.

Features

- One switch to measure relative pressure, vacuum or differential pressure
- Various accessories available
- Compact and durable construction
- Easy mounting and wiring, various mounting possibilities
- Standard PG 11 nipple and optional DIN 43650 connector
- Accurate and stable switch point
- SPDT contact standard

Application

- This (differential) pressure switch is used to sense flow of air, single or differential air pressure

Typical applications include:

- Detect clogged filter
- Detect frost or ice build-up on air conditioning coils
- Air proving in heating or ventilation ducts
- Maximum airflow controller for variable air volume system
- Detect blocked flue or vent
- Monitor fan operation

REFRIGERATION COMPONENTS

Pressure Controls

Adjustable Differential Pressure Switch

P74

Differential Pressure

The P74 series of differential pressure switches incorporate two opposing pressure elements and an adjustable range setpoint spring with a calibrated scale.

The control switches at the indicated setpoint on an increase in differential pressure and switches back to the normal position when the different pressure decreases to the setpoint less the mechanical switching differential.

Features

- Heavy duty pressure elements.
- These controls may be used in combination with series P28 lube oil protection control on two compressor, single motor units.

Application

These controls are designed to sense pressure differences between two points and may be used as operating or limit controls. Typical applications are to detect flow across a chiller or water cooled condenser, to detect flow in a heating system and sensing lube oil pressure differential on refrigeration compressors.

P20

For Air-Conditioning and Heat Pump Applications

The P20 series high and low limit (cut-out) controls for all non-corrosive refrigerants are compact pressure controls ideally suited for commercial or residential packaged air conditioning units, heat pumps, small water chillers, ice cube machines and other applications where a semi fixed setting is acceptable or required and where mounting space is limited. The P20 series includes auto reset as well as manual reset models and is factory set.

A special setting tool is available while also field (screwdriver) adjustable models can be chosen.

Features

- Field proven reliability
- Reset tab must be released before restart (Trip free manual reset)
- Compact design
- Enclosed dust-tight switch
- SPDT contact with special terminals
- Test pressure 53 bar
- Designed for at least 300000 cycles

P735

Single Pressure

The P735 series pressure controls may be used for control functions or limit functions, depending on model number.

All models are provided with alarm contacts.

All standard models have phosphor bronze bellows and brass pressure connections. Models for use with ammonia are provided with stainless steel bellows and connectors.

Features

- Generous wiring space
- SPDT contacts are provided as standard on single pressure controls
- Trip-free manual reset

Application

These pressure controls are designed for use in a variety of applications involving refrigeration high or low pressure.

Models supplied have a "whole range" design, enabling them to be used with all non-corrosive refrigerants which are within the operating range of the control.

They may also be used for other high or low pressure applications such as air, water etc. Models which can be used with ammonia are included in the program.

REFRIGERATION COMPONENTS
Pressure Controls

Adjustable Pressure Switch

P77

Single Pressure, IP54

The P77 series pressure controls may be used for control functions or limit functions, depending on model number. All models are provided with alarm contacts. All standard models have phosphor bronze bellows and brass pressure connections. Models for use with ammonia are provided with stainless steel bellows and connectors. Devices conforming to PED 97/23/EC Cat. IV (HP models) have the fail-safe function with double bellows. Their IP54 classification means that these pressure controls are suitable for almost all applications.

Features

- Generous wiring space
- Splash-proof enclosure (IP54)
- SPDT contacts are provided as standard on single pressure controls.
- Trip-free manual reset

Application

These pressure controls are designed for use in a variety of applications involving refrigeration high or low pressure. Models supplied have a "whole range" design, enabling them to be used with refrigerants R22, R134A, R404A, R410A, CO₂ and all other non-corrosive refrigerants which are within the operating range of the control. They may also be used for other high or low pressure applications such as air, water etc. Models which can be used with ammonia are included in the program. Also models tested and approved to PED 97/23/EC Cat. IV (supersedes DIN and TUV approval) are included in the program.

P78

Dual Pressure, IP54

The P78 series pressure controls may be used for control functions or limit functions, depending on model number. All models are provided with alarm contacts (except P78ALA). All standard models have phosphor bronze bellows and brass pressure connections. Models for use with ammonia are provided with stainless steel bellows and connectors. Devices conforming to PED 97/23/EC Cat. IV have a double bellows on the high pressure versions. Their IP54 classification means that these pressure controls are suitable for almost all applications.

Features

- High refrigerant pressure. Suitable for R410A and CO₂ subcritical applications
- Gold plated contacts
- Generous wiring space
- Splash-proof enclosure (IP54)
- Trip-free manual reset
- Patented separate alarm contacts for both low pressure and high pressure cut-out (except P78ALA)

Application

These pressure controls are designed for use in a variety of applications involving refrigeration high or low pressure. Models supplied have a "whole range" design, enabling them to be used with refrigerants R22, R134A, R404A, R410A, CO₂ and all other non-corrosive refrigerants which are within the operating range of the control. They may also be used for other high or low pressure applications such as air, water etc. Models which can be used with ammonia are included in the program. Also models tested and approved to PED 97/23/EC Cat. IV (supersedes DIN and TUV approval) are included in the program.

Fixed Setting Pressure Switch

P100

Direct Mount Pressure Switch

The P100 series are encapsulated, non-adjustable, direct mount pressure controls typically used for low and high-pressure cut-outs for OEM applications. The P100 series are produced according to switchpoint requirements of customers. The small dimensions, weight and protection class makes the P100 series applicable for use without the need of additional mounting brackets. The P100 series can be used for all non-corrosive refrigerants like R134a; R22; R404, R410A, R290, R600, HFO1234, R744 and others.

Features

- Compact size and light weight
- Encapsulated, dust tight switch IP67
- Broad variety of electrical and pressure connections

Application

- Computer room air conditioning
- Refrigeration/Air conditioning condensers
- Commercial refrigeration
- Ice machines
- Food service equipment

H735

Syntetic Flexible Hose

The synthetic hoses consist of a seamless PA compound inner layer reinforced with a braided layer of high performance synthetic fibre.

This reinforcement is protected by an oil, weather and abrasion resistant Polyester Elastomer Compound.

The standard assembly length is 0,9 meter with one straight and one elbow 90 degree hose fitting.

The fitting connection is 1/4" metal tube with 7/16"-20 UNF swivel nut connection suitable for 1/4" SAE male flare.

Other lengths and/or fitting connections configurations (Style 50, 51 straight or elbow) are available on request (quantity orders only).

Features

- Very flexible
- Low minimum bend radius (30 mm)
- One straight and one 90° elbow pressure connection
- Polyester Elastomer Compound construction
- High pressure safety ratio
- Low effusion

Application

These synthetic hoses are designed for pressure measuring connections.

They provide, for example, a very flexible connection between a refrigerant compressor and pressure controls. The hoses can be used for all non-corrosive refrigerants including R134a, R22, R404a, R407c and R410A with pressures within the maximum pressure range of the hose. Hoses are tested with common compressor oils in combination with above mentioned refrigerants.

REFRIGERATION COMPONENTS

Pressure Controls

Adjustable Oil Protection Switch

P28

Oil Protection

These controls measure the pressure differential between the pressure generated by the oil pump and the refrigerant pressure at the crankcase.

A built-in time delay switch allows for pressure-pick up on start and avoids nuisance shutdowns on pressure drops of short duration during the running cycle.

When the compressor is started, the time delay switch is energised. If the net oil pressure does not build up within the required time limit, the time delay switch trips to stop the compressor. If the net oil pressure rises within the required time after the compressor starts, the time delay switch is automatically de-energised and the compressor continues to operate normally. If the net oil pressure should drop below setting (scale pointer) during the running cycle, the time delay switch is energised and, unless the net oil pressure returns to cut-in point within the time delay period, the compressor will be shut down, and have to be manual reset.

The compressor can never run longer than the predetermined time on low oil pressure.

Controls are available only for manual reset after cut-out.

Features

- Heavy duty pressure elements
- Safety lock-out with trip-free manual reset
- Ambient compensated timing
- Dust-tight Penn switch

Application

These oil protection controls are designed to give protection against low net lube oil pressure on pressure lubricated refrigeration compressors.

Pressure Controls

Adjustable Oil Protection Switch

P45

Oil Protection

The series P45 controls are designed to give protection against low lube-oil pressure on pressure lubricated refrigeration compressors. The controls measure the pressure differential (net oil pressure) between the pressure generated by the oil pump and the refrigerant pressure at the crankcase. A built-in time delay switch allows pressure build-up during start and avoids nuisance shut-down on pressure drops of short duration during the running cycle.

Features

- Several million in use today
- Heavy duty pressure elements
- Key specifications match/exceed other brands
- Accurate 0.2 bar switch differential standard
- Adjustable or fixed setpoint
- Safelight output standard
- Trip-free manual reset
- High current rated output
- Ambient compensated timing

Adjustable Steam Pressure Switch

P48

Steam Pressure

The P48 series have been developed for special applications where pressure must be controlled.

All models have an adjustable differential depending on the range (see type number selection table).

The P48AAA-9110 and P48AAA-9120 has the power element outside the case.

All the models have phosphor bronze bellows and brass pressure connections except the P48AAA-9150. This model has a stainless steel bellows and pressure connection and is provided with a brass adapter 1/4"-18 NPT female to R3/8 male.

Features

- Generous wiring space provided
- Splash-proof enclosure (IP54)
- SPDT contacts are provided as standard on single pressure control
- Trip-free manual reset

Application

The series P48 pressure controls are designed as operating or high/low cut-out control on steam, air or (hot) water applications.

Also for non-combustible gases which are not harmful to the materials in contact with these mediums. On steam applications a steam trap is recommended (see Accessories).

REFRIGERATION COMPONENTS Modulating Water Valves

Pressure Actuated Water Valves

V43/V243

Regulating Valves

The V43/V243 Pressure-Actuated Water-Regulating Valves are designed to regulate water flow through the condenser of large refrigerated cooling systems. These pilot-operated valves open on an increase in refrigerant head pressure and provide modulating operation.

The V43/V243 water-regulating valves are available for commercial and maritime applications.

V43 valves are available for non-corrosive low- and medium-pressure refrigerants such as R-134A, R-404A, R-502, and R-507. Specially designed V43 valves are also available for ammonia service (R-717).

V243 valves are available for non-corrosive high-pressure refrigerants such as R410A.

Commercial V43/V243 valves are constructed with a cast iron body, brass internal parts, and bronze seat material.

To resist the corrosive action of sea water, the V43/V243 maritime and navy models are constructed with a red brass body, bronze and monel interior parts, and monel seat material.

Features

- Built-in Pilot Valve
- Easy Adjustment
- Drain Plug
- Mesh Monel Screen

REFRIGERATION COMPONENTS Modulating Water Valves

Pressure Actuated Water Valves

V46

2-way Pressure Actuated Water Valves - Commercial Applications

These pressure actuated modulating valves control the quantity of water to a condenser by directly sensing pressure changes in a refrigerant circuit.

The valves can be used in non-corrosive refrigerant systems. Ammonia power elements and valves designed for salt-water applications are available.

The valves have a quick opening characteristic and open on pressure increase (direct acting).

Reverse acting (close on pressure increase) is possible.

Features

- Pressure balanced valve design
- Pressure actuated
- 3/8, 1/2, 3/4" are angled body type valves with high Kv value
- 3/8" up to 2" pressure valves "all range" types
- Quick opening valve characteristics
- No close fitting or sliding parts in water passages
- Easy to disassemble. All parts can be replaced
- Special bronze bodies and monel parts
- Power elements with stainless steel bellows available
- Wide range of pressure connection styles
- Nickel plated seats available for 3/8, 1/2, and 3/4" valves
- Direct/reverse action

Pressure Actuated Water Valves

V46SA

Pressure Actuated Water Valves, Low Flow

The V46SA is a direct acting, "all range", pressure actuated modulating valve, used to control the waterflow to a condenser by directly sensing pressure changes in a non-corrosive refrigerant circuit.

The V46SA is specially designed for use on equipment requiring a low condenser waterflow such as icemakers, small heatpumps and watercoolers. The springhousing and power element are rolled to the valve body.

Rubber diaphragms seal the water away from the range spring and bellows part so these are not submerged in water where they would be subject to sedimentation and corrosion.

The valve can be ordered style 5 (without capillary), style 13, style 34 and style 50 (incl. 75 cm capillary).

The capillary part will be delivered separated from the valve.

Features

- Valve designed for low flow
- "All range" power element and spring housing
- Small dimensions
- Pressure actuated
- Various pressure connection style
- High refrigerant pressure resistant bellows

REFRIGERATION COMPONENTS

Modulating Water Valves

Pressure Actuated Water Valves

V48

3-way Pressure Actuated Water Valves

These water valves are especially designed for condensing units cooled either by atmospheric or forced draft cooling towers. They may be used on single, or multiple condenser hook-ups to the tower.

The type V48 valve senses the compressor head pressure and allows cooling water to flow to the condenser, to by-pass the condenser, or to allow waterflow to both condenser and by-pass line in order to maintain correct refrigerant head pressure.

A further advantage of this system is that the 3-way valve permits a continuous water flow to the tower so the tower can operate efficiently with a minimum of maintenance on nozzles and wetting surfaces.

The valves can be used in non-corrosive refrigerant systems. Ammonia power elements and valves designed for salt-water applications are available. The valves have a quick opening characteristic.

Features

- Pressure balanced design
- Free movement of all parts
- Easy manual flushing
- High Kv values
- Pressure actuated
- Can be used as mixing or diverting valve

Modulating Water Valves

Pressure Actuated Water Valves

V246 - V248

Water Regulating Valves for High Pressure Refrigerants

The V246 - V248 Series 2-way and 3-Way Pressure Actuated Water Regulating Valves for High-Pressure Refrigerants regulate water flow and control refrigerant head pressure in systems with single or multiple watercooled condensers.

These valves have an adjustable opening point in a refrigerant pressure range of 200 to 400 psig (13.8 to 27.6 bar).

These Series valves are designed specifically for condensing units cooled either by atmospheric or forced draft cooling towers. They are used on single or multiple condenser hook-ups to the tower to provide the most economical and efficient use of the tower. V246 - V248 valves may be used with standard non-corrosive or ammonia refrigerants.

For applications where the coolant may be corrosive to the internal parts, maritime models are available, which have nickel copper (Monel®) internal parts.

Features

- No Close Fitting or Sliding Parts in Water Passages
- Accessible Range Spring
- Take-Apart Construction
- Pressure-Balanced Design
- Corrosion-Resistant Material for Internal Parts

Temperature Actuated Water Valves

V47

These modulating water valves can be used for heating applications. It does have an heating element which means that the bulb temperature always must be higher than the valve body (power element).

The valve opens at increasing bulb temperature.

The bulb must be mounted pointing downwards up to horizontal.

Features

- Pressure balanced valve design
- 3/8, 1/2, 3/4" are angled body type valves with high Kv value
- Quick opening valve characteristics
- No close fitting or sliding parts in water passages
- Easy to disassemble. All parts can be replaced

Humidity Controls

Mechanical Humidity Stat

W43

Room Humidistats

These room humidistats are designed to control humidification or dehumidification equipment. It provides SPDT control.

The sensing element consists of carefully selected and processed human hair, proven to be the most sensitive and stable material known for this application. Under normal conditions these controls retain their sensitivity and accuracy for many years.

Features

- Wide range 0 to 90% R.H.
- Dust tight Penn switch
- SPDT Contacts
- Field adjustable high and low limit stops
- Separate mounting plate

REFRIGERATION COMPONENTS Fan Speed Controllers

1-phase Condenser Fan Speed Control

P215PR

Direct-Mount Single Phase Controller

These Direct Mount pressure actuated condenser fan speed controllers are designed for speed variation of single-phase motors.

Head pressure control of a refrigeration system, through speed variation of the fan on an air-cooled condenser, results in optimum performance throughout the year.

A pressure actuated device, gives the most direct and fastest response to pressure variations in the refrigerant system. The controller varies the supply voltage to the motor from 30% to at least 95% over the proportional band using the phase cutting principle.

This provides speed variation of permanent split capacitor or shaded pole motors that do not draw more than 4 A (rms) full load current.

Cut-off models (fan stops at low pressure) as well as minimum speed models (fan keeps running at 30%) are available.

The controllers can be used in non-corrosive refrigerant systems.

Features

- Condenser pressure control by fan speed variation
- Pressure input
- Direct mount
- Setpoint screw on top
- Built-in suppression filter
- IP65
- Compact design
- Attractive styling
- Quick connector plug included
- CE
- New range 5-15 bar for R134a

REFRIGERATION COMPONENTS Fan Speed Controllers

1-phase Condenser Fan Speed Control

P215RM

Remote-Mount Single Phase Controller

The new P215RM (Remote Mount) is an addition model to our very successful P215PR Direct Mount FSC which is in program since 2004.

We have designed the P215RM for situations where mounting space is limited or if the refrigeration line is too thin so it cannot carry the weight of the P215PR. Also new on this product is the all-in bracket design which is part of the complete Aluminium housing.

The P215RM can be screwed to a side panel and connected to the refrigeration line by using a flexible hose or a copper capillary.

Features

- Quick and easy to install due to integral mounting bracket
- Easy mounting with style 5 pressure connection
- No need to use a male / male adaptor between P215RM and Flex Hose
- Three ranges available 5 - 15 bar, 10 - 25 bar, 22 - 42 bar
- Output current maximum 4A at 55 °C Operating ambient temperature
- Global design CE approval

Dimensions in mm

REFRIGERATION COMPONENTS

Fan Speed Controllers

1-phase Condenser Fan Speed Control

P215

Pressure Actuated Single Phase Controller

These controllers are designed for speed variation of single phase motors, especially for fan speed control on air cooled condensers. Head pressure control of a refrigeration system, through speed variation of the fan on an air-cooled condenser, results in optimum performance throughout the year. Using a pressure transducer as the input device to the fan speed controller, gives the most direct and fastest response to pressure variations in the refrigerant system. The controller varies the supply voltage to the motor from 45% to at least 95% over the proportional band using the phase cutting principle. It is recommended to confirm with the electric motor manufacturer if a controller using the phase cutting principle for speed variation can be used.

The controller used for dual pressure input varies the fan speed by directly sensing the pressure changes of two separate refrigerant circuits.

The setpoint of each pressure transducer can be separately adjusted. The controller selects the input with the greatest cooling demand to control the fan speed. The transducers can be used in non-corrosive refrigerant systems.

P215SH/ST

Dimensions in mm

Features

- Condenser pressure control by fan speed variation
- Pressure input
- Transducers with proven reliability
- Easy accessible setpoint screw
- Adjustable minimum speed or cut-off selection
- Heatpump input available (P215SH)
- IP54 enclosure

REFRIGERATION COMPONENTS

Fan Speed Controllers

1-phase Condenser Fan Speed Control

P215

The P215LR is a single pressure input fan speed controller for air cooled condensers with respectively single, dual and triple refrigerant circuits. The controller varies the fan speed by directly sensing the pressure changes of one, two or three separate refrigerant circuits. The setpoint of each pressure transducer can be separately adjusted. The controller selects the input with the greatest cooling demand to control the fan speed.

The controllers can be used in non corrosive refrigerant systems and vary the supply voltage to the motor from 45% to $\geq 95\%$ of the supplied voltage using the phase cutting principle. It is recommended to confirm with the electric motor manufacturer if a controller using the phase cutting principle for speed variation can be used. If the pressure drops below the adjusted setpoint minus the proportional band, the output to the motor is zero volt or the adjusted min. speed setting.

Features

- Condenser pressure control by fan speed variation
- Pressure input
- Model with heatpump input available
- Transducers with proven reliability
- Easy accessible setpoint screw
- Adjustable minimum speed or cut-off selection (only on LR)
- Motor speed action can be reversed by interchanging only two wires
- Small dimensions
- DIN rail mounted

REFRIGERATION COMPONENTS

Fan Speed Controllers

1-phase Condenser Fan Speed Control

P216

Condenser Fan Speed Controller

These controllers are designed for speed variation of single phase motors, especially for fan speed control on air cooled condensers. Head pressure control of a refrigeration system, through speed variation of the fan on an air-cooled condenser, results in optimum performance throughout the year.

Using a pressure transducer as the input device to the fan speed controller, gives the most direct and fastest response to pressure variations in the refrigerant system. The controller varies the supply voltage to the motor from 45% to at least 95% over the proportional band using the phase cutting principle.

If the pressure drops below the adjusted setpoint minus the proportional band, the output to the motor is zero volt or the adjusted min. speed setting. This provides speed variation of permanent split capacitor or shaded pole motors which do not draw more than 12 A (rms) full load current.

The controller used for dual pressure input varies the fan speed by directly sensing the pressure changes of two separate refrigerant circuits. The setpoint of each pressure transducer can be separately adjusted. The controller selects the input with the greatest cooling demand to control the fan speed.

The transducers can be used in non-corrosive refrigerant systems.

The motor manufacturer should have approved his product for this speed control principle. It is recommended to confirm with the electric motor manufacturer, that the motor can be used with a controller, using the phase cutting principle for speed variation.

You can also provide a copy of this P216 product data sheet to the motor manufacturer/supplier for review.

Features

- The new benchmark in standard FSC
- Easy to Install and Easy to operate
- Output Range: 0,5 to 12 Amp (1 phase)
- Input 0-10 Vdc
- Including 0-50 bar pressure transducer P499VCS-405C
- Heatpump mode
- Reverse operation mode
- Master / Slave mode
- Fixed pressure ranges for direct replacement (P215)
- Setpoint and Min speed potmeters

1-phase Condenser Fan Speed Control

P266

Pressure Actuated Single Phase Digital Controller

The P266 Pressure Actuated Single Phase Digital Controller is a cost-effective, weather-resistant, durable motor speed control. The P266 control is designed for approved single-phase, Permanent Split-Capacitor (PSC) motors commonly used in a wide variety of refrigeration and air conditioning condenser fan applications.

The P266 Series controls are designed to replace the Johnson Controls® P66 Series and P215 Series fan speed controls, providing additional features and flexibility, greater energy efficiency, and longer motor life in a compact, rugged, weather-resistant package.

P266 models are available for 208 to 240 VAC and 440 to 575 VAC range applications. P266 controls have current ratings from 4 to 12 A depending on the voltage and model.

Some P266 models provide optional control of up to three auxiliary (fixed-speed) fans or fan stages. Also, some models provide two additional high-voltage triacs, which allow you to split the source power to the main and auxiliary windings, and connect a low-speed capacitor to increase efficiency at low speed operation.

Features

- Global design CE / UL / CSA / C-tick
- Microprocessor based
- Field Programmable, Digital setting
- One or two Electronic Pressure Transducers (P266SNR)
- Pressure range 0 - 35 bar or 0 - 52 bar
- Patented design
- Output 8 or 12 Amp at 60°C ambient temperature
- Robust aluminium IP54 enclosure with integral heatsink
- Multi triac control providing energy savings up to 25%
- Optional auxiliary (vernier) control
- Auto selection 50 / 60 Hz

P315PR

Direct-Mount Pressure Actuated for EC Motors

The direct mount pressure actuated condenser fan speed controllers are designed for speed variation of electronically commutated (EC) motors. Head pressure control of a refrigeration system, through speed variation of the fan on an air-cooled condenser, results in optimum performance throughout the year.

The controllers can be used in non-corrosive refrigerant systems.

A pressure actuated device provides the most direct and fastest response to pressure variations in the refrigerant system.

The controller varies the supply voltage to the motor from 5% to at least 95% over the proportional band.

Features

- Fan Speed Variation Condenser Pressure Control
- Pressure input
- Direct Mount Option
- Setpoint Screw Location on Top of Device
- IP65 Enclosure
- Compact Design
- Attractive Styling
- Quick Connector Plug Included
- Suitable to control 1 or 3 phase EC motor

Modular Electronic Control System

System 450™

Modular Electronic Controls

System 450™ is a family of modular, digital electronic controls that is easily assembled and set up to provide reliable temperature, pressure, and humidity control for a wide variety of Heating, Ventilating, Air Conditioning, and Refrigeration (HVACR) and commercial/industrial process applications.

The System 450 control system is designed to replace System 350™ control system and System 27, and provide many additional features and benefits with less than a dozen model variations.

All System 450 control modules are multipurpose and field configurable out-of-the-box; each module is designed for use in temperature, pressure, and humidity systems. A System 450 control system can be easily assembled and configured to monitor and control temperature, pressure, and humidity simultaneously.

A single C450 control module can be set up as a stand-alone control or connected to expansion modules to control up to ten outputs based on any of the three available inputs.

A control system may consist of relay outputs (Single-Pole, Double-Throw [SPDT]), analog outputs (0–10 VDC or 4–20 mA), or any combination of relay and analog outputs.

Features

- Durable, Compact Modular Design with Plug-Together Connectors and DIN Rail or Direct Wall Mount Capability
- Multipurpose, Field-Configurable Modules Designed for Global Use
- Backlit Liquid Crystal Display (LCD) and Four-Button Touchpad User Interface
- Up to Three Inputs and up to Ten Outputs (Relay or Analog)
- Versatile, All-in-One, Stand-Alone Control Modules
- An Extensive Suite of Compatible Temperature and Humidity Sensors as well as Pressure Transducers
- High Input Signal Selection
- Differential Control
- Adjustable User-Defined Reset Setpoint (C450R Only)
- Adjustable Minimum and Maximum Setpoint Temperature (C450R Only)
- Selectable Warm Weather Shutdown Temperature (C450R Only)
- Adjustable Setback Temperature (C450R Only)

Electronic Control Devices

ER Line

Electronic Refrigeration Line

Devices are designed to be incorporated in refrigerated display cases and cold storage rooms.

ER Line proposes progressive offer from basic controls to advanced controls including real time clock, energy saving and network communication to be integrated with monitoring system. It also introduces specific products for supermarkets (e.g. compressor rack).

Hardware Features

- Robust front panel for durability and long term usage
- Direct 230V supply, no external transformer required
- Up to 5 relays in a single package
- NTC or PTC (A99) sensors
- Removable plug connectors for quick mounting and wiring
- Embedded real time clock, no additional clock card required
- Embedded RS485 port, no additional communication card required

Application Features

- Positive or negative temperature units with a single product
- Minimum and maximum temperature monitoring
- Comprehensive controls
- Light and standby switching
- Energy saving (2nd setpoint)

Multi-Stages Control Devices

MS Line

General purpose and Multi Stages

This range of versatile controls is intended for single or multistage (2 or 4 stages) applications such as heating, cooling but also humidity or pressure depending on the input type.

This range incorporates all control functions as required by modern applications and it exists in both panel mount and DIN rail enclosures. Particular attention has been given to its style in order to better suit your machine design.

This complete range of microprocessor based controls offers innovative features and "state of the art" technology.

Features

- Attractive Panel mount and DIN rail mount enclosure
- Up to 4 relays in panel mount enclosure
- 230 Volt power supply models available
- Accept temperature (A99) and 0-10 Volts sensor signal depending on models
- Power supply to sensors on 0-10 Volts models available from controller
- Accurate and interchangeable IP68 sensor
- Wide range of enclosures for sensors available
- Keyboard lock
- SMD technology

REFRIGERATION COMPONENTS Transducers and Sensors

Pressure Transducer

P499

Electronic Pressure Transducer

The P499 Series is a new global Pressure Transducer with an excellent price performance ratio.

The P499 exceeds the latest industrial CE/UL requirements including surge protection, and is over voltage protected in both positive and reverse polarity.

The P499 is designed to produce a linear analogue signal based on the sensed pressure.

The pressure port is machined from a solid piece of 17-4PH stainless steel. There are no O-rings or welds that are exposed to the pressure media.

This results in a leak proof, all metal sealed pressure system which withstand more than 10 million pressure cycles without failure.

Features

- Single-piece machined steel pressure port
- Environmentally Sealed Electronics
- Reliable, Repeatable Performance and Long Operating Life
- Slender Body Design
- Available in several pressure ranges up to 50 bar.

Transducers and Sensors

Mechanical Pressure Transducer

P35

The P35 is a single pressure input fan speed controller for air cooled condensers. The controller varies the fan speed by directly sensing the pressure changes in a refrigerant circuit.

The setpoint of each pressure transducer can be separately adjusted.

The controller selects the input with the greatest cooling demand to control the fan speed. The controllers can be used in non corrosive refrigerant systems and vary the supply voltage to the motor from 45% to $\geq 95\%$ of the supplied voltage using the phase cutting principle. If the pressure drops below the adjusted setpoint minus the proportional band, the output to the motor is zero volt or the adjusted min. speed setting. This provides speed variation of permanent split capacitor or shaded pole motors which do not draw more than 3 A (rms) full load current. The motor manufacturer should have approved his product for this speed control principle.

It is recommended to confirm with the electric motor manufacturer, that the motor can be used with a controller, using the phase cutting principle for speed variation.

Features

- Condenser pressure control by fan speed variation
- Pressure input / Dual pressure input (BR models)
- Model with heat pump input available
- Transducers with proven reliability
- Easy accessible setpoint screw
- Built-in suppression filter
- Adjustable minimum speed or cut-off selection
- Motor speed action can be reversed by interchanging only two wires
- Small dimensions and DIN rail mounted

REFRIGERATION COMPONENTS Leak Detection

Leak Detectors

The JCI product range offers Leak Detectors (in order to comply to the EU F-gas Directive) for the following gases:

- Ammonia (NH₃)
- Synthetic refrigerants HFC (R134a, R410a etc) as shown in this catalogue
- Carbon dioxide (CO₂)
- Hydro Carbons (R290, R600)

The MPU multi point units need to be used in combination with the MP series of detectors.

The GD/GS series of detectors are standalone detectors and have 3 alarm relays that are factory calibrated depending on the gas type.

Factory-set alarm levels (by experience appropriate alarm levels and ranges)

Detector type	Range	Alarm levels
NH ₃ -1000	0-1000 ppm	150 / 300 / 500 ppm
NH ₃ -4000	0-4000 ppm	150 / 300 / 3000 ppm
NH ₃ -10000	0-10000 ppm	500 / 3000 / 8000 ppm
HFC	0-4000 ppm	100 / 1000 / 2000 ppm

P2000 SMS

P2000 Security Management System

Available
Soon

Version 3.14

The Johnson Controls® P2000 Security Management System (SMS) represents the latest technology in integrated security solutions. Using Microsoft® Windows® Operating Systems (OSs), users can easily configure and use the P2000 software. An underlying Microsoft SQL Server™ database engine offers high performance without high overhead. The enhanced graphical user interface (GUI) provides operators access to interactive real-time facility maps featuring dynamic icons, to monitor and control major facility systems and functions. Authorized operators can create cardholder records, define hardware components, and control access using badging, Closed Circuit Television (CCTV), Digital Video Recorders (DVR), area control, mustering, and elevator control to name a few, as well as monitor local and remote transactions and alarm activity in real time.

The version 3.14 enables the advanced Web UI HTML5 interface through: Geo location mapping, Case management, ONVIF Video viewer and Alarm management options. Scalable, the P2000 is available in three editions: Express, Professional and Corporate.

COMMON OPTIONS to all P2000 Editions

- Map for real time monitoring
- Alarm management + response
- Cardholder management
- Web Visitor management
- Cardholders DB sharing (MIS)
- Security Threat levels
- Area Control
- Hour on site reporting
- Evacuation control (Mustering)
- Guard Tour
- Elevators low level interface
- Cabinet Control
- BAS integration (METASYS)
- P2000 VMS integration

EXPRESS EDITION main Feature and Integration options

- 1 Workstation, 32 doors and 10.000 Cardholders
- P2000 VMS Integration
- Other Video System Integration
- Video Badging Station Option
- HID® Edge EVO® / Assa Abloy® Aperio® Options
- Intercom Option
- Fire / Intrusion OPC Options
- Server Virtualization (HA) Option
- Advanced HTML5 Web UI
- Mobile Application for Apple iOS® and Android®

PROFESSIONAL EDITION adds to Express the following features

- Up to 5 Workstations, 128 doors
- 25.000 Cardholders
- DB Partitioning
- Archive Report Server options
- Elevators Option
- Enterprise (WAN Participant)

CORPORATE EDITION adds to Professional the following features

- 5 Workstations upgradable to 40
- 25.000 Cardholders upgradable to 10 Millions
- Up to 2.048 doors .
- Enterprise (WAN Central site)
- FDA Cfr 21 P11 Option for Pharmaceutical ind.

P2000 Controllers

S321-IP

Dual Door Network Controller

The S321-IP is an advanced, intelligent, network controller capable of monitoring and controlling one or two fully-configured doors for small-to-large security installations.

The S321-IP can be used as a standalone device, with all cardholders and configuration data saved locally at the controller, or can be seamlessly integrated with the P2000. S321-IP host communications use a standard TCP/IP network protocol and are easily integrated into the P2000 Security Management System.

The controller can be programmed either from its own user interface from any network-connected computer and standard browser, or through the P2000 interface.

The S321-IP controller can store locally up to 5,000 Cardholders and manage 40 holidays and 64 time zones.

S321-IP

Features

- Interfaces to one or two readers
- 8 inputs, 4 outputs
- Four-state (supervised) inputs and two-state (unsupervised) inputs
- Up to 5,000 cardholder badges
- 4 MB flash memory
- 10/100Base-T network connection
- Up to 128-bit badge numbers, 2 schedules per badge
- RTC with 40 holidays and 64 schedules
- Can be updated remotely using File Transfer Protocol (FTP)
- Browser-based Graphical User Interface (GUI)
- Expandable modular design
- Input Voltage +12 to +24 VDC; 16 to 24 VAC
- Mounting: DIN rail or Flat surface
- Dimensions: 14.4cm x 15cm x 5.5cm

SPC1000-1A10

Security Panel Assembly

SPC10000-1A10

Security control panel with S321-IP controller and power supply

Ordering Codes	Description
S321-IP	Dual Door Network Controller
SPC10000-1A10	Security Panel with S321 and Power Supply

Features

- S321-IP pre-Assembled in a Security Panel
- Power supply: 1 module 24V@5 Amp, nominal Input: 85/240 VAC
- Dimensions : 40,6 cm W x 40,6 cm H x 16,8 cm D
- Battery brackets for 2 x S300-BAT (12V 7Ah)
- Key lock and Tamper switch

P2000 Controllers

CK721-A

High-Speed High-Traffic Network Controller

The CK721-A is an advanced, intelligent, network controller capable of handling high volume, high-speed traffic with host security management systems. The controller is able to perform manual and automatic control functions using add-on modules to connect readers, monitor 2- or 4-state inputs, and add output points.

Communication between the CK721-A and modules is achieved via an RS485 connection. The Expandable modular design allows an unlimited number of CK721-A controllers to be connected via Ethernet.

Each CK721-A can support up to 64 readers; for a total capacity of 2,048 readers in a network with the P2000 Security Management System.

CK721-A host communications use a standard TCP/IP on a 10/100Base-T network and are easily integrated into the P2000 security management system. The controller can be programmed by using its own user interface or by using the Microsoft® Windows® based P2000 interface. Its easy integration with P2000 software allows the CK721-A to take advantage of all the P2000 software features, including alarm monitoring, history reporting, input/output linking, card and system activated events and local, central or shared operation; history and event transactions are uploaded to the host for storage and report generation.

The CK721-A/P2000 server encrypted communications provides secure network communications between the CK721-A controller and the P2000 server using the Advanced Encryption Standard (AES256)

Features

The CK721-A supports the following functional capacity:

- Embedded 32-bit processor
- 128 MB flash memory
- 10/100Base-T network connection, encrypted
- DB9 port for configuration, commissioning, and service maintenance
- Up to 64 readers per controller
- Storage capacity for up to 200,000 cardholders
- Supports OSDP Version 1.1
- Accepts up to 128-bit badge numbers
- 12 facility codes per reader (768 per controller)
- 40 holidays
- 64 time zones
- 32 access group/time zone pairs per badge
- Supports Wiegand® interface, proximity, magnetic stripe, smart card, most biometric readers and bar code card technologies. Custom Card engineered formats are also accepted.
- RS485 expansion Bus supports Reader module: S300-DIN-RDR2SA and S300-DIN-RDR8S and auxilliary I/O modules: S300-DIN-I804 and S300-DIN-I32016
- Mounting DIN rail or Flat surface
- Dimensions: 13.1 x 27.0 x 6.2 cm

Expansion modules

Readers and I/O boards

Communication between the CK721-A and modules is achieved via an RS485 connection:

Ordering Codes	Description
S300-DIN-RDR2SA	The Two-door module RDR2SA provides two doors full control connecting Cards Readers through Wiegand ports or via OSDP in RS485.
S300-DIN-RDR8S	The Eight-door module RDR8SA provides eight doors full control connecting Cards Readers through Wiegand ports or via a single RS485 multidrop (OSDP).
S300-DIN-I804	The I804 module provides, on a limited footprint, up to 8 Supervised inputs, plus power fails and Tamper inputs, and 2 Relay plus 2 Open- Collector outputs.
S300-DIN-I32016	The I32016 module provides up to 16 supervised inputs, plus power fails and Tamper inputs, and 16 Relay plus 16 Open- Collector outputs.

P2000 Readers Modules

S300-DIN-RDR2SA

2 Door Module

The S300-DIN-RDR2SA module provides interface control for access and security devices associated with up to two doors. The module connects up to 2 readers via Wiegand Ports or in RS485 with Open Supervised Device Protocol (OSDP) Version 1.1.

The RDR2SA provides inputs and outputs for interface and command two doors, supervised inputs for: Door Status, Aux inputs and Exit Buttons. Two additional inputs are dedicated to Power Failure and Enclosure Tamper status. Any points not used for the door can be configured as general purpose I/O points, possibly eliminating the need to purchase additional I/O modules for certain installations.

The RDR2SA provides power for the card reader hardware, and output relays for the doors. The door locking hardware is powered locally.

The RDR2SA uses standard RS485 communications and can interface the following controllers: CK722, CK721-A, and the legacy controller: CK721, CK720 and CK705.

Please note, the CK721-A using firmware versions earlier than 3.0, CK721 controllers, and CK720/705 controllers are not supported by P2000 Version 3.13 and later.

In the RDR2SA, each of the 2 door interfaces consists of:

- Wiegand® Data0 and Data1 interface or RS485 OSDP V. 1.1
- Supervised door monitor switch input, normally open or normally closed, based on wired configuration
- Supervised Auxiliary input
- Supervised "request to exit" switch input, normally open
- Door strike relay, Single Pole Double Throw (SPDT)
- Alarm shunt relay, SPDT
- Red lamp driver (open collector)
- Green lamp driver (open collector)
- +12 VDC 250 mA per reader power supply

In addition, each module has the following common inputs:

- Calibration resistor input
- Supervised power fail input
- Supervised panel tamper input

Features

- 2 Reader Interfaces: 2-wire Wiegand interfaces or two RS485 bus OSDP Version 1.1.
- 4 Open collectors for readers Green and Red LED indicators (max 12 VDC / 100 mA)
- 8 Supervised Inputs with calibration
- 4 Relay (Lock+Shunt) Outputs 1 A maximum, 24 VDC, 25 VA maximum
- Communication bus to CK controller: RS485 at 9.600 or 19.200 Baud
- Input Voltage Power 12 to 24 VDC or 16 to 24 VAC at 24 W
- Power to reader: 12 VDC, 250 mA (typical)
- Mounting Specifications DIN rail or flat surface
- Dimensions 14.4 cm x 15.0 cm x 5.5 cm

P2000 Readers Modules

S300-DIN-RDR8S

8 Door Module

The S300-DIN-RDR8S module provides interface control for access and security devices associated with up to eight doors. The module connects up to 8 readers via Wiegand Ports or in RS485 with Open Supervised Device Protocol (OSDP) Version 1.1.

The RDR8S provides inputs and outputs for interface and command each of the 8 doors, supervised inputs for: Door Status, Aux inputs and Exit Buttons. Two additional inputs are dedicated to Power Failure and Enclosure Tamper status. Any points not used for the door can be configured as general purpose I/O points, possibly eliminating the need to purchase additional I/O modules for certain installations.

The RDR8S provides power for the card reader hardware, and output relays for the doors. The door locking hardware is powered locally.

The RDR8S uses standard RS485 communications and can interface with the following controllers: CK722 and CK721-A version 3.0 and higher.

In the RDR8S each of the 8 door interfaces consists of:

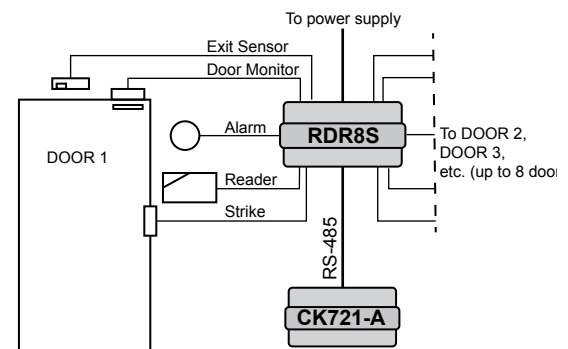

- Wiegand® Data0 and Data1 interface or RS485 OSDP V. 1.1
- Supervised door monitor switch input, normally open or normally closed, based on wired configuration
- Supervised Auxiliary inputs
- Supervised "request to exit" switch input, normally open
- Supervised tamper input
- Supervised spare input
- Door strike relay, Single Pole Double Throw (SPDT)
- Alarm shunt relay, SPDT
- Red lamp driver (open collector)
- Green lamp driver (open collector)
- +12 VDC 250 mA per reader power supply

In addition, each module has the following common inputs :

- Calibration resistor input
- Supervised power fail input
- Supervised panel tamper input

Features

- 8 Reader Interface: 2-wire Wiegand interfaces or multidrop bus RS485 OSDP Version 1.1
- 16 Open collectors for readers Green and Red LED indicators (max 12 VDC / 100 mA)
- 16 Supervised Inputs with calibration
- 16 Relay Outputs 1 A maximum, 24 VDC, 25 VA maximum
- Communication bus to CK controller: RS485 at 9.600 or 19.200 Baud
- Input Voltage Power 12 to 24 VDC or 16 to 24 VAC at 24 W
- Power to reader: 12 VDC, 250 mA (typical)
- Mounting Specifications DIN rail or flat surface
- Dimensions 13.07 cm x 26.88 cm x 6.36 cm

P2000 I/O modules

S300-DIN-I8O4

8 Input and 4 Output Module

The S300-DIN-I8O4 module provides auxiliary Inputs and Outputs to monitor and control other systems installed in the building.

The supervised 8 inputs, 4 relays and 4 Open collectors, are organized into 2 Terminals. The outputs can be used for light activation or to open multiple doors in rack. Using the event process of the P2000 SMS inputs can be used for special activation or to monitor status and alarms. Two additional inputs are dedicated to Power Failure and Enclosure Tamper status.

The I8O4 uses standard RS485 communications and can interface with the following controllers: CK722, CK721-A and with legacy controller: CK721, CK720 and CK705.

In the I8O4 module each of the two I/O Terminals consists of:

- 4 Supervised inputs
- 2 Relay Outputs
- 2 Open Collector Outputs

In addition each module has:

- 1 Calibration resistor input
- 1 Supervised power fail input
- 1 Supervised panel tamper input

Features

- 8 Supervised Inputs with calibration
- 4 Relay Outputs 1 A maximum, 24 VDC, 25 VA maximum
- 4 Open collectors (max 12 VDC / 100 mA)
- Communication bus to CK controller: RS485 at 9.600 or 19.200 Baud
- Input Voltage Power 12 to 24 VDC or 16 to 24 VAC at 24 W
- Mounting Specifications DIN rail or flat surface
- Dimensions 13.07 cm x 26.88 cm x 6.36 cm

P2000 I/O modules

S300-DIN-I32O16

32 Input and 16 Output Module

The S300-DIN-I32O16 module provides auxiliary Inputs and Outputs to interface difference services in the plants.

The supervised 8 inputs, the 4 relay and the 4 Open collectors are organized into 8 Terminals. The outputs can be used for light activation or to open multiple doors in rack. Using the event process of the P2000 SMS inputs can be used for special activation or to monitor status and alarms. Other two inputs are dedicated to Power Failure and Enclosure Tamper status.

The I32O16 uses standard RS485 communications and can interface with the following controllers: CK722, CK721-A and with legacy controller: CK721, CK720 and CK705.

In the I32O16 module, each of the eight I/O Terminals consists of:

- 4 Supervised inputs
- 2 Relay Outputs
- 2 Open Collector Outputs

In addition each module has:

- 1 Calibration resistor input
- 1 Supervised power fail input
- 1 Supervised panel tamper input

Features

- 8 Supervised Inputs with calibration
- 4 Relay Outputs 1 A maximum, 24 VDC, 25 VA maximum
- 4 Open collectors (max 12 VDC / 100 mA)
- Communication bus to CK controller: RS485 at 9.600 or 19.200 Baud
- Input Voltage Power 12 to 24 VDC or 16 to 24 VAC at 24 W
- Mounting Specifications DIN rail or flat surface
- Dimensions 13.07 cm x 26.88 cm x 6.36 cm

P2000 SPA

Security Panel Assembly

Pre-wired, Preassembled Control Panel

The Security Panel Assembly is a pre-wired, preassembled standard control panel and enclosure that contains a single or a combination of controllers and modules. These pre-designed solution save both time and money. Various models are available to accommodate a variety of common applications.

The control panel is shipped complete, mounted in a steel enclosure. The panel is equipped with the required number of 24 VDC power supplies. The power supply has Uninterruptible Power Supply (UPS) capability with the addition of factory-wired gel cell batteries (S300-BAT), which are sold separately.

These enclosures are designed specifically for security control requirements, with battery brackets that do not need to be removed to install the batteries, a lift-off door, a pre-wired door tamper switch, and a lockable door with key. Space is reserved on specific models for the addition of future components.

S300-BAT Lead acid battery for security application, 12 VDC, 7 Ah - * Not included in the Security Panel

P2000 Security Enclosure

Security Enclosure

Enclosures and Spare Parts

Panels and components can be ordered separately for field installation of security enclosures or as replacement items for Security Panel Assemblies. In addition to the complete enclosure with door, and optional mounted subpanel, we offer individual components such as Battery Bracket and Tamper Switch Kits that can be ordered separately or as spare parts.

The enclosures, designed specifically for security control requirements, come with pre-engineered and pre-mounted studs for field installation of the battery brackets, as well as standard electrical conduit knockouts.

The lift-off door comes with a lock and key.

P2000 VMS

Video Management System

Version 6.13

The Johnson Controls® P2000 Video Management System is an intelligent video security solution that offers a single, innovative, open IP video platform for video management, video analytics, system integration, and alarm management.

P2000 VMS provides a feature-rich, easy-to-use interface that installs on standard commercial-off-the-shelf hardware and software platforms, that incorporates IT-friendly features to make administration simple.

With support for hundreds of IP cameras and analog camera encoders, from several manufacturers, P2000 VMS makes it easy to find the right camera without compatibility worries.

With three software Editions the P2000 VMS has a solution for every topology and size of installation. Licensing a camera has never been so simple. P2000 VMS allows you to add licenses one at a time, limited only by the server hardware. No additional charge for servers and clients or the P2000VMS.

P2000VMS is natively integrated in the P2000 Security Management System. This allows operators to control all their security platforms from a single location, such as access control, intercom, intrusion detection, and video.

STANDARD EDITION

Single site, single server recording system

- Multiple Web Clients
- Low to Medium camera counts
- Easy migration from DVN5000 or other DVR systems
- Mobile Bridge to Android and iOS Apps Option
- Video Analytics Options
- P2000 SMS native integration

PROFESSIONAL EDITION

Single or multisite, multiserver system

Professional includes all Standard edition features and:

- Medium to high cameras counts
- Highly scalable, advanced functionality
- Active Directory Support
- Alarm Management
- Server Farms and Virtualization
- Videowall management

ENTERPRISE EDITION

Multiserver with Fail-Over back up

Enterprise includes all Professional edition features and:

- Medium to very high cameras counts
- Redundancy and Failover recording
- Business Intelligence reports

Video Analytics included in all P2000 VMS editions are:

- Camera signal loss Detection
- Camera covered, painted or moved
- Motion Detection

LEGACY DVN5000

When a DVN unit, with firmware version 2.10 or higher, is implemented in a P2000VMS system, the driver supports Pan, Tilt and Zoom (PTZ) and I/O operation. Images are recorded at P2000 VMS server at resolution max 4CIF and up to 30 FPS.

P2000 VMS Video Management System

Optional Video Analytics

The following video analytic can be added at any camera, at any time and at any of the three P2000 VMS editions.

Area Alarms and Restricted Zones

- Area alarms or restricted zones refers to the ability to highlight multiple zones in a field of view and alert on activity in any one of them while ignoring activity in unselected areas.

Automatic License Plate Recognition

- Available in four and eight camera pack, this analytic provides out-of-the-box Automatic License Plate Recognition (ALPR) functionality. It can be used for parking applications. License plates and their corresponding images are stored and can be easily searched. Various alarm scenarios can be achieved by using white or black lists.

Automatic PTZ Tracking

- The auto-PTZ tracking function will automatically control PTZ cameras when relevant activity or a rule- break is detected.

Dwell Time and Loitering

- The loitering/dwell time function recognizes how long a particular target stays in a defined field of view. In security applications, this analytic can help with identifying potential threat by detecting loitering people or vehicles. It support business intelligence.

Item Left Behind and Removed Detection

- The left/removed item function alerts on background image changes due to new or removed objects in the field of view.

Motion Tracking

- The motion tracking function compares relevant pixel changes between images and alerts on relevant foreground motion while ignoring irrelevant motion.

Object Classification

- The object classification functionality is able to segment objects between people, vehicles and unknown objects.

People and Vehicle Counting

- The counting functionality counts objects entering and leaving a field of view or crossing a virtual fence. This analytic is great for tracking attendance in large venues and counting vehicles in parking garages.

Virtual Fence and Tripwire

- A virtual fence refers to an invisible digital fence or tripwire that can send an alert when an object crosses in one or both directions. Especially useful in perimeter security.

Wrong Direction

- The wrong direction function will alert on motion going against the specified flow of traffic.
